Diversity, Equity, and Inclusion

Armored Drill

8 concepts · 12 items · 4 transfer items

What this is. Every concept in this course's public description, re-asked with more disguise than a practice test uses. Each stem carries facts that do not decide it. Every wrong answer is a named trap.

Source. Scope from the course's public description in the WGU Institutional Catalog (September 2026); items written from the field's standard body of knowledge. No WGU assessment item, course material or proprietary content is used or reproduced. Not affiliated with or endorsed by Western Governors University.

Method © 2026 Erik Daniel Lindquist — Course Mastery Coach, armored drill. Items drafted with AI assistance under his direction.

How to run it

Paper first. Pencil. One pass, no notes, a timer if you want the pressure.

1. **Before you read the options**, fill the strip under the item: the target word (what is actually being asked), and the one fact in the stem that decides it.
2. **Principle before arithmetic**. Name the rule, then compute.
3. **Camouflage**. Most of every stem does not matter. Ask: which single fact decides this?
4. **Inverse pairs are the bait**. If two options are opposites, one of them is the trap built for you.
5. **Mark sure, unsure or guess** honestly. Sure-and-wrong is the most valuable miss on the page — it is a wrong mental model.
6. **Absolutes** (always, never, guarantee) are usually wrong. And recognizing an answer is not the same as owning it.
7. Items with a **heavy black bar** on the left are **transfer items**: the same principle, reversed or solved for a different variable.
8. Stop at the STOP page. Then grade, fill the triage grid, and tally the traps you fell for. The biggest tally is what you drill next.

The strip, filled in, looks like this:

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	_____	

Items

1.

A company gives every employee the same \$1,000 learning stipend for online courses. Employees without home internet or a laptop cannot use it. HR launched the stipend at an all-hands meeting in May. Which change best reflects equity?

- A. Keep the identical stipend, since that is already fair.
- B. Cancel the stipend for everyone.
- C. Provide devices or internet support to employees who need them so they can use the stipend.
- D. Relaunch the stipend at a different event.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

2. [TRANSFER — reversed stem / different variable]

Which is an example of equality rather than equity?

- A. An employee with a back injury receives an ergonomic chair.
- B. Every employee receives the same standard chair regardless of physical needs.
- C. A deaf employee receives a sign-language interpreter for meetings.
- D. Caregivers can shift their schedules around care duties.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

3.

A firm's workforce reflects the diversity of its city, but engagement surveys show employees from underrepresented groups rarely speak up in meetings and feel left out of key projects. The firm's recruiting ads recently won an industry award. What is the main gap?

- A. Pay equity.
- B. Advertising quality.
- C. Diversity; the firm needs to recruit more broadly.
- D. Inclusion.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

4. [TRANSFER — reversed stem / different variable]

Which metric measures inclusion rather than diversity?

- A. Percentage of the workforce by demographic group.
- B. Survey scores on belonging and whether employees feel their ideas are heard.
- C. Number of training hours completed.
- D. Demographics of the applicant pool.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

5.

A hiring manager rates a candidate highly because they attended the same university and both enjoy sailing, although another candidate had stronger job-related results. The interviews took place on a rainy Tuesday in a new building. Which bias is most evident?

- A. Affinity bias.
- B. Halo effect.
- C. A mood effect from the rainy weather.
- D. Confirmation bias.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

6. [TRANSFER — reversed stem / different variable]

An interviewer decides in the first minute that a candidate is weak, then asks only hard questions that seem to prove it. Which bias is this?

- A. No bias, since experienced interviewers can judge quickly.
- B. Confirmation bias.
- C. Affinity bias.
- D. Halo effect.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

7.

In a team meeting, a colleague tells a U.S.-born Asian American engineer, "Your English is so good!" The meeting was about a server migration and ran 45 minutes. The colleague meant it as a compliment. How is the comment best described?

- A. An off-topic comment for a server-migration meeting.
- B. Not a problem, because it was meant as a compliment.
- C. Harassment that requires immediate termination.
- D. A microaggression: it implies she is a foreigner, whatever the intent.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

8.

A product team rarely reports mistakes because a manager publicly criticized the last person who did. The team works hybrid and just adopted a new project tracker. Which action best builds psychological safety?

- A. Switch to a different project tracker.
- B. Hold a team happy hour.
- C. Add stricter penalties for unreported mistakes.
- D. Have leaders admit their own mistakes and run blameless reviews focused on learning.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

9.

A company wants to reduce bias in résumé screening for analyst roles. It receives 600 applications per posting through a popular job board. Which step most directly reduces bias at the screening stage?

- A. Remove names and other identifying details and score résumés against predefined job criteria.
- B. Post on more job boards to get more applications.
- C. Require a one-time diversity training for screeners and change nothing else.
- D. Let each screener use personal judgment.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

10.

A veterans employee resource group at a logistics company meets monthly, mentors new veteran hires, and advises HR on recruiting near military bases. The group has 85 members and a \$15,000 annual budget. What is the ERG's primary role?

- A. To replace HR in handling legal compliance.
- B. To serve only veterans; allies must always be excluded.
- C. A voluntary, employee-led group offering support, networking, and input to the organization.
- D. To manage a departmental budget.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

11.

Last year, 40 of 200 eligible men and 15 of 150 eligible women were promoted. The company's overall headcount grew 5 percent. Which statement is accurate?

- A.** Women were promoted at half the men's rate (10 percent vs. 20 percent), which warrants review.
- B.** The rates are equal because both groups had promotions.
- C.** Women received 27 percent of promotions, so rates are fine.
- D.** Headcount growth explains the difference.

Target word _____	The one fact that decides _____	Answer ____	[] sure [] unsure [] guess
-----------------------------	---	-----------------------	----------------------------------

12. [TRANSFER — reversed stem / different variable]

Group A is promoted at 12 percent and Group B at 9 percent. What is Group B's rate as a share of Group A's, and is it below the four-fifths benchmark?

- A.** 133 percent; no, it is above 80 percent.
- B.** Rates cannot be compared unless the groups are the same size.
- C.** 75 percent; yes, it is below 80 percent.
- D.** 3 points; the gap is small, so there is no concern.

Target word _____	The one fact that decides _____	Answer ____	[] sure [] unsure [] guess
-----------------------------	---	-----------------------	----------------------------------

STOP

Answers and dissection follow. Finish every item and every strip first.

Key and dissection

Struck-through text is the camouflage: facts that do not decide the item.

1. Answer C Concept 1

A company gives every employee the same \$1,000 learning stipend for online courses. Employees without home internet or a laptop cannot use it. ~~HR launched the stipend at an all-hands meeting in May.~~ Which change best reflects equity?

Target word: equity change **Decides:** Some employees cannot use the same resource.

A	Confusion set	That is equality; it leaves the access gap.
B	Adjacent category	Removes the gap by removing the benefit.
C	Correct	Equity adjusts support so everyone can access the opportunity.
D	Camouflage	The launch event does not decide access.

2. Answer B Concept 1 • transfer

Which is an example of equality rather than equity?

Target word: spot equality — reverse **Decides:** Same item regardless of need.

A	Inverted operation	Adjusting to need is equity.
B	Correct	Identical treatment without regard to need.
C	Confusion set	Also equity: support fits need.
D	Adjacent category	Flexibility for a need is equity.

3. Answer D Concept 2

A firm's workforce reflects the diversity of its city, but engagement surveys show employees from underrepresented groups rarely speak up in meetings and feel left out of key projects. ~~The firm's recruiting ads recently won an industry award.~~ What is the main gap?

Target word: name the gap **Decides:** Representation is fine; belonging is not.

A	Adjacent category	Nothing in the stem concerns pay.
B	Camouflage	The award does not decide the problem.
C	Confusion set	Representation already matches the city.
D	Correct	People are present but do not feel they belong or can contribute.

4. Answer B Concept 2 • transfer

Which metric measures inclusion rather than diversity?

Target word: inclusion metric — reverse **Decides:** Belonging and voice.

A	Inverted operation	Representation measures diversity.
B	Correct	Measures experience, not headcount.
C	Adjacent category	Measures activity, not inclusion.
D	Confusion set	Also a diversity measure.

5. Answer A Concept 3

A hiring manager rates a candidate highly because they attended the same university and both enjoy sailing, although another candidate had stronger job-related results. ~~The interviews took place on a rainy Tuesday in a new building.~~ Which bias is most evident?

Target word: name the bias **Decides:** Favoring similarity.

A	Correct	Favoring someone similar to oneself.
B	Adjacent category	Halo lets one strong trait color everything; here the driver is similarity.
C	Camouflage	Weather does not decide the bias.
D	Confusion set	That is seeking evidence for a first impression.

6. Answer B Concept 3 · transfer

An interviewer decides in the first minute that a candidate is weak, then asks only hard questions that seem to prove it. Which bias is this?

Target word: name the bias — reverse **Decides:** Seeking evidence for an early judgment.

A	Absolute language	Experience does not remove bias.
B	Correct	Looking only for evidence that supports a first impression.
C	Confusion set	Nothing about similarity is described.
D	Adjacent category	Halo is a positive trait coloring the whole view.

7. Answer D Concept 4

In a team meeting, a colleague tells a U.S.-born Asian American engineer, “Your English is so good!” ~~The meeting was about a server migration and ran 45 minutes.~~ The colleague meant it as a compliment. How is the comment best described?

Target word: classify the remark **Decides:** Implies she is foreign; impact matters.

A	Camouflage	The meeting topic does not decide the issue.
B	Dropped element	Drops impact and considers only intent.
C	Absolute language	A single remark usually calls for education, not automatic firing.
D	Correct	Impact on the person matters even if the intent was kind.

8. Answer D Concept 5

A product team rarely reports mistakes because a manager publicly criticized the last person who did. ~~The team works hybrid and just adopted a new project tracker.~~ Which action best builds psychological safety?

Target word: best action **Decides:** Fear of blame.

A	Camouflage	The tool does not decide safety.
B	Adjacent category	Social time does not change how mistakes are treated.
C	Inverted operation	More fear, less reporting.
D	Correct	Modeling openness and removing blame makes speaking up safe.

9. Answer A Concept 6

A company wants to reduce bias in résumé screening for analyst roles. It receives 600 applications per posting through a popular job board. Which step most directly reduces bias at the screening stage?

Target word: screening fix **Decides:** Bias enters when screeners see identifying details and use personal judgment.

A	Correct	Blind, structured scoring reduces bias at this step.
B	Camouflage	Volume does not decide how résumés are judged.
C	Adjacent category	Training alone has limited effect on screening decisions.
D	Inverted operation	Unstructured judgment invites bias.

10. Answer C Concept 7

A veterans employee resource group at a logistics company meets monthly, mentors new veteran hires, and advises HR on recruiting near military bases. ~~The group has 85 members and a \$15,000 annual budget.~~ What is the ERG's primary role?

Target word: ERG role **Decides:** Voluntary, employee-led support and input.

A	Adjacent category	ERGs advise; HR keeps compliance duties.
B	Absolute language	Most ERGs are open to allies.
C	Correct	That is what ERGs do.
D	Camouflage	Having a budget does not define its role.

11. Answer A Concept 8

Last year, 40 of 200 eligible men and 15 of 150 eligible women were promoted. ~~The company's overall headcount grew 5 percent.~~ Which statement is accurate?

Target word: compare promotion rates **Decides:** 20% vs. 10%.

A	Correct	$15/150 = 10\%$; $40/200 = 20\%$.
B	Dropped element	Ignores the size of each group.
C	Adjacent category	Share of promotions (15 of 55) is not the promotion rate.
D	Camouflage	Growth does not decide the rate gap.

12. Answer C Concept 8 • transfer

Group A is promoted at 12 percent and Group B at 9 percent. What is Group B's rate as a share of Group A's, and is it below the four-fifths benchmark?

Target word: ratio of rates **Decides:** $9 \div 12 = 0.75$.

A	Inverted operation	$12 \div 9$ flips the ratio.
B	Absolute language	Rates are designed for comparing groups of different sizes.
C	Correct	$9 \div 12 = 0.75$.
D	Dropped element	Uses the difference, not the ratio.

Triage grid

Write each item number in the box it belongs to.

	Right	Wrong
Sure	Owned.	Concept inversion — top priority. A wrong mental model; it survives rewording.
Unsure / guess	Recognition, not mastery. Re-drill with the transfer.	Not learned yet.

Trap tally

For every miss, find the letter you chose in the key and tally its trap. The biggest number is the pattern to drill.

Trap	What it does	In this drill	Your misses
Dropped element	Leaves out a required term or step.	3	
Wrong stem number	A figure copied from the prompt that is not the answer.	0	
Adjacent category	The right idea in the wrong bucket.	10	
Inverted operation	Direction flipped: add/subtract, cause/effect, higher/lower.	5	
Absolute language	Always, never, guarantee — where judgment applies.	4	
Confusion set	Every option is real; the test is exact role-matching.	6	
Camouflage	Answers a stem fact that was never the question.	8	

Anchor rows — the concept list

One row per concept: the rule to lock in, the trap that catches people, and the tell in the question that signals it.

#	Concept	Rule	Trap	Tell
1	Equality vs. equity	Equality gives everyone the same thing; equity gives people what they need to reach the same opportunity.	Treating identical resources as automatically fair.	The same resource that some people cannot use.
2	Diversity vs. inclusion	Diversity is who is represented; inclusion is whether people feel they belong and can contribute.	Assuming representation alone solves inclusion.	Diverse headcount but people feel left out or unheard.
3	Affinity and confirmation bias	Affinity bias favors people similar to us; confirmation bias seeks evidence for a first impression.	Mixing up similarity-based and first-impression-based bias.	Shared background (affinity) vs. an early judgment then selective questions (confirmation).
4	Microaggressions: intent vs. impact	A microaggression is a brief comment that sends a demeaning message about group identity; impact matters even when intent is kind.	Excusing a remark because it was meant as a compliment.	"They meant it as a compliment."
5	Psychological safety	Teams speak up and report mistakes when leaders model openness and respond without blame.	Adding penalties or social events to fix silence.	People hide mistakes after someone was punished.
6	Structured, bias-resistant hiring	Removing identifying details and scoring against predefined job criteria reduces bias at screening.	Relying on training alone or screener judgment.	"Most directly reduces bias at screening."
7	Employee resource groups	ERGs are voluntary, employee-led groups that provide support, networking, and input to the organization and are generally open to allies.	Treating ERGs as HR compliance units or closed clubs.	An ERG's role or membership.
8	Comparing rates, not counts	Compare promotion or selection rates within each group, and use the ratio of rates (for example, the four-fifths benchmark) to flag gaps.	Comparing raw counts or shares of total promotions.	Promotions and eligible pools for two groups.

Course scope (public description): Diversity, equity, and inclusion are not only ethical commitments, but they are also drivers of innovation and organizational success. This course helps you understand the foundations of diversity and explore how to create workplaces where all employees feel valued and able to contribute. By developing inclusive practices, you will build skills that distinguish you as an HR professional prepared to support today's diverse workforce.
