Emotional and Cultural Intelligence

Armored Drill

8 concepts · 12 items · 4 transfer items

What this is. Every concept in this course's public description, re-asked with more disguise than a practice test uses. Each stem carries facts that do not decide it. Every wrong answer is a named trap.

Source. Scope from the course's public description in the WGU Institutional Catalog (September 2026); items written from the field's standard body of knowledge. No WGU assessment item, course material or proprietary content is used or reproduced. Not affiliated with or endorsed by Western Governors University.

Method © 2026 Erik Daniel Lindquist — Course Mastery Coach, armored drill. Items drafted with AI assistance under his direction.

How to run it

Paper first. Pencil. One pass, no notes, a timer if you want the pressure.

1. **Before you read the options**, fill the strip under the item: the target word (what is actually being asked), and the one fact in the stem that decides it.
2. **Principle before arithmetic**. Name the rule, then compute.
3. **Camouflage**. Most of every stem does not matter. Ask: which single fact decides this?
4. **Inverse pairs are the bait**. If two options are opposites, one of them is the trap built for you.
5. **Mark sure, unsure or guess** honestly. Sure-and-wrong is the most valuable miss on the page — it is a wrong mental model.
6. **Absolutes** (always, never, guarantee) are usually wrong. And recognizing an answer is not the same as owning it.
7. Items with a **heavy black bar** on the left are **transfer items**: the same principle, reversed or solved for a different variable.
8. Stop at the STOP page. Then grade, fill the triage grid, and tally the traps you fell for. The biggest tally is what you drill next.

The strip, filled in, looks like this:

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	_____	

Items

1.

Before a budget meeting in the fourth-floor conference room, a project manager notices her jaw is tight and realizes she is anxious because her last proposal was rejected. The meeting is scheduled for 90 minutes. Which emotional intelligence component is she showing?

- A. Empathy.
- B. Self-regulation.
- C. Self-awareness.
- D. Social skill, because the meeting is long.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

2. [TRANSFER — reversed stem / different variable]

Which behavior is the clearest example of social skill, as opposed to empathy?

- A. Staying calm after a harsh email.
- B. Sensing that a quiet colleague feels left out.
- C. Recognizing one's own frustration before a meeting.
- D. Bringing two feuding team members together and guiding them to a shared plan.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

3.

A team lead receives an email from a peer, copied to their shared director and two vendors, that blames her for a missed deadline. She feels her face flush. It is 4:45 p.m. on a Friday. What is the most emotionally intelligent next step?

- A. Forward the email to the director with a list of the peer's past mistakes.
- B. Wait until she is calm, then ask the peer for a private conversation about what happened.
- C. Reply-all right away to correct the record before the weekend.
- D. Ignore the email and never raise it, since showing emotion is unprofessional.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

4.

An employee who has been with the company for eight years tells his manager he is upset that a newer colleague got the lead role on a project. The project runs through March. Which reply shows empathy without agreeing that the decision was wrong?

- A. "It sounds like you feel overlooked after all your work here. Can you tell me more about what you were hoping for?"
- B. "You're right, that wasn't fair. I'll give you the lead instead."
- C. "I feel so sorry for you — that must be awful."
- D. "Eight years doesn't automatically earn a lead role."

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

5.

A customer-service rep with a strong quality score is on a call with a client who explains, at length, why a shipment problem hurt her business. The call center has 120 agents and is open until 9 p.m. Which response best demonstrates active listening?

- A. "Our policy is clear, and the carrier caused the delay."
- B. "Here's what you should do next time to avoid this."
- C. "So the late shipment meant you couldn't fill your own orders this week — is that right?"
- D. "We have 120 agents ready to help anyone."

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

6.

Before leading a workshop in Seoul, a consultant who has run over 50 workshops writes down her assumptions about how participants may respond to open debate and plans how she will check them during the first hour. Her flight lands two days early. Which CQ capability is she using?

- A. CQ drive.
- B. CQ knowledge.
- C. CQ action.
- D. CQ strategy.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

7. [TRANSFER — reversed stem / different variable]

A manager has read widely about her new team's culture but avoids social events and keeps interactions short because cross-cultural situations make her uneasy. Which CQ capability is weakest?

- A.** CQ knowledge.
- B.** CQ strategy.
- C.** None — reading enough about a culture is what CQ requires.
- D.** CQ drive.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

8.

A U.S. manager read that people from a certain country tend to communicate indirectly. A new engineer from that country, hired from a top university, gives blunt, direct feedback in her first design review. How should the manager treat this?

- A.** Treat the pattern as a starting guess and adjust to how this engineer actually communicates.
- B.** Assume she is being rude, since her culture is indirect.
- C.** Credit her university for training out her culture.
- D.** Conclude that the reading was wrong and cultural patterns are useless.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

9.

A hiring manager who played college soccer rates a candidate highly after learning they grew up in the same town. The interview was held over video, and the candidate's résumé is two pages. Which bias is most likely at work?

- A.** Confirmation bias.
- B.** The halo effect from the candidate's soccer career.
- C.** Affinity bias.
- D.** No bias, since the manager meant well.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

10. [TRANSFER — reversed stem / different variable]

A company wants to reduce the effect of unconscious bias in promotions. Which step does the most?

- A.** Ask managers to try harder to be fair.
- B.** Use the same written criteria for every candidate and a diverse review panel.
- C.** Rely on the most senior leader's judgment.
- D.** Let each manager choose the person they trust most.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

11.

A plant manager learns that disclosing a minor safety defect will delay a product launch that 300 workers' bonuses depend on. The plant is the company's newest and most automated. She decides to disclose because customers have a right to know, whatever the cost. Which ethical framework is she using?

- A.** Duty-based (deontological) ethics.
- B.** Virtue ethics.
- C.** Ethical relativism, since the plant is new.
- D.** Utilitarian ethics.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

12. [TRANSFER — reversed stem / different variable]

Which statement reflects utilitarian reasoning?

- A.** "A person of integrity would close it."
- B.** "We should close the unsafe line because it prevents harm to the largest number of people."
- C.** "Whatever maximizes this quarter's profit is right."
- D.** "We must follow the safety rule because rules must never be broken."

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

STOP

Answers and dissection follow. Finish every item and every strip first.

Key and dissection

Struck-through text is the camouflage: facts that do not decide the item.

1. Answer C Concept 1

Before a budget meeting ~~in the fourth floor conference room~~, a project manager notices her jaw is tight and realizes she is anxious because her last proposal was rejected. ~~The meeting is scheduled for 90 minutes.~~ Which emotional intelligence component is she showing?

Target word: name the EI component **Decides:** She is recognizing and naming her own emotion and its cause.

A	Confusion set	Empathy concerns other people's emotions.
B	Adjacent category	Self-regulation is managing the emotion; she has only recognized it so far.
C	Correct	Noticing one's own emotions and their causes is self-awareness.
D	Camouflage	Meeting length does not decide the component.

2. Answer D Concept 1 · transfer

Which behavior is the clearest example of social skill, as opposed to empathy?

Target word: reverse: pick the behavior that fits the component **Decides:** Social skill = managing relationships and influencing outcomes.

A	Confusion set	That is self-regulation.
B	Adjacent category	Reading another person's feelings is empathy.
C	Inverted operation	Inward-facing self-awareness, the reverse of managing others.
D	Correct	Managing relationships toward an outcome is social skill.

3. Answer B Concept 2

A team lead receives an email from a peer, copied to their shared director and two vendors, that blames her for a missed deadline. She feels her face flush. ~~It is 4:45 p.m. on a Friday.~~ What is the most emotionally intelligent next step?

Target word: best regulated response **Decides:** A strong emotion has been triggered; pause before responding.

A	Inverted operation	Retaliation is the opposite of regulating the reaction.
B	Correct	Pausing and choosing a response is self-regulation; moving the conflict to a private talk protects the relationship.
C	Camouflage	The Friday timing creates false urgency; reacting in the moment escalates.
D	Absolute language	Self-regulation manages emotion; it does not mean suppressing issues forever.

4. Answer A Concept 3

An employee ~~who has been with the company for eight years~~ tells his manager he is upset that a newer colleague got the lead role on a project. ~~The project runs through March.~~ Which reply shows empathy without agreeing that the decision was wrong?

Target word: empathetic response **Decides:** Empathy acknowledges the feeling without conceding the decision.

A	Correct	Names and validates the feeling and invites more, without reversing the decision.
B	Adjacent category	Agreement and concession, not empathy.
C	Confusion set	Sympathy (pity) rather than understanding his perspective.
D	Camouflage	Argues about tenure, a detail that does not decide what an empathetic reply is.

5. Answer C Concept 4

A customer-service rep ~~with a strong quality score~~ is on a call with a client who explains, at length, why a shipment problem hurt her business. ~~The call center has 120 agents and is open until 9 p.m.~~ Which response best demonstrates active listening?

Target word: active-listening response **Decides:** Active listening reflects back meaning before advising.

A	Inverted operation	Defends the company instead of listening.
B	Dropped element	Jumps to advice and skips confirming understanding.
C	Correct	Paraphrases to confirm understanding before moving to solutions.
D	Camouflage	Uses an irrelevant detail and ignores what the client said.

6. Answer D Concept 5

Before leading a workshop in Seoul, a consultant ~~who has run over 50 workshops~~ writes down her assumptions about how participants may respond to open debate and plans how she will check them during the first hour. ~~Her flight lands two days early.~~ Which CQ capability is she using?

Target word: name the CQ capability **Decides:** Planning and checking assumptions is CQ strategy.

A	Confusion set	Drive is interest and confidence to engage across cultures.
B	Adjacent category	Knowledge is understanding cultural facts and systems; she is planning and checking.
C	Inverted operation	Action is adapting behavior in the moment, which comes after planning.
D	Correct	Metacognition — planning, monitoring and checking cultural assumptions.

7. Answer D Concept 5 • transfer

A manager has read widely about her new team's culture but avoids social events and keeps interactions short because cross-cultural situations make her uneasy. Which CQ capability is weakest?

Target word: reverse: diagnose the gap **Decides:** She has knowledge but lacks motivation and confidence to engage.

A	Inverted operation	Her reading shows knowledge is her strength.
B	Adjacent category	Strategy is planning; the stem describes avoidance from unease.
C	Absolute language	CQ needs all four capabilities, not knowledge alone.
D	Correct	Low interest or confidence in engaging is weak drive.

8. Answer A Concept 6

A U.S. manager read that people from a certain country tend to communicate indirectly. A new engineer from that country, ~~hired from a top university~~, gives blunt, direct feedback in her first design review. How should the manager treat this?

Target word: use of a cultural generalization **Decides:** Group patterns are hypotheses; the individual's behavior is the evidence.

A	Correct	Generalizations should be updated by individual evidence.
B	Absolute language	Applies the group pattern as a fixed rule — stereotyping.
C	Camouflage	Her school is background, not the lesson.
D	Inverted operation	One exception does not erase a group tendency.

9. Answer C Concept 7

A hiring manager ~~who played college soccer~~ rates a candidate highly after learning they grew up in the same town. ~~The interview was held over video, and the candidate's résumé is two pages.~~ Which bias is most likely at work?

Target word: name the bias **Decides:** Favoring someone for shared background.

A	Confusion set	Seeking evidence for a belief already held; the trigger here is similarity.
B	Camouflage	The soccer detail belongs to the manager, not the candidate.
C	Correct	Preferring people who are similar to us.
D	Absolute language	Unconscious bias operates despite good intentions.

10. Answer B Concept 7 · transfer

A company wants to reduce the effect of unconscious bias in promotions. Which step does the most?

Target word: reverse: pick the remedy **Decides:** Structure and diverse input limit automatic judgments.

A	Dropped element	Good intentions alone do not remove unconscious bias.
B	Correct	Structured criteria and multiple perspectives reduce bias.
C	Adjacent category	Concentrates one person's biases.
D	Inverted operation	Unstructured gut choice increases affinity bias.

11. Answer A Concept 8

A plant manager learns that disclosing a minor safety defect will delay a product launch that 300 workers' bonuses depend on. ~~The plant is the company's newest and most automated.~~ She decides to disclose because customers have a right to know, whatever the cost. Which ethical framework is she using?

Target word: name the framework **Decides:** Reasoning from rights and duty regardless of outcomes.

A	Correct	Acting on a duty or right regardless of consequences.
B	Adjacent category	Virtue ethics centers on character, not a stated right or duty.
C	Camouflage	The plant's age does not bear on the framework.
D	Inverted operation	Utilitarian reasoning would weigh the outcome for the 300 workers against customers.

12. Answer B Concept 8 · transfer

Which statement reflects utilitarian reasoning?

Target word: reverse: pick the argument that fits the framework **Decides:** Utilitarian = greatest good for the greatest number.

A	Adjacent category	Virtue ethics.
B	Correct	Judges the action by its total consequences.
C	Dropped element	Counts only shareholders' short-term gain, leaving out everyone else affected.
D	Confusion set	Duty-based reasoning.

Triage grid

Write each item number in the box it belongs to.

	Right	Wrong
Sure	Owned.	Concept inversion — top priority. A wrong mental model; it survives rewording.
Unsure / guess	Recognition, not mastery. Re-drill with the transfer.	Not learned yet.

Trap tally

For every miss, find the letter you chose in the key and tally its trap. The biggest number is the pattern to drill.

Trap	What it does	In this drill	Your misses
Dropped element	Leaves out a required term or step.	3	
Wrong stem number	A figure copied from the prompt that is not the answer.	0	
Adjacent category	The right idea in the wrong bucket.	8	
Inverted operation	Direction flipped: add/subtract, cause/effect, higher/lower.	8	
Absolute language	Always, never, guarantee — where judgment applies.	4	
Confusion set	Every option is real; the test is exact role-matching.	6	
Camouflage	Answers a stem fact that was never the question.	7	

Anchor rows — the concept list

One row per concept: the rule to lock in, the trap that catches people, and the tell in the question that signals it.

#	Concept	Rule	Trap	Tell
1	Components of emotional intelligence	Self-awareness (knowing your emotions), self-regulation (managing them), motivation, empathy (reading others) and social skill (managing relationships) are distinct abilities.	Mixing up self-awareness (noticing) with self-regulation (controlling).	Whether the person is recognizing a feeling, managing it, or reading someone else's.
2	Self-regulation under pressure	When a strong emotion hits, pause and choose a response rather than react; delay hard conversations until you can think clearly.	Believing self-regulation means hiding or denying emotions.	A triggering moment and a choice about what to do next.
3	Empathy vs. sympathy vs. agreement	Empathy means understanding and acknowledging another person's feelings and view; it does not require agreeing or fixing.	Thinking empathy means giving in, or offering pity instead of understanding.	A response that acknowledges feelings versus one that judges, pities, or concedes.
4	Active listening	Give full attention, paraphrase to confirm meaning, ask open questions, and hold judgment and advice until the speaker is understood.	Jumping to solutions or rehearsing a reply while the other person talks.	Choice among responses: advise, defend, or reflect back.
5	Cultural intelligence (CQ)	CQ has four capabilities: drive (motivation), knowledge (understanding cultural differences), strategy (planning and checking assumptions) and action (adapting behavior).	Equating CQ with knowing facts about other cultures.	What the person is doing: wanting to engage, learning, planning, or adjusting behavior.
6	Generalizations vs. stereotypes	Cultural patterns are useful starting hypotheses about groups; treat individuals as individuals and update when evidence differs.	Applying a group tendency to every member as a fixed rule.	A person who does not fit the cultural pattern the manager expected.
7	Unconscious bias	Automatic preferences such as affinity bias and confirmation bias shape judgments; structured criteria and diverse input reduce their effect.	Believing good intentions alone remove bias.	A judgment that favors people like the decision-maker, or evidence noticed only when it fits.
8	Ethical decision frameworks	Utilitarian thinking weighs outcomes for everyone affected; duty-based (deontological) thinking follows rules and rights regardless of outcome; virtue ethics asks what a person of good character would do.	Labeling any rule-following argument as utilitarian, or any good outcome as ethical by default.	Whether the reasoning cites consequences, duties/rights, or character.

Course scope (public description): Success in today's workplace requires more than technical skill. It depends on emotional awareness, cultural understanding, and ethical decision-making. This course will help you strengthen your ability to communicate effectively, connect across differences, and lead with empathy. These are not soft

skills. They are the professional capabilities employers value most and the human qualities that technology can never replace.
