Advanced Clinical in Secondary Education

Armored Drill

8 concepts · 12 items · 4 transfer items

What this is. Every concept in this course's public description, re-asked with more disguise than a practice test uses. Each stem carries facts that do not decide it. Every wrong answer is a named trap.

Source. Scope from the course's public description in the WGU Institutional Catalog (September 2026); items written from the field's standard body of knowledge. No WGU assessment item, course material or proprietary content is used or reproduced. Not affiliated with or endorsed by Western Governors University.

Method © 2026 Erik Daniel Lindquist — Course Mastery Coach, armored drill. Items drafted with AI assistance under his direction.

How to run it

Paper first. Pencil. One pass, no notes, a timer if you want the pressure.

1. **Before you read the options**, fill the strip under the item: the target word (what is actually being asked), and the one fact in the stem that decides it.
2. **Principle before arithmetic**. Name the rule, then compute.
3. **Camouflage**. Most of every stem does not matter. Ask: which single fact decides this?
4. **Inverse pairs are the bait**. If two options are opposites, one of them is the trap built for you.
5. **Mark sure, unsure or guess** honestly. Sure-and-wrong is the most valuable miss on the page — it is a wrong mental model.
6. **Absolutes** (always, never, guarantee) are usually wrong. And recognizing an answer is not the same as owning it.
7. Items with a **heavy black bar** on the left are **transfer items**: the same principle, reversed or solved for a different variable.
8. Stop at the STOP page. Then grade, fill the triage grid, and tally the traps you fell for. The biggest tally is what you drill next.

The strip, filled in, looks like this:

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	_____	

Items

1.

A ninth-grade physical science teacher plans a lesson on friction. The school just bought new ramps and toy cars, and the class has 28 students. Following the 5E model, what should happen right after the Engage hook?

- A. Students test cars on different surfaces and record what they notice.
- B. Split the 28 students into groups of seven to save ramps.
- C. The teacher lectures on the definition of friction.
- D. A quiz on friction formulas.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

2. [TRANSFER — reversed stem / different variable]

A teacher has just led a class discussion defining vocabulary and the science behind what students saw in their lab. In the 5E model, what comes next?

- A. Elaborate — students apply the idea to a new situation.
- B. Explore.
- C. Engage.
- D. Stop the lesson, since the idea has been explained.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

3.

In an eleventh-grade history class, groups make one poster on a Supreme Court case. In most groups one student does nearly all the work. The posters look professional, and the class uses a new printer. What change best fixes the problem?

- A. Grade the poster only, since it looks good.
- B. Give each member a needed role and a piece of the content, and give each a short individual check.
- C. Print the posters in color.
- D. Let groups pick their own members.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

4.

An eighth-grade science text on ecosystems uses the words “the,” “analyze,” “significant,” and “photosynthesis.” The text came from an online library and has glossy photos. The teacher can pre-teach one word that students will meet across many subjects. Which one?

- A. “Analyze”
- B. “Photosynthesis”
- C. “The”
- D. “Glossy”

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

5. [TRANSFER — reversed stem / different variable]

A biology teacher plans to teach “mitochondria” as part of a unit on cells. What tier is it, and when should it be taught?

- A. Tier 1, no teaching needed.
- B. Tier 2, pre-taught across all subjects.
- C. Tier 3, never taught directly.
- D. Tier 3, taught within the content lesson where it is needed.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

6.

A tenth-grade English teacher wants students to know exactly which parts of their argument essay — claim, evidence, reasoning, and conventions — need work. She grades 120 essays and teaches in a room with a view of the football field. Which rubric fits her goal?

- A. A holistic rubric, which shows the weakest part.
- B. No rubric, just a letter grade.
- C. A holistic rubric, since she has 120 essays.
- D. An analytic rubric scoring each criterion separately.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

7. [TRANSFER — reversed stem / different variable]

A teacher needs to quickly place 200 writing samples into four overall levels for a school-wide screening. Which rubric type fits?

- A.** Always analytic, because it is always better.
- B.** A holistic rubric.
- C.** A checklist of every grammar rule.
- D.** An analytic rubric.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

8.

A ninth-grade algebra class in a neighborhood where many families run small food businesses is starting linear functions. The school recently switched to block scheduling. Which plan is most culturally responsive?

- A.** Use easier problems so all students feel comfortable.
- B.** Put up a poster about food from different cultures.
- C.** Have students model costs and profits for a food stand using linear equations, drawing on what they know from home.
- D.** Use the longer block to do more worksheets.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

9.

Two twelfth graders argued, and one knocked the other's laptop to the floor, cracking the screen. The school has a new restorative practices poster and a large student council. What is a restorative response?

- A.** Ask the student council to vote on the outcome.
- B.** No consequence, since restorative means forgiveness.
- C.** Suspend the student with no discussion.
- D.** Meet with the students to discuss what happened, who was harmed, and how to repair it, such as a plan to cover the damage.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

10.

Three tenth-grade biology teachers gave the same unit test. On the genetics standard, Teacher A's students averaged 82%, Teacher B's 61%, and Teacher C's 64%. Teacher A has the newest classroom. What is the best PLC use of these results?

- A.** Credit the newer classroom for the higher score.
- B.** Drop the genetics standard since two classes did poorly.
- C.** Have Teacher A share how she taught genetics and plan reteaching together for students who missed it.
- D.** Rank the teachers by average and report it.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

11.

Midway through a ninth-grade lesson on theme, a candidate sees blank faces after her example, so she switches to a short song lyric students know and asks again. The lesson was in the school's oldest wing. What kind of reflection did she use?

- A.** Summative assessment.
- B.** No reflection, because nothing was written down.
- C.** Reflection-in-action.
- D.** Reflection-on-action.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

12. [TRANSFER — reversed stem / different variable]

After school, a candidate watches her lesson video, notes that only 5 of 28 students spoke, and plans a partner-talk routine. What kind of reflection is this?

- A.** Formative assessment of students.
- B.** Reflection-on-action.
- C.** Reflection-in-action, because she used data.
- D.** Reflection-in-action.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

STOP

Answers and dissection follow. Finish every item and every strip first.

Key and dissection

Struck-through text is the camouflage: facts that do not decide the item.

1. Answer A Concept 1

A ninth-grade physical science teacher plans a lesson on friction. ~~The school just bought new ramps and toy cars, and the class has 28 students.~~ Following the 5E model, what should happen right after the Engage hook?

Target word: step after Engage **Decides:** Explore precedes Explain.

A	Correct	Students explore before the formal explanation.
B	Camouflage	Answers the class-size detail, not the sequence.
C	Inverted operation	Puts Explain before Explore.
D	Adjacent category	Evaluate comes last.

2. Answer A Concept 1 • transfer

A teacher has just led a class discussion defining vocabulary and the science behind what students saw in their lab. In the 5E model, what comes next?

Target word: reverse: step after Explain **Decides:** Elaborate follows Explain.

A	Correct	After Explain, students extend the concept.
B	Inverted operation	Explore comes before Explain.
C	Confusion set	The hook comes first.
D	Dropped element	Drops Elaborate and Evaluate.

3. Answer B Concept 2

In an eleventh-grade history class, groups make one poster on a Supreme Court case. In most groups one student does nearly all the work. ~~The posters look professional, and the class uses a new printer.~~ What change best fixes the problem?

Target word: fix unequal group work **Decides:** No interdependence or individual accountability.

A	Dropped element	Drops individual accountability.
B	Correct	Positive interdependence and individual accountability make group work cooperative.
C	Camouflage	Answers the printer detail.
D	Adjacent category	Friends grouping does not create accountability.

4. Answer A Concept 3

An eighth-grade science text on ecosystems uses the words “the,” “analyze,” “significant,” and “photosynthesis.” ~~The text came from an online library and has glossy photos.~~ The teacher can pre-teach one word that students will meet across many subjects. Which one?

Target word: best Tier 2 word **Decides:** Cross-subject academic word.

A	Correct	A Tier 2 word used in many subjects, with high payoff.
B	Confusion set	Tier 3, subject-specific; taught with the content.
C	Inverted operation	A Tier 1 everyday word students already know.
D	Camouflage	Answers the photo detail; not in the text list.

5. Answer D Concept 3 · transfer

A biology teacher plans to teach “mitochondria” as part of a unit on cells. What tier is it, and when should it be taught?

Target word: reverse: place a Tier 3 word **Decides:** Subject-specific term.

A	Inverted operation	Students do not know it from daily life.
B	Confusion set	It is specific to biology, not general academic.
C	Absolute language	Tier 3 words are taught, but in content context.
D	Correct	Content-specific terms are taught in context.

6. Answer D Concept 4

A tenth-grade English teacher wants students to know exactly which parts of their argument essay — claim, evidence, reasoning, and conventions — need work. ~~She grades 120 essays and teaches in a room with a view of the football field.~~ Which rubric fits her goal?

Target word: rubric for part-by-part feedback **Decides:** Needs criterion-level feedback.

A	Confusion set	Holistic gives one overall score, not part scores.
B	Dropped element	Drops criteria altogether.
C	Camouflage	Answers the workload detail; holistic hides which part is weak.
D	Correct	Separate scores show students which parts to fix.

7. Answer B Concept 4 · transfer

A teacher needs to quickly place 200 writing samples into four overall levels for a school-wide screening. Which rubric type fits?

Target word: reverse: when holistic fits **Decides:** Fast overall judgment.

A	Absolute language	Each type fits a different purpose.
B	Correct	One overall score is faster for large-scale sorting.
C	Adjacent category	A checklist does not give overall levels.
D	Inverted operation	Detailed scoring slows sorting and is not needed here.

8. Answer C Concept 5

A ninth-grade algebra class in a neighborhood where many families run small food businesses is starting linear functions. ~~The school recently switched to block scheduling.~~ Which plan is most culturally responsive?

Target word: funds-of-knowledge lesson **Decides:** Connect content to students’ community knowledge with rigor.

A	Inverted operation	Lowers expectations instead of connecting.
B	Adjacent category	A surface display with no connection to learning.
C	Correct	Uses students’ real knowledge while keeping the math rigorous.
D	Camouflage	Answers the schedule detail.

9. Answer D Concept 6

Two twelfth graders argued, and one knocked the other's laptop to the floor, cracking the screen. ~~The school has a new restorative practices poster and a large student council.~~ What is a restorative response?

Target word: restorative response **Decides:** Accountability plus repair.

A	Camouflage	Answers the council detail; not a restorative process.
B	Absolute language	Restorative practice includes accountability.
C	Inverted operation	Punishment only, with no repair.
D	Correct	Restorative work keeps accountability and repairs harm.

10. Answer C Concept 7

Three tenth-grade biology teachers gave the same unit test. On the genetics standard, Teacher A's students averaged 82%, Teacher B's 61%, and Teacher C's 64%. ~~Teacher A has the newest classroom.~~ What is the best PLC use of these results?

Target word: use of common data **Decides:** Compare by standard to learn which practice worked.

A	Camouflage	Answers the room detail.
B	Inverted operation	Removes the standard rather than improving teaching.
C	Correct	Common data by standard reveal effective practices to share.
D	Adjacent category	Ranking is evaluation, not collaborative improvement.

11. Answer C Concept 8

Midway through a ninth-grade lesson on theme, a candidate sees blank faces after her example, so she switches to a short song lyric students know and asks again. ~~The lesson was in the school's oldest wing.~~ What kind of reflection did she use?

Target word: type of reflection **Decides:** She adjusted during the lesson.

A	Adjacent category	An assessment type, not reflection.
B	Absolute language	Reflection does not require writing.
C	Correct	She read the situation and changed course in the moment.
D	Confusion set	That happens after the lesson.

12. Answer B Concept 8 · transfer

After school, a candidate watches her lesson video, notes that only 5 of 28 students spoke, and plans a partner-talk routine. What kind of reflection is this?

Target word: reverse: identify on-action **Decides:** Analysis after the lesson.

A	Adjacent category	She is analyzing her teaching, not assessing students.
B	Correct	She analyzes after the lesson to plan changes.
C	Confusion set	Using data does not change the timing.
D	Inverted operation	That happens during the lesson.

Triage grid

Write each item number in the box it belongs to.

	Right	Wrong
Sure	Owled.	Concept inversion — top priority. A wrong mental model; it survives rewording.
Unsure / guess	Recognition, not mastery. Re-drill with the transfer.	Not learned yet.

Trap tally

For every miss, find the letter you chose in the key and tally its trap. The biggest number is the pattern to drill.

Trap	What it does	In this drill	Your misses
Dropped element	Leaves out a required term or step.	3	
Wrong stem number	A figure copied from the prompt that is not the answer.	0	
Adjacent category	The right idea in the wrong bucket.	7	
Inverted operation	Direction flipped: add/subtract, cause/effect, higher/lower.	9	
Absolute language	Always, never, guarantee — where judgment applies.	4	
Confusion set	Every option is real; the test is exact role-matching.	6	
Camouflage	Answers a stem fact that was never the question.	7	

Anchor rows — the concept list

One row per concept: the rule to lock in, the trap that catches people, and the tell in the question that signals it.

#	Concept	Rule	Trap	Tell
1	The 5E inquiry model	Engage, Explore, Explain, Elaborate, Evaluate — students explore a phenomenon before the teacher formally explains it.	Lecturing the explanation first and then doing the activity as confirmation.	The order of activities in an inquiry lesson.
2	Cooperative learning essentials	Group work is cooperative when it has positive interdependence (each member is needed) and individual accountability (each is responsible for learning).	Putting students in groups with one shared product and assuming they all learn.	One student does the work while others watch.
3	Tiered vocabulary	Tier 2 words (general academic words like analyze, significant, contrast) appear across subjects and are the highest-payoff words to teach directly; Tier 3 words are subject-specific and taught with the content.	Spending most vocabulary time on everyday Tier 1 words or rare terms.	Choosing which words from a text to pre-teach.
4	Analytic vs. holistic rubrics	An analytic rubric scores each criterion separately and gives specific feedback; a holistic rubric gives one overall score and is faster but less diagnostic.	Thinking a holistic rubric shows students which part to fix.	The purpose is feedback on parts vs. a quick overall judgment.
5	Culturally responsive teaching: funds of knowledge	Connect content to the knowledge, skills, and experiences students bring from their homes and communities while keeping high expectations.	Treating culturally responsive teaching as holiday displays or lowering rigor.	Planning a lesson to connect with students' lives.
6	Restorative conversations	After harm, a restorative conversation asks what happened, who was affected, and how to make it right, keeping the student accountable and the relationship intact.	Thinking restorative means no consequences, or using only punishment with no repair.	A conflict between students or with the teacher.
7	PLC use of common assessment data	Teachers who give a common assessment compare results by standard to find which practices worked and plan reteaching together.	Comparing overall averages to rank teachers.	Several teachers with results on the same test.
8	Reflection-in-action vs. reflection-on-action	Reflection-in-action is adjusting during the lesson in response to what is happening; reflection-on-action is analyzing afterward to plan changes.	Thinking reflection only happens after the lesson.	The moment the teacher thinks and adjusts: during or after.

Course scope (public description): Advanced Clinical provides aspiring educators with real-world classroom experience. This course emphasizes the importance of hands-on learning, offering candidates the unique opportunity to observe and participate in classroom environments under the guidance of experienced mentors. The curriculum includes demonstrating reflective practice, classroom engagement techniques, instructional strategies, and effective communication skills with students and colleagues through a pedagogical performance assessment. Through this immersive experience, candidates not only observe the daily responsibilities of a teacher, but also start to develop their own teaching style and philosophy, laying a solid foundation for their future careers in education. This course is taken immediately prior to Student Teaching I as part of an engaging and intensive clinical experience.
