Introduction to Health and Human Services

Armored Drill

8 concepts · 12 items · 4 transfer items

What this is. Every concept in this course's public description, re-asked with more disguise than a practice test uses. Each stem carries facts that do not decide it. Every wrong answer is a named trap.

Source. Scope from the course's public description in the WGU Institutional Catalog (September 2026); items written from the field's standard body of knowledge. No WGU assessment item, course material or proprietary content is used or reproduced. Not affiliated with or endorsed by Western Governors University.

Method © 2026 Erik Daniel Lindquist — Course Mastery Coach, armored drill. Items drafted with AI assistance under his direction.

How to run it

Paper first. Pencil. One pass, no notes, a timer if you want the pressure.

1. **Before you read the options**, fill the strip under the item: the target word (what is actually being asked), and the one fact in the stem that decides it.
2. **Principle before arithmetic**. Name the rule, then compute.
3. **Camouflage**. Most of every stem does not matter. Ask: which single fact decides this?
4. **Inverse pairs are the bait**. If two options are opposites, one of them is the trap built for you.
5. **Mark sure, unsure or guess** honestly. Sure-and-wrong is the most valuable miss on the page — it is a wrong mental model.
6. **Absolutes** (always, never, guarantee) are usually wrong. And recognizing an answer is not the same as owning it.
7. Items with a **heavy black bar** on the left are **transfer items**: the same principle, reversed or solved for a different variable.
8. Stop at the STOP page. Then grade, fill the triage grid, and tally the traps you fell for. The biggest tally is what you drill next.

The strip, filled in, looks like this:

Target word _____	The one fact that decides _____	Answer _____	[] sure [] unsure [] guess
-----------------------------	---	------------------------	----------------------------------

Items

1.

A community health worker at a busy urban outreach program, who speaks three languages, visits a client with high blood pressure. The client says the new pill makes him dizzy and asks her to tell him whether to cut it in half. Her agency has a van that can drive clients to appointments. What should the worker do?

- A. Encourage him not to change the dose on his own and help him contact his prescriber or pharmacist about the dizziness.
- B. Tell him to cut the pill in half until his next visit, since dizziness is a common side effect.
- C. Schedule the van to take him to the emergency department right away.
- D. Tell him to stop the pill entirely because any side effect means the drug is wrong for him.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

2.

A county health office notices a sharp rise in foodborne illness tied to a packaged salad sold in several states. The county director has worked in public health for 25 years and recently won a state award. Which federal agency regulates the safety of the food product itself?

- A. CMS
- B. FDA
- C. CDC
- D. SAMHSA

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

3. [TRANSFER — reversed stem / different variable]

A rural clinic wants federal help because the county has too few primary care providers for its population. Which agency is the best fit?

- A. HRSA
- B. FDA
- C. CMS, because it pays for every visit in the county.
- D. CDC

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

4.

A 67-year-old retired teacher with a pension of \$4,100 a month and a paid-off house asks a case manager which public program is her main health coverage now. She volunteers at her church twice a week. Which program is it?

- A. CHIP
- B. Medicare
- C. Medicaid
- D. Neither, because her pension is too high for public coverage.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

5. [TRANSFER — reversed stem / different variable]

A 34-year-old single father working part-time has income below his state's limit and no employer insurance. Which program is he most likely to qualify for?

- A. No public program, because adults without children under 18 never qualify.
- B. Medicare
- C. Medicaid
- D. Medicare Part D

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

6.

A human services worker is writing a note about a client who uses a wheelchair after a spinal cord injury. The client lives in a second-floor apartment in a building with no elevator and wants to return to his job at a call center. He moved to the city two years ago. Which approach reflects current disability practice?

- A. Focus the plan on helping him adjust to the new city.
- B. Conclude he cannot return to work because of his injury.
- C. Describe him as a wheelchair-bound paraplegic so other staff understand the case quickly.
- D. Describe him as a man who uses a wheelchair and explore housing and workplace accommodations that remove barriers.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

7.

At a first meeting, a young mother who was referred by her child's school sits with her arms crossed and says past workers "never came back." The office is bright and newly renovated. Which step best starts building trust?

- A. Promise to solve all her housing and school problems this month.
- B. Point out the new office to show the agency has changed.
- C. Promise that everything she says will stay completely private.
- D. Listen to her concerns, explain what you can and cannot keep confidential, and make one small promise you then keep.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

8.

A worker helping a client leave a shelter thinks the client should move near family in another town, where rent is lower. The client wants to stay in the city near her job and friends. The shelter has a waiting list of 40 people. What should the worker do?

- A. Refer her to a financial counselor and hold the housing plan until her budget is fixed.
- B. Support the client's goal of staying in the city and build the plan around her job and support network.
- C. Arrange the move near family because the lower rent is clearly better for her.
- D. Tell her she must choose quickly because of the waiting list.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

9.

A client who drinks heavily says, "I've been wondering if the drinking is why I keep missing work, but I'm not sure I want to quit." He has two teenage children and coaches youth soccer. Which response fits his stage?

- A. Provide basic facts about alcohol because he does not yet see any problem.
- B. Give him a detailed plan with a quit date for next Monday.
- C. Tell him his children will suffer if he does not quit now.
- D. Help him weigh the pros and cons of drinking and of changing.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

10. [TRANSFER — reversed stem / different variable]

A client tells her worker, “I bought nicotine patches and picked a quit day next week.” Which stage of change is she in?

- A.** Maintenance
- B.** Contemplation
- C.** Preparation
- D.** Action

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

11.

During a home visit, a 10-year-old tells a family support worker that his stepfather hits him with a belt and begs her not to tell anyone. The family has been in the program for a year and has made good progress on budgeting. What must the worker do?

- A.** Keep the secret to protect the child’s trust.
- B.** Investigate further until she has proof, then report.
- C.** Report the suspected abuse to child protective services as required, even though the child asked for secrecy.
- D.** Wait, since the family is making good progress in the program.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

12. [TRANSFER — reversed stem / different variable]

Which situation creates a legal duty for a human services worker to break confidentiality?

- A.** A dependent older adult says her caregiver takes her money and leaves her without food.
- B.** Any time a client shares something the worker finds upsetting.
- C.** A client says she is angry at her landlord.
- D.** An adult client says he used marijuana last month.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

STOP

Answers and dissection follow. Finish every item and every strip first.

Key and dissection

Struck-through text is the camouflage: facts that do not decide the item.

1. Answer A Concept 1

A community health worker ~~at a busy urban outreach program, who speaks three languages,~~ visits a client with high blood pressure. The client says the new pill makes him dizzy and asks her to tell him whether to cut it in half. ~~Her agency has a van that can drive clients to appointments.~~ What should the worker do?

Target word: action within role **Decides:** Changing a dose is a clinical decision outside her scope.

A	Correct	She coordinates and refers; the prescriber decides on dosing.
B	Inverted operation	Makes the clinical decision the worker is not licensed to make.
C	Camouflage	Seizes on the van detail; mild dizziness reported calmly calls for contacting the prescriber, not an ED trip.
D	Absolute language	“Any side effect” is absolute and still a clinical call outside her role.

2. Answer B Concept 2

A county health office notices a sharp rise in foodborne illness tied to a packaged salad sold in several states. ~~The county director has worked in public health for 25 years and recently won a state award.~~ Which federal agency regulates the safety of the food product itself?

Target word: agency for product safety **Decides:** The question is about the safety of a food product, not tracking cases or paying for care.

A	Adjacent category	CMS runs Medicare and Medicaid payment, not food safety.
B	Correct	FDA regulates the safety of most packaged foods, drugs, and medical devices.
C	Confusion set	CDC investigates and tracks the outbreak, but product regulation belongs to FDA.
D	Confusion set	SAMHSA funds mental health and substance use services.

3. Answer A Concept 2 · transfer

A rural clinic wants federal help because the county has too few primary care providers for its population. Which agency is the best fit?

Target word: agency for underserved access — reversed from function to agency **Decides:** Provider shortage and underserved areas are HRSA’s focus.

A	Correct	HRSA designates shortage areas and supports health centers and workforce programs for underserved communities.
B	Adjacent category	FDA regulates products, not provider supply.
C	Absolute language	CMS pays for Medicare and Medicaid claims, not every visit, and does not address workforce shortages.
D	Confusion set	CDC focuses on disease prevention and surveillance, not staffing clinics.

4. Answer B Concept 3

A 67-year-old retired teacher with a pension of \$4,100 a month and a paid-off house asks a case manager which public program is her main health coverage now. ~~She volunteers at her church twice a week.~~ Which program is it?

Target word: program based on eligibility **Decides:** Age 67 qualifies her for Medicare regardless of income.

A	Adjacent category	CHIP covers children in families above Medicaid limits.
B	Correct	Medicare covers people 65 and older, whatever their income.
C	Inverted operation	Medicaid is based mainly on income; her pension and assets point away from it.
D	Wrong stem number	Treats the income figure as deciding; Medicare eligibility does not depend on income.

5. Answer C Concept 3 • transfer

A 34-year-old single father working part-time has income below his state's limit and no employer insurance. Which program is he most likely to qualify for?

Target word: eligibility — solve from income instead of age **Decides:** Income-based eligibility under age 65.

A	Absolute language	He has a child, and many states cover low-income adults; "never" is false.
B	Inverted operation	Medicare is based on age 65 or disability, not low income.
C	Correct	Medicaid is the income-based federal-state program.
D	Confusion set	A drug benefit within Medicare, which he does not qualify for by age.

6. Answer D Concept 4

A human services worker is writing a note about a client who uses a wheelchair after a spinal cord injury. The client lives in a second-floor apartment in a building with no elevator and wants to return to his job at a call center. ~~He moved to the city two years ago.~~ Which approach reflects current disability practice?

Target word: framing disability **Decides:** Function in context: the barrier is the stairs, not the person.

A	Camouflage	The move two years ago is not the barrier being asked about.
B	Absolute language	Assumes the diagnosis decides function; call center work can be accommodated.
C	Confusion set	Label-first wording defines him by the diagnosis.
D	Correct	Person-first language and focus on changing the environment.

7. Answer D Concept 5

At a first meeting, a young mother who was referred by her child's school sits with her arms crossed and says past workers "never came back." ~~The office is bright and newly renovated.~~ Which step best starts building trust?

Target word: first step to trust **Decides:** Past broken promises; trust comes from reliability and honest limits.

A	Inverted operation	Overpromising repeats the pattern that broke her trust.
B	Camouflage	The renovated office is scenery, not a trust-building action.
C	Absolute language	Confidentiality has limits, such as mandated reporting; promising total secrecy breaks trust later.
D	Correct	Active listening, honesty about limits, and follow-through build trust.

8. Answer B Concept 6

A worker helping a client leave a shelter thinks the client should move near family in another town, where rent is lower. The client wants to stay in the city near her job and friends. ~~The shelter has a waiting list of 40 people.~~ What should the worker do?

Target word: who sets the goal **Decides:** Client self-determination.

A	Dropped element	Leaves out the client's stated goal and delays her plan.
B	Correct	Client-centered practice lets the client set goals and builds on her strengths.
C	Inverted operation	The worker substitutes her own goal for the client's.
D	Camouflage	The waiting list pressures the timeline but does not change who sets the goal.

9. Answer D Concept 7

A client who drinks heavily says, "I've been wondering if the drinking is why I keep missing work, but I'm not sure I want to quit." ~~He has two teenage children and coaches youth soccer.~~ Which response fits his stage?

Target word: intervention matched to stage **Decides:** Ambivalence — contemplation.

A	Confusion set	That fits precontemplation; he already sees a possible link.
B	Inverted operation	An action-stage tool for someone still deciding.
C	Absolute language	Pressure and scare tactics raise resistance at any stage.
D	Correct	Contemplation calls for exploring ambivalence.

10. Answer C Concept 7 · transfer

A client tells her worker, "I bought nicotine patches and picked a quit day next week." Which stage of change is she in?

Target word: name the stage from behavior **Decides:** Concrete plan and steps taken, not yet quit.

A	Adjacent category	Maintenance is sustaining a change for six months or more.
B	Confusion set	Contemplation is still weighing; she has already decided.
C	Correct	She has a plan and has taken small steps toward action.
D	Inverted operation	Action begins when the behavior actually changes; her quit day is next week.

11. Answer C Concept 8

During a home visit, a 10-year-old tells a family support worker that his stepfather hits him with a belt and begs her not to tell anyone. ~~The family has been in the program for a year and has made good progress on budgeting.~~ What must the worker do?

Target word: duty when a child discloses harm **Decides:** Suspected child abuse triggers mandated reporting.

A	Inverted operation	Confidentiality does not cover suspected abuse.
B	Dropped element	Reporters need reasonable suspicion, not proof; investigation is the agency's role.
C	Correct	Mandated reporting overrides confidentiality when a child may be harmed.
D	Camouflage	Program progress does not change the reporting duty.

12. Answer A Concept 8 · transfer

Which situation creates a legal duty for a human services worker to break confidentiality?

Target word: reverse: which fact triggers the duty **Decides:** Suspected abuse of a vulnerable adult.

A	Correct	Suspected abuse or neglect of a vulnerable adult is reportable.
B	Absolute language	Only specific legal triggers override confidentiality.
C	Confusion set	Anger without a threat of harm is not reportable.
D	Adjacent category	Past personal substance use is private information, not a reporting trigger.

Triage grid

Write each item number in the box it belongs to.

	Right	Wrong
Sure	Owned.	Concept inversion — top priority. A wrong mental model; it survives rewording.
Unsure / guess	Recognition, not mastery. Re-drill with the transfer.	Not learned yet.

Trap tally

For every miss, find the letter you chose in the key and tally its trap. The biggest number is the pattern to drill.

Trap	What it does	In this drill	Your misses
Dropped element	Leaves out a required term or step.	2	
Wrong stem number	A figure copied from the prompt that is not the answer.	1	
Adjacent category	The right idea in the wrong bucket.	5	
Inverted operation	Direction flipped: add/subtract, cause/effect, higher/lower.	8	
Absolute language	Always, never, guarantee — where judgment applies.	7	
Confusion set	Every option is real; the test is exact role-matching.	8	
Camouflage	Answers a stem fact that was never the question.	5	

Anchor rows — the concept list

One row per concept: the rule to lock in, the trap that catches people, and the tell in the question that signals it.

#	Concept	Rule	Trap	Tell
1	Scope of practice for HHS professionals	Case managers and community health workers assess needs, coordinate services, educate, and refer; they do not diagnose, prescribe, or change a treatment plan.	Stepping in to adjust a medication or diagnose because the client trusts you.	A client asks a non-licensed worker to change, stop, or interpret a clinical treatment.
2	Which federal agency does what	CDC tracks and prevents disease; CMS runs Medicare and Medicaid payment; FDA regulates drugs, devices, and food safety; SAMHSA funds mental health and substance use services; HRSA supports care for underserved areas.	Assuming CDC pays for care or FDA runs insurance programs.	A problem that names a function: surveillance, payment, product safety, behavioral health, or shortage areas.
3	Medicare vs. Medicaid eligibility	Medicare is federal insurance for people 65 and older or with qualifying disability or end-stage renal disease; Medicaid is a joint federal-state program based mainly on income.	Thinking Medicare is for low-income people or that Medicaid is only for seniors.	Age 65, a disability, or an income level in the client profile.
4	Disability as function in context	Disability is a functional limitation that interacts with the environment; use person-first language and look for reasonable accommodations rather than defining the person by a diagnosis.	Treating a diagnosis label as a full description of what a client can and cannot do.	Wording like “the diabetic” or “the disabled client,” or a question about accommodations.
5	Building trust with clients	Trust is built through active listening, reliability, follow-through on small promises, and being honest about the limits of confidentiality at the start.	Promising total secrecy or quick fixes to win the client over.	A first meeting, a guarded client, or a promise the worker may not be able to keep.
6	Client-centered, strengths-based engagement	The client sets the goals and the worker builds on the client’s existing strengths and resources; self-determination is respected even when the worker would choose differently.	Writing the plan for the client because the worker knows the system better.	Who chooses the goal, or a client choice the worker disagrees with.

#	Concept	Rule	Trap	Tell
7	Stages of change	Match the approach to the client's readiness: precontemplation needs awareness and rapport, contemplation needs help weighing pros and cons, preparation needs a concrete plan, action needs support.	Handing an action plan to someone who does not yet see a problem.	Client statements like "I don't see an issue" vs. "I've been thinking about it" vs. "I start Monday."
8	Limits of confidentiality: mandated reporting	Suspected abuse or neglect of a child or vulnerable adult must be reported to the proper authority even when the client asks the worker to keep it secret.	Believing confidentiality always wins, or that the worker must prove abuse before reporting.	A disclosure of harm to a child or dependent adult paired with a request for secrecy.

Course scope (public description): Introduction to Health and Human Services explores representative roles and responsibilities of health and human service professionals and key governmental entities involved in Health and Human Services delivery. The course also examines the importance of understanding clients' illnesses and disabilities, building trust with clients, and engagement models that promote client outcomes. There are no prerequisites for this course.
