Global Health

Armored Drill

8 concepts · 12 items · 4 transfer items

What this is. Every concept in this course's public description, re-asked with more disguise than a practice test uses. Each stem carries facts that do not decide it. Every wrong answer is a named trap.

Source. Scope from the course's public description in the WGU Institutional Catalog (September 2026); items written from the field's standard body of knowledge. No WGU assessment item, course material or proprietary content is used or reproduced. Not affiliated with or endorsed by Western Governors University.

Method © 2026 Erik Daniel Lindquist — Course Mastery Coach, armored drill. Items drafted with AI assistance under his direction.

How to run it

Paper first. Pencil. One pass, no notes, a timer if you want the pressure.

1. **Before you read the options**, fill the strip under the item: the target word (what is actually being asked), and the one fact in the stem that decides it.
2. **Principle before arithmetic**. Name the rule, then compute.
3. **Camouflage**. Most of every stem does not matter. Ask: which single fact decides this?
4. **Inverse pairs are the bait**. If two options are opposites, one of them is the trap built for you.
5. **Mark sure, unsure or guess** honestly. Sure-and-wrong is the most valuable miss on the page — it is a wrong mental model.
6. **Absolutes** (always, never, guarantee) are usually wrong. And recognizing an answer is not the same as owning it.
7. Items with a **heavy black bar** on the left are **transfer items**: the same principle, reversed or solved for a different variable.
8. Stop at the STOP page. Then grade, fill the triage grid, and tally the traps you fell for. The biggest tally is what you drill next.

The strip, filled in, looks like this:

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	_____	

Items

1.

A small island nation's new health minister, who trained as an economist, asks WHO for help after rising rates of childhood obesity. Which support fits WHO's core role?

- A. Paying most of the nation's health budget.
- B. Fines on the country if it does not follow WHO guidance.
- C. Evidence-based guidelines and technical advice for a national plan.
- D. An economic cost model, since the minister is an economist.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

2.

A country detects a cluster of severe, unexplained pneumonia in a border town beside a busy weekly livestock market. Lab results will take 10 days. Under the International Health Regulations, what must the country do?

- A. Wait for lab confirmation before telling WHO.
- B. Assess the event and notify WHO within 24 hours if it may be an international concern.
- C. Shut down the livestock market first; notification can wait.
- D. Close all borders, as the IHR require.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

3. [TRANSFER — reversed stem / different variable]

Under the International Health Regulations, who has the authority to declare a public health emergency of international concern?

- A. The country where the outbreak began.
- B. The UN Security Council.
- C. The Emergency Committee on its own.
- D. The WHO Director-General.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

4.

An official from a wealthy country that ranks among the top ten in life expectancy says the Sustainable Development Goals are for developing nations and do not apply at home. How should you respond?

- A. Correct, because its high life expectancy means it has already met SDG 3.
- B. Correct; the SDGs focus mainly on developing countries.
- C. The SDGs apply to all countries, including high-income ones.
- D. The SDGs cover health only, so other ministries are not involved.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

5. [TRANSFER — reversed stem / different variable]

Which feature belonged to the Millennium Development Goals but not to the Sustainable Development Goals?

- A. A goal to reduce inequality within and among countries.
- B. A focus mainly on developing countries, with a 2015 deadline.
- C. Seventeen goals.
- D. Applying to every country.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

6.

One country's foreign aid agency signs an agreement to fund a malaria bed-net program run by another country's health ministry. The agreement was signed at a ceremony during a trade summit. What type of funding is this?

- A. Multilateral aid.
- B. A public-private partnership.
- C. Trade assistance, since it was signed at a trade summit.
- D. Bilateral aid.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

7. [TRANSFER — reversed stem / different variable]

Which of these is an example of multilateral health funding?

- A. A World Bank loan for primary care, drawn from funds of many member countries.
- B. A faith-based mission hospital run by volunteers.
- C. A private family foundation grant.
- D. One country's aid agency funding a partner's clinics.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

8.

A donor-funded HIV program runs its own clinics, pays staff three times the ministry salary, and keeps a separate data system. It won an international award last year. Donor funding ends in two years. What best improves sustainability?

- A. Use the award to attract a new donor for the same model.
- B. Donor funding should continue forever.
- C. Plan a phased transfer into ministry clinics and data systems, with growing government co-financing.
- D. Open more donor-run clinics before funds end.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

9.

A national measles team has its own vehicles, cold-chain fridges, and staff who work only on measles campaigns twice a year. The team's director is well known on national radio. How is this program best classified?

- A. Vertical.
- B. Horizontal.
- C. Health systems strengthening, because it has fridges.
- D. Diagonal.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

10. [TRANSFER — reversed stem / different variable]

Which approach is horizontal?

- A. A malaria bed-net campaign.
- B. Using TB funds to build a lab network used by all programs.
- C. A polio-only vaccination team.
- D. Training primary care nurses to manage many common conditions.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

11.

Avian influenza is found in poultry farms near a wetland used by migratory birds, and two farmworkers develop flu-like illness. The province recently built a new highway to the farms. Which response reflects One Health?

- A.** Leave it to veterinary services, since it began in poultry.
- B.** Joint surveillance and response by human health, veterinary, and environmental agencies.
- C.** Cull every bird in the country.
- D.** Test and treat the farmworkers only.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

12.

A student drafts an advocacy statement for ClearWell Alliance, a water nonprofit founded in 1998. The draft tells a moving story about a girl who no longer walks hours for water and reports that diarrhea cases fell 35% in served villages. What most needs to be added?

- A.** A specific request of a named audience, such as lawmakers funding 50 more wells.
- B.** A second emotional story.
- C.** The full history of the NGO since 1998.
- D.** A claim that the NGO ended all waterborne disease.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

STOP

Answers and dissection follow. Finish every item and every strip first.

Key and dissection

Struck-through text is the camouflage: facts that do not decide the item.

1. Answer C Concept 1

A small island nation's new health minister, ~~who trained as an economist~~, asks WHO for help after rising rates of childhood obesity. Which support fits WHO's core role?

Target word: WHO's role **Decides:** WHO provides guidelines and technical assistance.

A	Confusion set	Large-scale financing comes from development banks, partnerships, and donors, not WHO.
B	Absolute language	WHO cannot penalize or enforce against sovereign states.
C	Correct	Normative guidance and technical support are WHO's core functions.
D	Camouflage	The minister's background does not define WHO's role.

2. Answer B Concept 2

A country detects a cluster of severe, unexplained pneumonia in a border town ~~beside a busy weekly livestock market~~. Lab results will take 10 days. Under the International Health Regulations, what must the country do?

Target word: IHR obligation **Decides:** Notify WHO within 24 hours of assessing a possible international emergency.

A	Dropped element	The IHR do not require confirmation before notifying.
B	Correct	Notification follows assessment, not lab confirmation.
C	Camouflage	The market may matter for investigation, but it does not change the reporting duty.
D	Adjacent category	The IHR discourage travel and trade restrictions beyond what evidence supports.

3. Answer D Concept 2 · transfer

Under the International Health Regulations, who has the authority to declare a public health emergency of international concern?

Target word: declaring authority **Decides:** The WHO Director-General declares, advised by an Emergency Committee.

A	Inverted operation	Countries notify; WHO declares.
B	Adjacent category	A UN body, but not the IHR authority.
C	Confusion set	The committee advises; it does not declare.
D	Correct	The IHR give this power to the Director-General.

4. Answer C Concept 3

An official from a wealthy country ~~that ranks among the top ten in life expectancy~~ says the Sustainable Development Goals are for developing nations and do not apply at home. How should you respond?

Target word: SDG scope **Decides:** SDGs are universal.

A	Camouflage	SDG 3 covers many targets beyond life expectancy.
B	Confusion set	That described the MDGs.
C	Correct	Universality is a defining feature of the SDGs.
D	Dropped element	The 17 goals span poverty, education, climate, and more.

5. Answer B Concept 3 • transfer

Which feature belonged to the Millennium Development Goals but not to the Sustainable Development Goals?

Target word: MDG-only feature **Decides:** MDGs targeted mainly developing countries by 2015.

A	Adjacent category	That is SDG 10.
B	Correct	The MDGs ran 2000–2015 and targeted poorer nations.
C	Wrong stem number	The SDGs have 17; the MDGs had 8.
D	Inverted operation	That is the SDGs.

6. Answer D Concept 4

One country's foreign aid agency signs an agreement to fund a malaria bed-net program run by another country's health ministry. ~~The agreement was signed at a ceremony during a trade summit.~~ What type of funding is this?

Target word: classify the funding **Decides:** One government to another government.

A	Confusion set	Multilateral pools funds from many governments.
B	Adjacent category	No private or philanthropic partner is involved.
C	Camouflage	The venue does not define the funding type.
D	Correct	Government-to-government is bilateral.

7. Answer A Concept 4 • transfer

Which of these is an example of multilateral health funding?

Target word: identify multilateral **Decides:** Funds pooled from many member governments.

A	Correct	Pooled government funds make it multilateral.
B	Confusion set	An NGO provider.
C	Adjacent category	Philanthropic, not multilateral.
D	Inverted operation	That is bilateral.

8. Answer C Concept 5

A donor-funded HIV program runs its own clinics, pays staff three times the ministry salary, and keeps a separate data system. ~~It won an international award last year.~~ Donor funding ends in two years. What best improves sustainability?

Target word: sustainability step **Decides:** Parallel structures will collapse when donors leave; the country must own and absorb the work.

A	Camouflage	Postpones the problem without building ownership.
B	Absolute language	No donor commitment is permanent; that is not a plan.
C	Correct	Country ownership and integration sustain services after donors exit.
D	Inverted operation	Expands the parallel system the country cannot sustain.

9. Answer A Concept 6

A national measles team has its own vehicles, cold-chain fridges, and staff who work only on measles campaigns twice a year. ~~The team's director is well known on national radio.~~ How is this program best classified?

Target word: program type **Decides:** Dedicated single-disease resources = vertical.

A	Correct	One disease with its own resources.
B	Inverted operation	Horizontal strengthens the whole system, not one disease.
C	Dropped element	Equipment used only for one disease is not system-wide.
D	Adjacent category	Diagonal would use measles goals to build shared capacity.

10. Answer D Concept 6 · transfer

Which approach is horizontal?

Target word: identify horizontal **Decides:** Broad strengthening of general services.

A	Confusion set	Single-disease, so vertical.
B	Adjacent category	Diagonal: disease-driven but shared.
C	Inverted operation	Vertical.
D	Correct	Builds general system capacity.

11. Answer B Concept 7

Avian influenza is found in poultry farms near a wetland used by migratory birds, and two farmworkers develop flu-like illness. ~~The province recently built a new highway to the farms.~~ Which response reflects One Health?

Target word: One Health response **Decides:** Human, animal, and environment all involved.

A	Adjacent category	Single-sector; people are already ill.
B	Correct	One Health links all three sectors.
C	Absolute language	Disproportionate and not a cross-sector strategy.
D	Dropped element	Ignores the animal and environmental sources.

12. Answer A Concept 8

A student drafts an advocacy statement for ClearWell Alliance, ~~a water nonprofit founded in 1998.~~ The draft tells a moving story about a girl who no longer walks hours for water and reports that diarrhea cases fell 35% in served villages. What most needs to be added?

Target word: missing element **Decides:** It has story and evidence but no ask.

A	Correct	Advocacy needs a clear call to action.
B	Adjacent category	More story does not turn awareness into action.
C	Camouflage	History is background, not the missing element.
D	Absolute language	Overstating results hurts credibility.

Triage grid

Write each item number in the box it belongs to.

	Right	Wrong
Sure	Owned.	Concept inversion — top priority. A wrong mental model; it survives rewording.
Unsure / guess	Recognition, not mastery. Re-drill with the transfer.	Not learned yet.

Trap tally

For every miss, find the letter you chose in the key and tally its trap. The biggest number is the pattern to drill.

Trap	What it does	In this drill	Your misses
Dropped element	Leaves out a required term or step.	4	
Wrong stem number	A figure copied from the prompt that is not the answer.	1	
Adjacent category	The right idea in the wrong bucket.	9	
Inverted operation	Direction flipped: add/subtract, cause/effect, higher/lower.	6	
Absolute language	Always, never, guarantee — where judgment applies.	4	
Confusion set	Every option is real; the test is exact role-matching.	6	
Camouflage	Answers a stem fact that was never the question.	6	

Anchor rows — the concept list

One row per concept: the rule to lock in, the trap that catches people, and the tell in the question that signals it.

#	Concept	Rule	Trap	Tell
1	WHO's normative and technical role	WHO sets norms, standards, and guidelines, coordinates responses, and gives technical support; it does not run national health systems, fund most of them, or enforce national law.	Picturing WHO as a global health police force or main funder.	A question about what WHO can or should do for a country.
2	International Health Regulations (2005)	Countries must build surveillance capacity and notify WHO within 24 hours of assessing an event that may be a public health emergency of international concern; only WHO's Director-General declares such an emergency.	Waiting for lab confirmation before notifying, or thinking border closures are required.	An unusual cluster with possible spread across borders.
3	SDGs vs. MDGs	The 8 Millennium Development Goals (2000–2015) targeted mainly developing countries; the 17 Sustainable Development Goals (2015–2030) apply to all countries, with health centered in SDG 3.	Believing the SDGs apply only to poorer countries.	A high-income country questioning whether the global goals apply to it.
4	Types of global health actors	Multilateral agencies pool funds from many governments; bilateral aid flows from one government to another; global partnerships blend public, private, and philanthropic money; NGOs are independent non-state groups.	Calling any international funder multilateral.	Who supplies the money and who receives it.
5	Country ownership and sustainability	Programs last when the country leads planning, co-finances, and folds services into its own health system rather than running parallel donor structures.	Assuming more donor money or longer donor staffing guarantees sustainability.	Donor funding ending soon and a program running outside the ministry.
6	Vertical, horizontal, and diagonal programs	Vertical programs target one disease with dedicated resources; horizontal programs strengthen the general health system; diagonal programs use disease goals to build shared system capacity.	Thinking any well-funded program is health-system strengthening.	A single-disease team vs. broad primary care vs. a disease program that builds shared labs or supply chains.
7	One Health	Human, animal, and environmental health are linked, so zoonoses and antimicrobial resistance need joint surveillance and response across those sectors.	Handling an outbreak that spans animals and people in only one sector.	Sick animals, sick people, and a shared environment.

#	Concept	Rule	Trap	Tell
8	The advocacy statement	An advocacy statement names the problem with evidence, shows the organization's measured results, and ends with a clear, specific ask of a named audience.	Relying on a moving story or long history without a concrete request, or overstating results.	A draft that informs or inspires but never says who should do what.

Course scope (public description): Global Health prepares learners to identify and analyze Global Health as a field. Learners consider how globalization has affected the health of various groups of people throughout the world. Likewise, the learner also looks at how economic and environmental factors have different effects on different groups globally. Finally, the course presents the learner with knowledge of various global initiatives and international organizations that strive to promote health and well-being and reduce health disparities. The learner demonstrates their knowledge and skills by drafting an advocacy statement promoting the successful efforts of a global health organization.
