Community Relations and Leadership

Armored Drill

8 concepts · 12 items · 4 transfer items

What this is. Every concept in this course's public description, re-asked with more disguise than a practice test uses. Each stem carries facts that do not decide it. Every wrong answer is a named trap.

Source. Scope from the course's public description in the WGU Institutional Catalog (September 2026); items written from the field's standard body of knowledge. No WGU assessment item, course material or proprietary content is used or reproduced. Not affiliated with or endorsed by Western Governors University.

Method © 2026 Erik Daniel Lindquist — Course Mastery Coach, armored drill. Items drafted with AI assistance under his direction.

How to run it

Paper first. Pencil. One pass, no notes, a timer if you want the pressure.

1. **Before you read the options**, fill the strip under the item: the target word (what is actually being asked), and the one fact in the stem that decides it.
2. **Principle before arithmetic**. Name the rule, then compute.
3. **Camouflage**. Most of every stem does not matter. Ask: which single fact decides this?
4. **Inverse pairs are the bait**. If two options are opposites, one of them is the trap built for you.
5. **Mark sure, unsure or guess** honestly. Sure-and-wrong is the most valuable miss on the page — it is a wrong mental model.
6. **Absolutes** (always, never, guarantee) are usually wrong. And recognizing an answer is not the same as owning it.
7. Items with a **heavy black bar** on the left are **transfer items**: the same principle, reversed or solved for a different variable.
8. Stop at the STOP page. Then grade, fill the triage grid, and tally the traps you fell for. The biggest tally is what you drill next.

The strip, filled in, looks like this:

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	_____	

Items

1.

A 300-bed nonprofit hospital with a new cancer center completed its community health needs assessment four years ago and has not updated it. The board chair is a retired banker. What is true?

- A. It is fine; a CHNA is a one-time report.
- B. It is optional for hospitals with specialty centers.
- C. It is overdue, and it can be done with no community input.
- D. It is overdue; CHNAs must be done at least every three years with community input and an implementation strategy.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

2.

A coalition runs focus groups with parents at five elementary schools about barriers to pediatric dental care. It also pulls census data on income. The coalition's logo was designed by a student. Which data are primary?

- A. Neither; only surveys count as primary.
- B. The focus group findings.
- C. Both, since the coalition analyzed them.
- D. The census data.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

3. [TRANSFER — reversed stem / different variable]

Which source is secondary data for a community health assessment?

- A. A community forum held by the team.
- B. Interviews with church leaders.
- C. State vital statistics on births and deaths.
- D. A new resident survey.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

4.

A team scores three needs from 1-5 on size (weight 2), seriousness (weight 3), and feasibility (weight 1). Obesity: 5, 2, 4. Mental health access: 3, 4, 3. Opioid overdose: 1, 5, 2. Opioid overdose has had heavy local media coverage. Which need ranks highest?

- A. Obesity
- B. Mental health access
- C. All three tie.
- D. Opioid overdose

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

5.

A county commissioner controls funding for a new clinic but shows little interest in it. She has served three terms and chairs a finance committee. How should the project leader engage her?

- A. Keep her satisfied with concise updates and attention to her concerns.
- B. Only monitor her.
- C. Manage closely with weekly meetings.
- D. Keep her informed like community members.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

6. [TRANSFER — reversed stem / different variable]

A neighborhood group is very concerned about a new health center but has little formal power. What strategy fits?

- A. Manage closely.
- B. Ignore them because they lack power.
- C. Keep them informed.
- D. Keep satisfied.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

7.

Five agencies each run separate programs to reduce teen pregnancy, with different goals and data. Results are flat. One agency has a large new building. What would a collective impact approach add first?

- A. Shared data only.
- B. More separate programs.
- C. Move all programs to the new building.
- D. A common agenda and shared measurement, supported by a backbone organization.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

8.

A new director of a community health nonprofit shares a vision of health equity, mentors staff, and encourages new ideas. She drives an electric car. Which leadership style is this?

- A. Autocratic
- B. Laissez-faire
- C. Transactional
- D. Transformational

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

9. [TRANSFER — reversed stem / different variable]

A manager motivates outreach staff mainly by paying bonuses for meeting enrollment quotas and correcting missed targets. Which style is this?

- A. Laissez-faire
- B. Transformational
- C. Transactional
- D. Servant

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

10.

A hospital wants to launch a community paramedic program. Staff are comfortable with current practices. The hospital has a new CFO. What should the leader do first?

- A. Create urgency by sharing data on unmet needs and readmissions.
- B. Write the vision alone and announce it.
- C. Launch the program immediately.
- D. Have the new CFO decide.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

11.

A program held 24 nutrition classes for 300 residents. It aims to raise fruit and vegetable intake. It has a vibrant logo. Which is an outcome?

- A.** The share of participants eating five servings a day, up from 20% to 35%.
- B.** 300 residents attended.
- C.** Grant funds received.
- D.** 24 classes held.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

12. [TRANSFER — reversed stem / different variable]

In a logic model, which item is an output?

- A.** Lower community flu deaths over ten years.
- B.** 500 flu shots given.
- C.** Two nurses hired.
- D.** Flu hospitalizations fell 10%.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

STOP

Answers and dissection follow. Finish every item and every strip first.

Key and dissection

Struck-through text is the camouflage: facts that do not decide the item.

1. Answer D Concept 1

A 300-bed nonprofit hospital ~~with a new cancer center~~ completed its community health needs assessment four years ago and has not updated it. ~~The board chair is a retired banker.~~ What is true?

Target word: CHNA requirement **Decides:** Must be done every three years.

A	Inverted operation	It repeats every three years.
B	Camouflage	The cancer center doesn't matter.
C	Dropped element	Leaves out required input.
D	Correct	ACA requirement for nonprofit hospitals.

2. Answer B Concept 2

A coalition runs focus groups with parents at five elementary schools about barriers to pediatric dental care. It also pulls census data on income. ~~The coalition's logo was designed by a student.~~ Which data are primary?

Target word: classify data **Decides:** First-hand collection.

A	Adjacent category	Focus groups are primary.
B	Correct	Collected first-hand.
C	Absolute language	Analysis doesn't make data primary.
D	Inverted operation	Existing data are secondary.

3. Answer C Concept 2 • transfer

Which source is secondary data for a community health assessment?

Target word: reverse: pick secondary **Decides:** Existing data.

A	Confusion set	Primary.
B	Confusion set	Primary.
C	Correct	Already collected by others.
D	Inverted operation	Primary.

4. Answer B Concept 3

A team scores three needs from 1-5 on size (weight 2), seriousness (weight 3), and feasibility (weight 1). Obesity: 5, 2, 4. Mental health access: 3, 4, 3. Opioid overdose: 1, 5, 2. ~~Opioid overdose has had heavy local media coverage.~~ Which need ranks highest?

Target word: weighted ranking **Decides:** Weighted totals: 20, 21, 19.

A	Dropped element	Highest raw total (11) but drops the weights; weighted total is 20.
B	Correct	$3 \times 2 + 4 \times 3 + 3 \times 1 = 21$, the highest.
C	Wrong stem number	They do not tie: 20, 21, 19.
D	Camouflage	Media attention doesn't decide; weighted total is 19.

5. Answer A Concept 4

A county commissioner controls funding for a new clinic but shows little interest in it. ~~She has served three terms and chairs a finance committee.~~ How should the project leader engage her?

Target word: engagement strategy **Decides:** High power, low interest.

A	Correct	High power, low interest.
B	Inverted operation	Low power, low interest.
C	Confusion set	For high power, high interest.
D	Adjacent category	For low power, high interest.

6. Answer C Concept 4 • transfer

A neighborhood group is very concerned about a new health center but has little formal power. What strategy fits?

Target word: reverse: from position to strategy **Decides:** Low power, high interest.

A	Confusion set	High power, high interest.
B	Absolute language	They still need information.
C	Correct	Regular communication.
D	Confusion set	High power, low interest.

7. Answer D Concept 5

Five agencies each run separate programs to reduce teen pregnancy, with different goals and data. Results are flat. ~~One agency has a large new building.~~ What would a collective impact approach add first?

Target word: collective impact **Decides:** Separate goals and data.

A	Dropped element	Leaves out the common agenda and backbone.
B	Inverted operation	Increases fragmentation.
C	Camouflage	Location isn't the issue.
D	Correct	Core conditions.

8. Answer D Concept 6

A new director of a community health nonprofit shares a vision of health equity, mentors staff, and encourages new ideas. ~~She drives an electric car.~~ Which leadership style is this?

Target word: classify style **Decides:** Vision and development.

A	Confusion set	Decides alone.
B	Adjacent category	Hands-off.
C	Inverted operation	Uses rewards and rules.
D	Correct	Inspires vision and develops people.

9. Answer C Concept 6 · transfer

A manager motivates outreach staff mainly by paying bonuses for meeting enrollment quotas and correcting missed targets. Which style is this?

Target word: reverse: from behavior to style **Decides:** Rewards and corrections.

A	Adjacent category	Hands-off.
B	Inverted operation	Inspires vision.
C	Correct	Exchange of rewards for performance.
D	Confusion set	Puts followers' growth first.

10. Answer A Concept 7

A hospital wants to launch a community paramedic program. Staff are comfortable with current practices. ~~The hospital has a new CEO.~~ What should the leader do first?

Target word: first change step **Decides:** Kotter: urgency.

A	Correct	Step one.
B	Dropped element	Leaves out urgency and coalition.
C	Inverted operation	Skips early steps.
D	Camouflage	Irrelevant.

11. Answer A Concept 8

A program held 24 nutrition classes for 300 residents. It aims to raise fruit and vegetable intake. ~~It has a vibrant logo.~~ Which is an outcome?

Target word: classify measure **Decides:** Change in behavior.

A	Correct	Change in people.
B	Confusion set	Output.
C	Adjacent category	Input.
D	Inverted operation	Output.

12. Answer B Concept 8 · transfer

In a logic model, which item is an output?

Target word: reverse: pick output **Decides:** Counts of services delivered.

A	Confusion set	Impact.
B	Correct	A count of delivered services.
C	Adjacent category	Input.
D	Inverted operation	Outcome.

Triage grid

Write each item number in the box it belongs to.

	Right	Wrong
Sure	Owled.	Concept inversion — top priority. A wrong mental model; it survives rewording.
Unsure / guess	Recognition, not mastery. Re-drill with the transfer.	Not learned yet.

Trap tally

For every miss, find the letter you chose in the key and tally its trap. The biggest number is the pattern to drill.

Trap	What it does	In this drill	Your misses
Dropped element	Leaves out a required term or step.	4	
Wrong stem number	A figure copied from the prompt that is not the answer.	1	
Adjacent category	The right idea in the wrong bucket.	6	
Inverted operation	Direction flipped: add/subtract, cause/effect, higher/lower.	10	
Absolute language	Always, never, guarantee — where judgment applies.	2	
Confusion set	Every option is real; the test is exact role-matching.	9	
Camouflage	Answers a stem fact that was never the question.	4	

Anchor rows — the concept list

One row per concept: the rule to lock in, the trap that catches people, and the tell in the question that signals it.

#	Concept	Rule	Trap	Tell
1	The CHNA requirement	Under the ACA, nonprofit hospitals must complete a community health needs assessment at least every three years, take input from people representing the community and public health, publish it, and adopt an implementation strategy.	Thinking the CHNA is optional, a one-time report, or done without community input.	A nonprofit hospital planning its needs assessment.
2	Primary vs. secondary data	Primary data are collected first-hand for this assessment (surveys, focus groups, interviews); secondary data already exist (census, vital records, hospital discharge data).	Calling a public data set primary because the team analyzed it.	The source of the information in an assessment.
3	Prioritizing needs with weighted criteria	Score each need on agreed criteria, multiply by weights, and sum; the highest weighted total ranks first, not the highest single score.	Adding raw scores and ignoring the weights, or picking the most visible issue.	A table of needs, criteria, scores, and weights.
4	Stakeholder power-interest grid	High power/high interest: manage closely; high power/low interest: keep satisfied; low power/high interest: keep informed; low power/low interest: monitor.	Giving every stakeholder the same engagement or ignoring high-power, low-interest players.	A stakeholder described by influence and level of concern.
5	Collective impact	Cross-sector change needs a common agenda, shared measurement, mutually reinforcing activities, continuous communication, and a backbone organization.	Thinking a coalition succeeds if each partner does its own program separately.	Multiple organizations working on one community problem.
6	Transformational vs. transactional leadership	Transformational leaders inspire a shared vision and develop people; transactional leaders manage through rewards, rules, and exchanges; servant leaders put followers' growth first.	Calling a leader who uses bonuses and penalties transformational.	How a leader motivates the group.
7	Leading change: urgency first	Kotter's model begins by creating a sense of urgency, then building a guiding coalition and a vision, before broad action.	Launching the program first and seeking support afterward.	The first step in a change effort.
8	Logic model: outputs vs. outcomes	Inputs → activities → outputs (counts of what was delivered) → outcomes (changes in people or conditions) → impact (long-term change).	Calling the number of classes held an outcome.	A measure to classify in an evaluation plan.

Course scope (public description): Community Relations and Leadership focuses on analyzing community health and human services' needs to create change. As emerging leaders, students will learn to engage in collaborative approaches with various stakeholders to achieve positive outcomes. This course helps students develop their abilities to interpret community health needs assessments, make decisions, and bring stakeholders together to advance access to health and human services. This course has no prerequisites.
