Digital Transformation

Armored Drill

8 concepts · 12 items · 4 transfer items

What this is. Every concept in this course's public description, re-asked with more disguise than a practice test uses. Each stem carries facts that do not decide it. Every wrong answer is a named trap.

Source. Scope from the course's public description in the WGU Institutional Catalog (September 2026); items written from the field's standard body of knowledge. No WGU assessment item, course material or proprietary content is used or reproduced. Not affiliated with or endorsed by Western Governors University.

Method © 2026 Erik Daniel Lindquist — Course Mastery Coach, armored drill. Items drafted with AI assistance under his direction.

How to run it

Paper first. Pencil. One pass, no notes, a timer if you want the pressure.

1. **Before you read the options**, fill the strip under the item: the target word (what is actually being asked), and the one fact in the stem that decides it.
2. **Principle before arithmetic**. Name the rule, then compute.
3. **Camouflage**. Most of every stem does not matter. Ask: which single fact decides this?
4. **Inverse pairs are the bait**. If two options are opposites, one of them is the trap built for you.
5. **Mark sure, unsure or guess** honestly. Sure-and-wrong is the most valuable miss on the page — it is a wrong mental model.
6. **Absolutes** (always, never, guarantee) are usually wrong. And recognizing an answer is not the same as owning it.
7. Items with a **heavy black bar** on the left are **transfer items**: the same principle, reversed or solved for a different variable.
8. Stop at the STOP page. Then grade, fill the triage grid, and tally the traps you fell for. The biggest tally is what you drill next.

The strip, filled in, looks like this:

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	_____	

Items

1.

A 70-year-old insurance company with a new downtown headquarters scans its paper claim forms into PDFs stored on a shared drive. Adjusters still review them the same way. Which term best describes this?

- A. Digital transformation
- B. Digital transformation, because the company is 70 years old.
- C. Digitalization
- D. Digitization

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

2. [TRANSFER — reversed stem / different variable]

An insurer launches usage-based policies priced from real-time driving data, sold and serviced entirely through an app. Which term fits?

- A. Digitalization
- B. IT modernization only
- C. Digitization
- D. Digital transformation

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

3.

A retailer's CIO, who spoke at a major tech conference last year, wants to buy a \$3 million AI platform because competitors have one. No business goal is attached. What should come first?

- A. Defer to the CIO's conference experience.
- B. Buy it to keep pace with competitors.
- C. Define the customer and business outcomes the platform should serve, then evaluate whether it fits.
- D. Buy a cheaper \$1 million platform instead.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

4.

A hospital rolled out a new scheduling system with a bright interface. Staff completed training and can use it well, but many keep using paper because they see no benefit to them. At which ADKAR stage is the change stalled?

- A. Knowledge
- B. Desire
- C. More training will fix it.
- D. Ability

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

5. [TRANSFER — reversed stem / different variable]

Staff are eager to use a new tool but make frequent errors on the job even after classroom training. Which ADKAR stage needs attention?

- A. Ability, through hands-on practice and coaching.
- B. Desire
- C. Reinforcement, through rewards.
- D. Awareness

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

6.

A bank plans a three-year program to rebuild its customer app, launching everything at once. The steering committee meets in a glass-walled room. Which approach best reduces risk and shows value sooner?

- A. Never release until every feature is perfect.
- B. Keep the single three-year launch but add more testers.
- C. Release in small increments, starting with the highest-value features, and adjust from user feedback.
- D. Shorten to one year with one launch.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

7.

A transformation lead must update the executive team and the call-center agents on a new CRM rollout. The CRM vendor is based in Dublin. Which approach is best?

- A. Give executives outcomes, risks, and decisions needed; give agents what changes in their day and where to get help.
- B. Send both groups the same detailed technical plan.
- C. Tell agents only after go-live.
- D. Emphasize the vendor's location.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

8. [TRANSFER — reversed stem / different variable]

A CFO asks for a transformation update. Which message best fits?

- A. "Everything is fine."
- B. "Here is how to log in to the new system."
- C. "Digital sales are up 12% against baseline; one vendor risk needs your funding decision by Friday."
- D. "We migrated 14 microservices to Kubernetes."

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

9.

A utility's 30-year-old billing system handles 2 million accounts. A consultant, whose firm has a well-known logo, proposes shutting it down and switching to a new system over one weekend. What is the lower-risk approach?

- A. Never touch the legacy system.
- B. Replace functions piece by piece while the old system keeps running, shifting traffic gradually.
- C. Do the one-weekend cutover.
- D. Cut over only the first 1 million accounts in one weekend.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

10.

A regional bank with a new mascot reports that 18,000 of its 60,000 customers now use mobile deposit, up from 9,000 a year ago. It also reports deploying 12 new systems. What is the current adoption rate, and which figure better shows progress?

- A. 30%, but the 12 systems are the better measure.
- B. 30%, and adoption (an outcome) shows progress better than systems deployed.
- C. 100%, since adoption doubled.
- D. 15%, and adoption shows progress.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

11. [TRANSFER — reversed stem / different variable]

A company wants digital-channel adoption to reach 40% of its 50,000 customers. Currently 12,000 use it. How many more customers must adopt?

- A. 8,000
- B. 20,000
- C. 4,800
- D. 38,000

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

12.

A retailer's e-commerce updates take four months because requests move from marketing to IT to a vendor to QA. The company recently opened a flagship store. Which structure change would most cut delays?

- A. Split IT into more specialized departments.
- B. Move the team into the flagship store.
- C. Add a project manager to track the handoffs.
- D. Form a durable cross-functional product team owning e-commerce end to end.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

STOP

Answers and dissection follow. Finish every item and every strip first.

Key and dissection

Struck-through text is the camouflage: facts that do not decide the item.

1. Answer D Concept 1

A 70-year-old insurance company ~~with a new downtown headquarters~~ scans its paper claim forms into PDFs stored on a shared drive. Adjusters still review them the same way. Which term best describes this?

Target word: name the change **Decides:** Only the format changed.

A	Adjacent category	Nothing about the business model or value changed.
B	Camouflage	Company age does not define the term.
C	Confusion set	Would require using digital tools to change the process.
D	Correct	Converts analog to digital without changing the process.

2. Answer D Concept 1 • transfer

An insurer launches usage-based policies priced from real-time driving data, sold and serviced entirely through an app. Which term fits?

Target word: reverse: from example to term **Decides:** New value proposition and business model.

A	Confusion set	Goes beyond improving an existing process.
B	Adjacent category	Understates a business model change.
C	Inverted operation	Far too narrow; this is not format conversion.
D	Correct	Changes how value is created and delivered.

3. Answer C Concept 2

A retailer's CIO, ~~who spoke at a major tech conference last year~~, wants to buy a \$3 million AI platform because competitors have one. No business goal is attached. What should come first?

Target word: sequencing strategy and tech **Decides:** No business objective defined.

A	Camouflage	Reputation is not a business case.
B	Inverted operation	Technology first, purpose later.
C	Correct	Transformation is strategy-led.
D	Wrong stem number	Price is not the problem; purpose is.

4. Answer B Concept 3

A hospital rolled out a new scheduling system ~~with a bright interface~~. Staff completed training and can use it well, but many keep using paper because they see no benefit to them. At which ADKAR stage is the change stalled?

Target word: ADKAR stage **Decides:** They have knowledge and ability but lack desire.

A	Confusion set	They completed training.
B	Correct	They know about and can use the system but don't want to.
C	Adjacent category	Training addresses knowledge, not desire.
D	Confusion set	They can use it well.

5. Answer A Concept 3 • transfer

Staff are eager to use a new tool but make frequent errors on the job even after classroom training. Which ADKAR stage needs attention?

Target word: different stage **Decides:** Eager but can't perform yet.

A	Correct	Knowledge is not yet ability on the job.
B	Inverted operation	They are already eager.
C	Adjacent category	Rewards sustain change once people can perform.
D	Confusion set	They know the change is happening.

6. Answer C Concept 4

A bank plans a three-year program to rebuild its customer app, launching everything at once. ~~The steering committee meets in a glass-walled room.~~ Which approach best reduces risk and shows value sooner?

Target word: delivery approach **Decides:** Big-bang delivery defers value and learning.

A	Absolute language	Delays all value.
B	Dropped element	Still big-bang.
C	Correct	Incremental delivery surfaces problems and value early.
D	Wrong stem number	Still a single launch.

7. Answer A Concept 5

A transformation lead must update the executive team and the call-center agents on a new CRM rollout. ~~The CRM vendor is based in Dublin.~~ Which approach is best?

Target word: tailored communication **Decides:** Different audiences need different content.

A	Correct	Tailors to each audience's needs.
B	Dropped element	Ignores audience needs.
C	Inverted operation	The most affected group hears last.
D	Camouflage	Irrelevant to either audience.

8. Answer C Concept 5 • transfer

A CFO asks for a transformation update. Which message best fits?

Target word: executive message **Decides:** Outcomes, risks, decisions.

A	Absolute language	No evidence or decision.
B	Confusion set	Front-line how-to content.
C	Correct	Outcome, risk, and a decision.
D	Adjacent category	Technical detail for engineers.

9. Answer B Concept 6

A utility's 30-year-old billing system handles 2 million accounts. A consultant, ~~whose firm has a well-known logo,~~ proposes shutting it down and switching to a new system over one weekend. What is the lower-risk approach?

Target word: legacy modernization approach **Decides:** Incremental replacement limits risk on a critical system.

A	Absolute language	Technical debt keeps growing.
B	Correct	Incremental replacement lets problems surface without a full outage.
C	Inverted operation	Big-bang risk on a critical system.
D	Wrong stem number	Still a large big-bang step.

10. Answer B Concept 7

A regional bank ~~with a new mascot~~ reports that 18,000 of its 60,000 customers now use mobile deposit, up from 9,000 a year ago. It also reports deploying 12 new systems. What is the current adoption rate, and which figure better shows progress?

Target word: outcome metric **Decides:** 18,000 / 60,000.

A	Adjacent category	Systems deployed are outputs.
B	Correct	$18,000 / 60,000 = 30\%$; outcomes beat outputs.
C	Confusion set	Growth rate, not adoption rate.
D	Inverted operation	Uses last year's 9,000.

11. Answer A Concept 7 · transfer

A company wants digital-channel adoption to reach 40% of its 50,000 customers. Currently 12,000 use it. How many more customers must adopt?

Target word: solve for gap **Decides:** Target 20,000 – 12,000.

A	Correct	$40\% \times 50,000 = 20,000$; $20,000 - 12,000 = 8,000$.
B	Dropped element	The target total, not the gap.
C	Wrong stem number	40% of 12,000.
D	Inverted operation	$50,000 - 12,000$, the non-users.

12. Answer D Concept 8

A retailer's e-commerce updates take four months because requests move from marketing to IT to a vendor to QA. ~~The company recently opened a flagship store.~~ Which structure change would most cut delays?

Target word: team structure **Decides:** Handoffs across silos slow delivery.

A	Inverted operation	Adds handoffs.
B	Camouflage	Location does not fix structure.
C	Dropped element	Tracks handoffs without removing them.
D	Correct	Removes handoffs between silos.

Triage grid

Write each item number in the box it belongs to.

	Right	Wrong
Sure	Owned.	Concept inversion — top priority. A wrong mental model; it survives rewording.
Unsure / guess	Recognition, not mastery. Re-drill with the transfer.	Not learned yet.

Trap tally

For every miss, find the letter you chose in the key and tally its trap. The biggest number is the pattern to drill.

Trap	What it does	In this drill	Your misses
Dropped element	Leaves out a required term or step.	4	
Wrong stem number	A figure copied from the prompt that is not the answer.	4	
Adjacent category	The right idea in the wrong bucket.	6	
Inverted operation	Direction flipped: add/subtract, cause/effect, higher/lower.	8	
Absolute language	Always, never, guarantee — where judgment applies.	3	
Confusion set	Every option is real; the test is exact role-matching.	7	
Camouflage	Answers a stem fact that was never the question.	4	

Anchor rows — the concept list

One row per concept: the rule to lock in, the trap that catches people, and the tell in the question that signals it.

#	Concept	Rule	Trap	Tell
1	Digitization, digitalization, transformation	Digitization converts analog information to digital form; digitalization uses digital tech to improve existing processes; digital transformation changes how the organization creates and delivers value.	Calling any scanning or software rollout a digital transformation.	Whether the business model or value proposition changed, or only the format or process.
2	Strategy-led, not technology-led	Transformation starts from customer and business objectives; technology is chosen to serve them.	Buying a platform first and searching for a use.	A technology purchase with no stated business outcome.
3	People and change management (ADKAR)	Individuals move through Awareness, Desire, Knowledge, Ability, and Reinforcement; resistance is addressed at the stage where it stalls.	Answering all resistance with more training.	Staff who know how to use a tool but don't want to, or vice versa.
4	Iterative, incremental delivery	Delivering in small increments with feedback reduces risk and shows value early compared with a single big-bang launch.	Waiting to launch until everything is complete.	A multi-year plan with one go-live date.
5	Tailor communication to the stakeholder	Executives need outcomes, risks, and decisions; front-line staff need what changes for them and support; technical teams need detail.	Sending the same technical update to every audience.	One message for very different audiences.
6	Modernize legacy systems incrementally	Replace legacy systems piece by piece (for example, wrapping and gradually replacing functions) to limit risk while delivering value.	A full rip-and-replace cutover of a core system in one weekend.	A critical, aging core system and a desire to modernize.
7	Measure outcomes, not activity	Transformation KPIs track customer and business outcomes (adoption, cycle time, revenue from digital channels) against a baseline.	Counting systems deployed or dollars spent as success.	A progress report full of outputs.
8	Cross-functional product teams	Durable teams with business, design, and technology skills own a product or value stream end to end, cutting handoffs.	Temporary project teams that hand work across siloed departments.	Delays caused by handoffs between departments.

Course scope (public description): Digital Transformation offers an in-depth look at integrating product management with digital innovation in the technology sector. This course covers the transformative impact of digital technologies on business, strategies for aligning product development with digital objectives, and navigating the complexities of digital adaptation. It emphasizes crucial skills in stakeholder communication and collaboration, preparing learners to effectively lead and innovate in a fast-evolving digital environment.
