Early Clinical in Secondary Education

Armored Drill

8 concepts · 12 items · 4 transfer items

What this is. Every concept in this course's public description, re-asked with more disguise than a practice test uses. Each stem carries facts that do not decide it. Every wrong answer is a named trap.

Source. Scope from the course's public description in the WGU Institutional Catalog (September 2026); items written from the field's standard body of knowledge. No WGU assessment item, course material or proprietary content is used or reproduced. Not affiliated with or endorsed by Western Governors University.

Method © 2026 Erik Daniel Lindquist — Course Mastery Coach, armored drill. Items drafted with AI assistance under his direction.

How to run it

Paper first. Pencil. One pass, no notes, a timer if you want the pressure.

1. **Before you read the options**, fill the strip under the item: the target word (what is actually being asked), and the one fact in the stem that decides it.
2. **Principle before arithmetic**. Name the rule, then compute.
3. **Camouflage**. Most of every stem does not matter. Ask: which single fact decides this?
4. **Inverse pairs are the bait**. If two options are opposites, one of them is the trap built for you.
5. **Mark sure, unsure or guess** honestly. Sure-and-wrong is the most valuable miss on the page — it is a wrong mental model.
6. **Absolutes** (always, never, guarantee) are usually wrong. And recognizing an answer is not the same as owning it.
7. Items with a **heavy black bar** on the left are **transfer items**: the same principle, reversed or solved for a different variable.
8. Stop at the STOP page. Then grade, fill the triage grid, and tally the traps you fell for. The biggest tally is what you drill next.

The strip, filled in, looks like this:

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	_____	

Items

1.

Ninth graders in a biology class held in a lab with brand-new fume hoods are disengaged during a required unit on ecosystems. The school's football team is undefeated. Which change best supports adolescent motivation?

- A. Assign more worksheets to keep them busy.
- B. Let students choose a local ecosystem issue to investigate and present to peers.
- C. Add points for staying on task.
- D. Base examples on football, since every student loves sports.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

2.

A tenth grader who recently joined the drama club turns in an essay with no evidence and says, "I'm just not good at writing." The class meets right after lunch. What is the best warm-demander response?

- A. "Redo it by tomorrow or it's a zero."
- B. "That's okay, I'll give you full credit this time."
- C. "This isn't your best yet, and I know you can do it. Let's meet for ten minutes and find two pieces of evidence together."
- D. "Maybe try drama instead of writing."

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

3.

During a history lecture in a classroom decorated with vintage maps, a candidate notices a student quietly scrolling on a phone. The class has 31 students. What should the candidate try first?

- A. Write a referral to the office.
- B. Walk near the student while continuing to teach.
- C. Stop the lesson and take the phone in front of the class.
- D. Ignore it, since phone use never affects learning.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

4. [TRANSFER — reversed stem / different variable]

Proximity and a quiet look have not stopped a student from talking during instruction. What is the next appropriate step?

- A.** Call home immediately.
- B.** Remove the student from class.
- C.** A brief, private verbal redirect.
- D.** Go back to proximity again.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

5.

A candidate times a 50-minute algebra period in a school with a new block schedule. Attendance and warm-up setup take 8 minutes, and students are actually working on math for 30 minutes. The teacher has taught for 15 years. What percent of the allocated time was engaged time?

- A.** 40%
- B.** 84%
- C.** 71%
- D.** 60%

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

6. [TRANSFER — reversed stem / different variable]

A teacher wants students engaged for at least 80% of a 45-minute period. How many minutes of engaged time is that?

- A.** About 56 minutes
- B.** 9 minutes
- C.** 80 minutes
- D.** 36 minutes

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

7.

An eleventh-grade English group project, due right before spring break, ends with one student doing all the work while three others coast. The group earned a single shared grade. The school recently bought new laptops. What change best fixes this?

- A. Stop using group work, since it never works.
- B. Keep one grade but make groups smaller.
- C. Give each member a needed role and assess each student's own contribution and understanding.
- D. Let the hardest worker choose teammates.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

8. [TRANSFER — reversed stem / different variable]

Which design shows positive interdependence in a group task?

- A. Each student takes an individual quiz afterward.
- B. Each student completes the same worksheet at the same table.
- C. The strongest student does the final write-up for everyone.
- D. Each student reads a different source, and the group needs all four to answer the question.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

9.

A candidate plans a Socratic seminar on a short story for a class that sits in a circle of new chairs. She assigns two sides, sets a timer for rebuttals, and plans to name a winner. The story won a national prize. What is the main problem?

- A. She has designed a debate; a seminar should build shared understanding of the text.
- B. Prize-winning texts are too hard for seminars.
- C. The seminar should be teacher-led lecture.
- D. The timer is too short.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

10.

A candidate returns lab reports to a chemistry class that meets in the newly renovated science wing. One report says only “B–, good effort.” The reports were returned three weeks after they were turned in. What would make the feedback most effective?

- A. Grade more harshly so students take it seriously.
- B. Return it within days with a specific comment tied to the goal and a next step, such as “Your conclusion restates data; add why using collision theory.”
- C. Add a smiley face to the grade.
- D. Give only a letter grade to avoid confusion.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

11. [TRANSFER — reversed stem / different variable]

A teacher writes, “Next time, add a counterclaim and rebut it in your second paragraph.” Which part of the feedback model is this?

- A. Feed forward
- B. Feed back
- C. Feed up
- D. Summative grade

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

12.

After class, a ninth grader who is on the honor roll tells a candidate that an adult at home has been hurting him and asks her to keep it secret. The candidate’s placement ends next week. What should the candidate do?

- A. Tell him she cannot keep it secret, then report right away to her mentor or the designated school official and follow the reporting procedure.
- B. Wait until her placement ends and let the mentor decide.
- C. Ask him detailed questions to confirm the story first.
- D. Promise to keep it secret to protect his trust.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

STOP

Answers and dissection follow. Finish every item and every strip first.

Key and dissection

Struck-through text is the camouflage: facts that do not decide the item.

1. Answer B Concept 1

Ninth graders in a biology class ~~held in a lab with brand new fume hoods~~ are disengaged during a required unit on ecosystems. ~~The school's football team is undefeated.~~ Which change best supports adolescent motivation?

Target word: best change **Decides:** Choice and relevance raise autonomy and engagement.

A	Inverted operation	Removes choice and relevance.
B	Correct	Real choice, relevance, and a social audience meet teen needs.
C	Adjacent category	External rewards do not build lasting engagement.
D	Absolute language	Not every student shares that interest.

2. Answer C Concept 2

A tenth grader ~~who recently joined the drama club~~ turns in an essay with no evidence and says, "I'm just not good at writing." ~~The class meets right after lunch.~~ What is the best warm-demander response?

Target word: best response **Decides:** High expectations plus support.

A	Dropped element	Expectations without support.
B	Inverted operation	Care without expectations.
C	Correct	Holds the bar and offers support.
D	Camouflage	Pulls on the club detail and lowers the bar.

3. Answer B Concept 3

During a history lecture in a classroom ~~decorated with vintage maps~~, a candidate notices a student quietly scrolling on a phone. ~~The class has 31 students.~~ What should the candidate try first?

Target word: first move **Decides:** Minor behavior calls for the least intrusive response.

A	Adjacent category	A formal consequence for a minor issue.
B	Correct	Proximity is minimally disruptive and often enough.
C	Inverted operation	Starts at the most intrusive level.
D	Absolute language	Off-task phone use does affect learning; it just calls for a light first step.

4. Answer C Concept 3 • transfer

Proximity and a quiet look have not stopped a student from talking during instruction. What is the next appropriate step?

Target word: next step up the ladder **Decides:** Move one step up: a brief private redirect.

A	Adjacent category	Skips several steps.
B	Absolute language	Removal is for serious or persistent problems, not the next step.
C	Correct	The next least intrusive step.
D	Inverted operation	Repeats a step that already failed.

5. Answer D Concept 4

A candidate times a 50-minute algebra period in a school with a new block schedule. Attendance and warm-up setup take 8 minutes, and students are actually working on math for 30 minutes. The teacher has taught for 15 years. What percent of the allocated time was engaged time?

Target word: engaged ÷ allocated **Decides:** $30 \div 50$.

A	Inverted operation	That is the share of time not engaged.
B	Wrong stem number	$42 \div 50$ counts all non-setup time as engaged.
C	Dropped element	$30 \div 42$ drops the 8 minutes from allocated time.
D	Correct	$30 \div 50 = 0.60$.

6. Answer D Concept 4 • transfer

A teacher wants students engaged for at least 80% of a 45-minute period. How many minutes of engaged time is that?

Target word: solve for minutes **Decides:** 0.80×45 .

A	Confusion set	$45 \div 0.80 \approx 56.25$ divides instead of multiplying, and is longer than the whole period.
B	Inverted operation	That is the 20% not engaged.
C	Wrong stem number	Reads the percent as minutes.
D	Correct	$0.80 \times 45 = 36$.

7. Answer C Concept 5

An eleventh-grade English group project, due right before spring break, ends with one student doing all the work while three others coast. The group earned a single shared grade. The school recently bought new laptops. What change best fixes this?

Target word: best fix **Decides:** Add individual accountability and interdependent roles.

A	Absolute language	Well-designed cooperative learning is effective.
B	Dropped element	Still no individual accountability.
C	Correct	Interdependence plus individual accountability.
D	Adjacent category	Changes grouping, not accountability.

8. Answer D Concept 5 • transfer

Which design shows positive interdependence in a group task?

Target word: pick interdependence **Decides:** Each member's part is required for the group to succeed.

A	Confusion set	That is individual accountability, the other essential.
B	Adjacent category	Working side by side is not interdependence.
C	Inverted operation	Creates dependence on one member.
D	Correct	The group cannot succeed without each member.

9. Answer A Concept 6

A candidate plans a Socratic seminar on a short story for a class ~~that sits in a circle of new chairs~~. She assigns two sides, sets a timer for rebuttals, and plans to name a winner. ~~The story won a national prize~~. What is the main problem?

Target word: main problem **Decides:** Seminars are shared inquiry, not competition.

A	Correct	Sides, rebuttals, and a winner belong to debate.
B	Camouflage	The prize does not decide the format.
C	Inverted operation	Seminars are student-led discussion.
D	Dropped element	Timing is not the core issue.

10. Answer B Concept 7

A candidate returns lab reports to a chemistry class ~~that meets in the newly renovated science wing~~. One report says only “B–, good effort.” The reports were returned three weeks after they were turned in. What would make the feedback most effective?

Target word: improve the feedback **Decides:** Specific, goal-tied, next-step, and timely.

A	Adjacent category	Harshness is not feedback quality.
B	Correct	Specific, actionable, and timely.
C	Dropped element	Still no specific or next-step information.
D	Inverted operation	Removes the little feedback given.

11. Answer A Concept 7 · transfer

A teacher writes, “Next time, add a counterclaim and rebut it in your second paragraph.” Which part of the feedback model is this?

Target word: name the part **Decides:** Tells the student what to do next.

A	Correct	It gives the next step.
B	Inverted operation	Feed back describes current performance, looking back rather than ahead.
C	Confusion set	Feed up clarifies the goal.
D	Adjacent category	No grade is given.

12. Answer A Concept 8

After class, a ninth grader ~~who is on the honor roll~~ tells a candidate that an adult at home has been hurting him and asks her to keep it secret. ~~The candidate's placement ends next week~~. What should the candidate do?

Target word: correct action **Decides:** Do not promise secrecy; report immediately through school procedure.

A	Correct	Suspected abuse must be reported promptly through proper channels.
B	Camouflage	The placement end date does not delay the duty to report.
C	Adjacent category	Investigating is not the candidate's role.
D	Inverted operation	Secrecy blocks required reporting.

Triage grid

Write each item number in the box it belongs to.

	Right	Wrong
Sure	Owled.	Concept inversion — top priority. A wrong mental model; it survives rewording.
Unsure / guess	Recognition, not mastery. Re-drill with the transfer.	Not learned yet.

Trap tally

For every miss, find the letter you chose in the key and tally its trap. The biggest number is the pattern to drill.

Trap	What it does	In this drill	Your misses
Dropped element	Leaves out a required term or step.	5	
Wrong stem number	A figure copied from the prompt that is not the answer.	2	
Adjacent category	The right idea in the wrong bucket.	8	
Inverted operation	Direction flipped: add/subtract, cause/effect, higher/lower.	11	
Absolute language	Always, never, guarantee — where judgment applies.	4	
Confusion set	Every option is real; the test is exact role-matching.	3	
Camouflage	Answers a stem fact that was never the question.	3	

Anchor rows — the concept list

One row per concept: the rule to lock in, the trap that catches people, and the tell in the question that signals it.

#	Concept	Rule	Trap	Tell
1	Adolescent motivation: autonomy, competence, relatedness	Adolescents engage more when they have real choices, tasks they can succeed at with effort, and a sense of belonging, and when the work feels relevant.	Relying on points and threats to drive engagement with teens.	Secondary students disengaged from a required task.
2	The warm demander stance	Warm demanders pair high expectations with care: they insist on quality work and provide the support to reach it.	Thinking caring means lowering expectations, or that rigor means being cold.	A teacher's response to a student who turns in weak work.
3	Least intrusive intervention first	Respond to minor misbehavior with the least disruptive move that works (proximity, a look, a quiet redirect) before public or formal consequences.	Calling out a student in front of the class for a small issue.	Low-level off-task behavior during instruction.
4	Allocated, engaged, and academic learning time	Allocated time is the scheduled period; engaged time is when students are actually on task; academic learning time is engaged time with high success on the right content.	Treating the period length as learning time.	Minutes lost to routines, transitions, or off-task behavior.
5	Cooperative learning essentials	Group work works when there is positive interdependence (each member's part is needed) and individual accountability (each student is assessed).	Giving one group grade for one product, so one student does all the work.	A group project where some students coast.
6	Socratic seminar vs. debate	A Socratic seminar is a shared inquiry to understand a text more deeply, with students building on each other's ideas; a debate is a competition to win a position.	Running a seminar as a debate with sides and a winner.	Whether the goal is understanding or winning.
7	Effective feedback	Feedback works when it is specific, tied to the goal, timely, and tells the student what to do next (feed up, feed back, feed forward).	A grade or "good job" alone, or feedback returned weeks later.	Comments on student work.
8	Professional boundaries and reporting duties	Candidates keep professional boundaries (no private messaging or social media contact with students), never promise secrecy, and report suspected abuse or safety concerns right away through the school's procedure.	Promising to keep a disclosure secret or looking into it yourself.	A student shares something private with the candidate.

Course scope (public description): Early Clinical Experiences is a pivotal course designed to bridge the gap between theoretical knowledge and practical teaching skills. This course offers aspiring educators an immersive experience in real classroom settings under the mentorship of experienced teachers. Candidates engage in a

range of activities, including observation, to develop a deeper understanding of classroom dynamics, student engagement, and effective instructional strategies. Emphasizing reflective practice, the course encourages participants to analyze their experiences, integrate feedback, and adapt their teaching methods accordingly. This experiential learning approach equips future teachers with the confidence and competence necessary to foster a positive and impactful learning environment for their students.
