

V1.0 SOURCES

V1.0 SOURCES — what every linked page actually says (pulled 2026-09-20)

The facts behind V2.0 JOSHUA and V1.1 ANDREA, one block per topic, each with its link, in plain words. Moved here so the plan page stays short. Nothing on this page is a step; it's what the pages said when they were opened.

A · JOSHUA Holdings — the company you own

Size: this is the bucket, not the prize. Everything below (B through H) pours into it. Its first-year job is one building and one car; its ten-year job is the ten states in section H.

B · Ride at Closing Utah — the nonprofit that proves it

Size: Utah spends **about \$1.9 million a year of federal drunk-driving money** through its Highway Safety Office, in projects of **\$50,000 to \$495,000 each** (2026 plan). The biggest one — \$495,000 — is a media campaign aimed at **men 21-39**, and the state's own survey says they don't know their **"sober ride choices."** That sentence is the door. A nonprofit is the only shape that can walk through it. **From the source, exact:** the impaired-driving section totals \$1,402,868 of 405d money; \$1,911,661 counting the office's two admin lines; every subgrantee in that section is a state agency — nonprofits appear elsewhere in the plan under 402/405b (Utah Safety Council, Bike Utah, Safe Kids Utah). Source: [Utah FY2026 grant application](#), pages 33-39.

File the nonprofit corporation using the state's template

From the source — [Utah Division of Corporations — nonprofit](#): \$59, not refundable. Online: sign in with a UtahID → Formations → Domestic Nonprofit Corporation. The form asks for name, purpose, a registered agent with a Utah street address, the incorporator, whether there are voting members, the main address, and the directors — the state's guide says **at least 3**. From Jan 1, 2025 you upload your latest IRS 990 at each renewal (a new group uploads at its first renewal). Renewal is \$18 a year, \$10 more if late; \$75 extra to expedite ([fee list](#)). Everything filed is public record.

Ask three people to be the board

From the source — [Utah Nonprofits Association — FAQ](#): the FAQ doesn't set a board minimum; the state's own guide does — three directors. UNA has a 2024 "Guide to Starting a Nonprofit" PDF on its [Starting a Nonprofit](#) page; UNA phone (801) 596-1800. It does not do fiscal sponsorship.

Apply to the IRS to be tax-exempt

From the source — [IRS — 1023-EZ / 1023](#): short form \$275 on Pay.gov; you must expect \$50,000 or less coming in each of the next three years, the same for the past three, and \$250,000 or less in assets ([worksheet in the instructions](#)). An LLC can't use the short form. IRS decides 80% of short forms within **22 days**, long forms within **191 days** ([Where's my application](#), June 2026). Long form \$600 ([about 1023](#)). While waiting you still file a 990 and tick "application pending." Status line 877-829-5500; approval shows up first in the IRS's Tax Exempt Organization Search.

Get the federal UEI number

From the source — [SAM.gov — entity registration](#): free. For a UEI only (what a sub-grantee needs) you give the legal name and street address. To apply for federal money directly you need the full registration — up to 10 business days to go active, renewed every 365 days. Make a Login.gov account first. Free help: fsd.gov live chat and phone, Mon-Fri 8-8 Eastern.

Each year, upload the IRS return when you renew with the state

From the source — [Utah Consumer Protection — charities](#): H.B. 43 (2024) ended the yearly charity registration on May 1, 2024; from Jan 1, 2025 the 990 is uploaded to the Division of Corporations instead. Consumer Protection still enforces the law and can fine a group that skips the upload — questions to dcpreregistrations@utah.gov. The small-group 990 is the [990-N e-Postcard](#): free, online only, for groups normally taking in \$50,000 or less (first year: \$75,000 or less), due the 15th day of the fifth month after year-end (May 15 for a calendar year); miss it three years running and tax-exempt status ends automatically.

After the IRS letter, get the Utah sales-tax exemption

From the source — [Utah Tax Commission — TC-160](#): apply online at tap.utah.gov (“Apply for a Religious and Charitable Sales Tax Exemption Number”); attach the IRS letter; give the EIN and a short statement of purpose and how you raise money, in your own words. Doesn’t cover unrelated business sales. Questions 801-297-2200. An officer signs under penalty of perjury.

C · The evidence — the numbers that make anyone say yes

Size: Utah made **10,412 DUI arrests in 2022**, and **two out of three** were on the Wasatch Front — Salt Lake, Davis, Utah and Weber counties. The state says the crashes cluster **Friday-Sunday, 6 p.m.-1 a.m.** Nationally, **11,904 people died** in alcohol-impaired crashes in 2024. Salt Lake County is first because that’s where the arrests are. **From the source, exact (UDOT crash service, pulled 2026-09-20):** Salt Lake County DUI crashes 2023 → 366 (24 fatal); 2024 → 380 (30 fatal); 145 of 2024’s 380 happened between 10 p.m. and 3 a.m. Sources: Utah Highway Safety Office problem ID (FY24); [NHTSA](#).

Pull Salt Lake County’s crashes

From the source — [UDOT crash service \(the same data as the dashboard, readable without a login\)](#): one layer per year (2023 = 12, 2024 = 13, 2025 = 14). Columns include COUNTY_NAME (“SALT LAKE”), CRASH_DATETIME, DUI (Y/N — this is the impaired flag; there is no separate alcohol column), NUMBER_FATALITIES. **Pulled 2026-09-20 — Salt Lake County, DUI = Y: 2023 → 366 crashes, 24 with a death; 2024 → 380 crashes, 30 with a death; 2025 → 184 through Aug 5 (partial). Of 2024’s 380, 87 happened between midnight and 3 a.m. and 58 between 10 p.m. and midnight — 145 of 380, about 38%, in the five closing-time hours.** All Salt Lake County crashes in 2023: 22,733; statewide DUI crashes 2023: 985. The count query that worked: [2024, DUI, Salt Lake](#) — change /13/ to /12/ for 2023. A crash counts only if someone was hurt or killed or damage was \$2,500 or more. Free one-on-one help with the state’s dashboards: Barbrea Freeman, Traffic Records, 801-783-7250, bafreeman@utah.gov ([UHSO crash data](#)). The day-of-week cut (Fri-Sun) is the one thing left to do by hand from the export.

List every bar licence in the county by neighborhood

From the source — [Utah DABS — licence information](#): the live licensee list is a [Google Looker Studio report](#) (“Current UDABS Licenses”) — open it in a browser and export. An older PDF version shows the columns: licence, DBA name, address, city, zip, county, phone; bar licences carry the codes **CL** and **LB** (“bar establishment”). Bar licences run July 1–June 30. DABS front desk 801-977-6800, 1625 S 900 W, Salt Lake City.

Email the Highway Safety Office one question

From the source — [Utah Highway Safety Office — about / contact](#): 4499 S 2700 W, Building 3, 2nd floor, Taylorsville 84129; 801-965-4400, Mon–Fri 8–5. The office runs 47 grants on \$4,708,208 of federal money this plan year. For data: Barbrea Freeman, 801-783-7250, bafreeman@utah.gov. For media: Jason Mettmann, 801-664-7899. Staff list: [contact page](#).

Turn the reply into a one-page measurement agreement

From the source — [UHSO grant guide 2026](#): an application must carry 3–5 years of crash data, SMART goals, and an evaluation plan — which is exactly what this one page is. Write it in their shape and the grant application later is a copy.

D · The building — JOSHUA Holdings buys 7045 S 300 E, Midvale

Size (from the public record, 2026-09-20): “7045 S 300 E” is **six twin-home units on six lots**, built 2022, owned by **LEVEL 12 LLC** (PO Box 848, Draper), about 22,600 sq ft with twelve garage stalls, county value about **\$4.79 million** for all six (\$756,700 for the 7045 unit alone). **They are for sale now — listed July 29, 2026 at \$5,899,900, all six rented, about \$26,000 a month in rent.** The complex, solar-roofed and battery-banked, is the depot for a county fleet; its yardstick is **money earned per garage bay per night**. Three things the record changes: the owner’s answer to step 30 is already “yes, \$5.9 million”; the units are taxed as single-family homes, so a depot or a detox tenant needs Midvale’s zoning answer first (step 74); and a government-backed 504 loan can’t buy rented homes (step 33), so the realistic first buy is **one unit** (the earlier single-unit ask was \$749,900) or a seller-carry deal on more.

Find the owner’s name on the county’s public record and ask: will you sell, and for how much?

From the source — [Salt Lake County Assessor and parcel records \(public record\)](#): “7045 S 300 E” is **six separate lots, not one parcel — the “MID 6 TWIN HOMES” subdivision**: 22-30-201-030 (7029), -031 (7033), -032 (7037),

-033 (7049), -034 (7045), -035 (7041). **Owner of record on all six: LEVEL 12 LLC, PO Box 848, Draper UT 84020.** Last deed: Recorder entry 14137257. Built 2022, stucco, two stories with finished basement, a 524 sq ft garage per unit. Sizes: four units 3,260 sq ft; 7037 is 5,364; 7041 is 4,212 — about 22,600 sq ft in all. 2026 market value of the 7045 unit: \$756,700 (taxable \$416,185); 2025 values for the six together about \$4.79 million. **Taxed as single-family homes (type 111), zone code 1204.** [County parcel data, machine-readable](#). Secondary, not public record — [Redfin](#): **all six units listed for sale July 29, 2026 at \$5,899,900** (MLS 2175067, KW Westfield), all rented — four at about \$4,000 a month, two at about \$5,000, twelve garage stalls; an earlier 2026 listing of one unit at \$749,900 was removed. So the answer to “will you sell” is already public: yes, and the ask is \$5.9 million for all six. The call is to the listing agent.

Call Mountain West Small Business Finance

From the source — [Mountain West Small Business Finance](#): bank 50% first lien, Mountain West 40% (the SBA 504 piece), borrower 10%. Down payment rises to 15% if the business is under two years old **or** the building is special-purpose, 20% if both. Land or building you already own can count as the down payment. 10-, 20- or 25-year fixed; rates shown September 2026: 6.54% (25-yr), 6.53% (20-yr), 6.60% (10-yr). [Apply online](#) plus four PDFs (504 application, personal history, personal financial statement, company history). 801-474-3232, needhelp@mwsbf.com, 2595 E 3300 S, Salt Lake City. **Read with step 33: a 504 cannot buy rental homes — see below.**

Call the bank they name

From the source — [SBA — 504 loans](#): up to \$5.5 million; the borrower must be an operating, for-profit business; **cannot be used for passive or speculative activity, for nonprofits, or for investment in rental real estate**; no working capital. Buy, build or fix buildings and land; long-life equipment. 10/20/25-year terms; fees about 3%, can be financed. Apply only through a CDC ([list](#)). The 51%-occupancy rule for an existing building lives in SBA’s rules (13 CFR 120.131), not on this page. **What this means for six rented twin homes: as long as they are rented homes, the 504 door is shut. It opens only if JOSHUA converts and occupies more than half the square footage as its own business (depot, dispatch, bays) — which needs Midvale’s zoning change first (step 74).** Otherwise the building is bought as an investment property: a commercial bank loan at 25–35% down, or seller carry.

Call the two Utah community lenders as backup

From the source — [Utah Microloan Fund · Utah Small Business Loan Fund](#): Microloan Fund: up to \$50,000 (start-ups up to \$25,000 in year one), fixed 10–14%, up to six years, no prepayment penalty, **will not fund real estate or building purchases**; Tuesday 9 a.m. virtual orientation, online application with a business plan and cash flow, \$50 fee, 30-minute pitch, closes in about a week; 801-746-1180. [USBLF](#): \$50,000–\$250,000, up to seven years, 1.5% origination, **not real estate, not pre-revenue**; 801-412-3784, same building as Mountain West. **So these two are for the cars, chargers and cash — not the building.**

Write the offer on the state-approved purchase contract,

From the source — [Utah Division of Real Estate — state-approved forms](#): the forms: Real Estate Purchase Contract (REPC), FHA/VA addendum (not used), **Seller Financing Addendum**, Blank Addendum, Title Company Earnest Money Addendum, Assumption Addendum, Buyer Financial Information Sheet (goes with seller financing), lead-paint disclosure, All-Inclusive Trust Deed and Note. There is no state commercial contract — and since the six units are taxed as single-family homes, the REPC is the right form. The 2027 REPC (approved Aug 19, 2026, required Jan 1, 2027) isn’t on the page yet; confirm with DRE, 801-530-6747.

Measure the three depot numbers

From the source — [Salt Lake County parcel layer](#): fields include total_sq_ft, abv_grnd_sf, year_built, num_housing_units, own_name, total_full_mkt, last_vesting, parcel_acres. The numbers are already in step 30: ~22,600 sq ft in six units, 524 sq ft garage each (twelve stalls per the listing), lots 0.09–0.10 acre each. Map: [parcel viewer](#); rooftops: [building footprints](#); downloadable CSV: [state parcel copy](#). What’s still yours to get: the electrical service size — photograph the panel and ask Rocky Mountain Power.

E · The first car — Andrea buys it for JOSHUA Holdings

Size: one car at one bar door costs about **\$41 a night** to run; three cars covering a county for a year is about **\$45,000** — which is why \$50,000 is the exact size of a county pilot, not a coincidence. Her money is the first car; it is never the building.

Pick the car for the job

From the source — [Utah Code 41-26 — self-driving cars](#): a Level 4 or 5 car may drive with no human aboard if the system can follow Utah traffic law, meets federal safety standards, and can pull itself to a safe stop if it fails. The driving system is legally the “operator” and needs no licence (amended May 2026). The car is titled, registered and insured like any car — no special state permit. **A robotaxi fleet operates under the existing for-hire rules** (step 49). Level 3 needs a licensed human ready to take over.

Buy and title the car

From the source — [Utah DMV — commercial vehicles](#): a sedan is “commercial” by use, not weight. Title with form TC-656 (every owner shows government ID); first Utah title needs a VIN inspection (TC-661) unless bought new from a Utah dealer; safety and emissions certificates if required; renew yearly. Fees aren’t on the page — use the [DMV fee estimator](#) or call 801-297-7780; Salt Lake County adds a \$10 corridor fee and a \$3 air fee.

Buy commercial for-hire insurance in JOSHUA’s name

From the source — [insurance minimums — state and city](#): Utah’s floor for any car is \$30,000 per person / \$65,000 per crash / \$25,000 property. The state sets no separate for-hire number — **Salt Lake City does:** its ground-transportation code (5.71.140) requires the federal motor-carrier level, **\$1.5 million per vehicle** for 15 seats or fewer, with the city named as additional insured ([SLC code](#)). UDOT’s private-carrier rule is \$750,000. **Plan on a \$1.5 million commercial policy; get the quote before the car.**

Ask Midvale and Salt Lake City licensing what a for-hire car service needs

From the source — [Utah Consumer Protection — TNC rule · Salt Lake City ground transportation](#): a TNC is an app company that matches riders to drivers **and does not own, control, operate or manage the cars** — so a company that owns its cars is not a TNC and doesn’t pay the \$5,000 TNC registration. What applies instead: **Salt Lake City licenses every car-for-hire business through its Department of Airports Ground Transportation office, even if the car never goes to the airport** ([operating requirements](#)): city business licence, register each car, each driver gets a badge (fingerprint check, good two years), yearly Utah safety inspection, company name in 2-inch letters on both sides, fleet number on the rear window; company and vehicle registration are free, a lost tag is \$500. GT office 801-908-7204, SLCAirportGT@slc.gov. A car based in Midvale that picks up in Salt Lake City needs this; Midvale’s own answer is still step 49’s phone call.

Put a Starlink Mini on the roof the day the car exists

From the source — [Starlink — Roam plans](#): Roam 100 GB \$55/month, 300 GB \$80, Unlimited \$175 (as of Sept 2026); in-motion use allowed in select areas; slow-but-unlimited data after the cap; month-to-month, 30-day trial. The Mini kit (router built in, 15 m DC cable) is about \$199 plus \$20 shipping — that price is from a news report, not Starlink’s page, so confirm at checkout.

F · Government money — in the order the doors open

Size: federal drunk-driving money in Utah, 2026 plan: **~\$1.9 million across eight projects, \$50,000-\$495,000 each**, and the same federal program exists in every state with its own office. Nonprofits can apply. Everything else on this list is closed, rural-only, or for-profit-only — marked so she can see it was checked.

Utah Highway Safety Office grant

From the source — [UHSO — GEARS and the 2026 guide](#): **the FY27 window opened Jan 21, 2026 and closed March 4, 2026 — it’s over for this year; the next window (FY28, Oct 2027-Sept 2028) should open around February 2027.** Who can apply: public agencies and **nonprofits with a UEI**. Register at [gearsigx.utah.gov](#), wait for the approval email, then open a grant under My Opportunities; **talk to a Program Manager before you open one** — Patty Trujillo, 801-965-4400. From the [2026 guide](#): no match required; apply Feb-March, finalize by May, awards September, grant runs Oct 1-Sept 30; the application needs 3-5 years of crash data, SMART goals and an evaluation plan; equipment over \$10,000 needs NHTSA pre-approval and **vehicles are not on the allowable list** (radars, speed trailers are); unallowable: facilities, giveaways, entertainment, sales tax, legal fees, commercial drivers, anything not in the application; reimbursement only, with invoices, quarterly reports. From the [FAQ](#): pick Community Traffic Safety Programs if the project spans areas. **Plainly: this grant pays for the program — the measurement, the media, the coordinator, the outreach — not the cars. The cars are JOSHUA’s and Andrea’s. And in the 2026 plan every impaired-driving subgrantee is a state agency; a nonprofit here would be a first, which is why step 27 (the signed yardstick) comes before the application.**

Federal SMART grant — closed. Skip it

From the source — [USDOT — SMART](#): closed; the 2026 appropriations act (H.R. 7148) took back \$204.9 million of unspent money; no new notices; only public agencies were ever eligible. Contact smart@dot.gov if you want it in writing.

USDA Community Facilities — rural only (towns of 20,000 or fewer)

From the source — [USDA Rural Development — Community Facilities, Utah](#): who: public bodies, community nonprofits, tribes — not companies. Where: towns of 20,000 or fewer. What: build or buy essential community facilities, **including police vehicles and public-safety equipment**; not private or commercial ventures. Loans (Apr–Sept 2026): 4.50–4.75% fixed, up to 40 years, no prepayment penalty. Grant share: up to 75% for a town of 5,000 or fewer with very low income, 55% ($\leq 12,000$), 35% ($\leq 20,000$), 15% otherwise; the rest is loan. Applications taken year-round; needs UEI and SAM registration. Utah: Karl Larsen 435-283-8004 x109; Salt Lake and Tooele counties: Molly Najarro 801-524-4329. **Map answer: West Wendover is in Nevada (4,512 people) — the Utah side is Wendover, 1,115 people (2020 Census): eligible, and in the top grant tier if the income test is met. Midvale is 36,028: not eligible.**

SBA 7(a) loan for JOSHUA’s equipment and cash

From the source — [SBA — 7\(a\) loans](#): up to \$5 million; **may buy vehicles and equipment**, working capital, real estate, refinance; for-profit operating businesses only — nonprofits are not eligible; SBA guarantees the lender 85% up to \$150,000 and 75% above; no SBA collateral requirement at \$50,000 or less; apply through a lender (Lender Match), not SBA; 800-827-5722.

Ask Utah’s economic-development office once;

From the source — [Utah Governor’s Office of Economic Opportunity](#): nothing written for a public-safety fleet. The near fits: [Rural Communities Opportunity Grant](#) — to rural towns and counties, opens Sept 14 and closes Oct 30, 2026 (a town could apply for a pharmacy or depot building); [REDI](#) — cash for new high-wage rural jobs, windows Feb/May/Aug/Nov 1–15; [Enterprise Zone tax credit](#); [Utah Rural Jobs](#) — loans to rural small businesses; [USBCI](#) — loan support through partner lenders. Rural team 801-538-8687.

G · The first three months

Size: the only number that matters after this is **the state’s number on the state’s letterhead**. It’s what the next county, the next state, and the next lender read.

H · The sky — “state satellites,” said plainly

Size: ten western states are the pin. Each one has the same federal drunk-driving pot with its own office (step 52, ten times over). The sky layer is what lets one county’s proof travel to ten states — but **you don’t build the satellites; you rent the sky that’s already there, and buy the pictures from the people who got there first**. Only one line here (step 65) is an actual satellite, and it’s a data business with a buyer, not a fleet requirement.

Buy the road first: one Starlink Mini (the car), one Starlink Business dish (the depot), and T-Mobile’s satellite-to-phone add-on for riders

From the source — [Starlink Business · T-Mobile T-Satellite](#): Business: \$349 Standard kit; Local Priority 50 GB \$55/month, 500 GB \$155, 1 TB \$280, 2 TB \$530; +50 GB for \$25; after priority data runs out, unlimited at 1 Mbps down; priority plans include a public IP, 24/7 support, in-motion use (as of Sept 2026). Car: Roam plans in step 50. Rider’s phone — [T-Satellite](#): \$10/month per line (free on some T-Mobile plans; non-customers can buy it with an unlocked phone), texting, picture messages, location sharing, text-to-911, and data **only through an approved app list** (Google Maps, WhatsApp, X and others — a ride app is not on it today); needs a clear view of the sky.

Register the depot’s own small cell in the shared band

From the source — [FCC — 3.5 GHz CBRS · 47 CFR 96.39](#): three tiers: federal users, county licences sold at auction (PAL), and General Authorized Access (GAA). **GAA is licensed-by-rule: no FCC application, no FCC fee**. Every radio must register with a Spectrum Access System before it transmits — Google and Federated Wireless are approved through Jan 2030 (also Sony, Key Bridge, RED); the SAS charges its own monthly per-radio fee. A Certified Professional Installer must install and register high-power radios and any radio mounted above 6 m. You may not interfere with the tiers above, and other GAA users may not protect you.

Buy one month of satellite pictures over the county’s bar clusters

From the source — [Planet — pricing and PlanetScope](#): self-serve Insights Flex: Starter \$1,100/year (about 200 km² of streaming per month), Professional \$5,500, Scale \$12,000 (as of Sept 2026); minimum order 1 km²; PlanetScope images nearly all land daily at about 3 m per pixel. **Two things that change this step: self-serve plans only give imagery 30 days old or older (next-day needs a sales contract), and PlanetScope shoots in daylight — it cannot count cars in a lot at 12:45 a.m.** So the satellite buys you the lot sizes and the daytime baseline for every bar cluster; **the night count comes from the car's own log and a phone in the lot**, which is what step 51 and step 58 already produce. Episode 5 is still the count — the sensor is the car.

A satellite of your own — go only with a buyer signed first

From the source — [SpaceX rideshare · FCC small-satellite licence](#): \$350,000 for a 50 kg slot to sun-synchronous orbit, \$7,000 per kg above that; 50 kg is the minimum you pay for; plates at 50/100/200/300 kg; SSO flights about every four months; payload arrives 30 days before launch; if you slip, the money moves to a later flight minus 5–10% (as of Sept 2026). [FCC small-satellite process](#): \$2,555 application fee per call sign; ten or fewer satellites under 180 kg each; six-year term including de-orbit; below 600 km or carry propulsion; Form 312 + Schedule S; questions satinfo@fcc.gov; “generally shorter” than a standard review, no fixed number of days.

J · The other three doors — detox, elderly care, medicine — the Tesla-enabled core of JOSHUA

Size — detox: Utah lost **617 people to overdoses in 2024 and 601 in 2025** (state health department). Utah made **10,412 DUI arrests in 2022**, and the courts send those people to treatment — the same men the closing-time car picks up. **Utah Medicaid pays for adult social detox** under a federal waiver, so a licensed operator has a payer on day one. Salt Lake County's main detox is one nonprofit (Volunteers of America); you call for a bed. The county's own page says it runs **free waiting-room groups for people who can't get into treatment “because of limited availability”** — that sentence is the bed shortage, in the county's words. A tenant with a licence and Medicaid billing is a tenant who pays rent every month. Sources: [SL County Behavioral Health](#) · [Utah DHHS overdose data](#) · [Utah Medicaid social-detox waiver](#) · [VOA Utah detox](#)

Size — elderly care: Utahns over 65 go from **one in eight today to nearly one in four by 2065**, and aging alone creates **about 150,000 new jobs** in the state (Gardner Institute, Nov 2025). Nationally, **1.8 million people on Medicare used hospice in 2024** through about 6,700 providers, and home health cost **\$169 billion**. Every one of those people has a ride problem and a medicine problem — the last ten yards. Sources: [Gardner projections](#) · [MedPAC hospice 2026](#)

Size — medicine (pharmadash): Utah law already allows a **“branch pharmacy”** in a rural or underserved town — a small stocked room, run and supervised by a full pharmacy somewhere else. That is the legal shape of a pharmacy node with a van behind it, and it exists today. The Semi is the backbone, the van is the last mile, the robot is the last ten yards. Source: [Utah pharmacy laws \(DOPL\)](#)

Size — the Tesla layer, said plainly: Utah has allowed self-driving cars on its roads by law since 2019 ([Utah Code 41-26](#)). Robotaxi = the closing-time ride and the appointment ride. Robovan = the wheelchair van and the group ride from the care home. Semi = the medicine backbone. Solar roof + battery = a building whose power never goes out, which a licensed facility is required to have anyway. Tesla robot = the hands at the bedside — **aspirational; not on any line below with a dollar on it.**

I · Parallel — already staged, your hand
