Filing packet 5 of 7 — Guided Mastery — A Framework

Form TX, mailed. Batch 2. Tick as you go. Not legal advice — this is the Copyright Office’s own published procedure.

The anchor work of the batch. Domain-agnostic: diagnose from real evidence → prioritise by leverage → breadcrumb the first step → scaffold with immediate feedback → cut camouflage → transfer-test → build confidence honestly. Nothing institutional is in it.

Provenance, for the record. The method predates this employment by decades — the daily observation report written by hand, the rocket lab with honest error bars, the two-sentence paragraph. Its C213 application was made **as a student**, solving his own course experience, on his own equipment and his own time, in Zone P. No employer resources, data, or time are in this work. The claimant states he is morally, ethically, and legally unconflicted.

Space 3b is the one people get wrong. Leaving it blank is what makes the work unpublished.

On Space 6: the *framework* is the author's — its sequence, its rules, its judgments. The *sentences* were drafted with AI assistance at his direction, so they are excluded. Claiming the method while excluding the prose is both accurate and the stronger claim.
