

DEPOT_7045_S_300_E_Midvale

The depot — 7045 S 300 E, Midvale, UT 84047

Listing facts (Zillow, fetched 2026-09-19) and the three depot numbers to get. His words: “this entire complex solar roofed and power banked.”

Listed fact	Value
Type	Twin home (townhouse), built 2023, “built by the owner”
Size	4,000 sq ft, 3 bed / 3 bath, 12-ft vaulted upper level
Structure	14-inch concrete walls, concrete floors, two HVAC systems
Parking	Attached two-car garage
Rent	\$3,995/mo, 12-month lease, listed 8/26/2025
Parcel	22302010340000

The complex, as pinned on 09-10 (#208): four twin homes → eight separately addressed units. This listing is one of the eight.

Three numbers to get before a solar or battery quote means anything (*estimates below are illustrations, marked*):

Number	How to get it	Illustration
Roof area, usable	Footprint from the county parcel viewer (parcel above) × four buildings × usable fraction	~2,000 sq ft footprint per twin home → ~8,000 sq ft across four; at ~60% usable and ~17 W/sq ft ≈ 80 kW DC
Garage bays	2 per unit × 8 units	16 bays → 16 chargers , the fleet’s overnight home. Concrete floors and walls already suit it
Service capacity	The utility’s service size per building and the transformer on the street	Decides whether 16 Level-2 chargers plus a battery bank fit without a service upgrade — the number a solar installer asks first

Why this is the depot: Salt Lake County — where the state’s own data puts two-thirds of DUI arrests and the highest alcohol-crash rates — 12 miles from downtown’s closing time, with concrete construction and eight garages. *The machine docks where the work is* (Zone V depot pin, 09-10).
