Managing Resources in an Era of Disruption

Armored Drill

8 concepts · 12 items · 4 transfer items

What this is. Every concept in this course's public description, re-asked with more disguise than a practice test uses. Each stem carries facts that do not decide it. Every wrong answer is a named trap.

Source. Scope from the course's public description in the WGU Institutional Catalog (September 2026); items written from the field's standard body of knowledge. No WGU assessment item, course material or proprietary content is used or reproduced. Not affiliated with or endorsed by Western Governors University.

Method © 2026 Erik Daniel Lindquist — Course Mastery Coach, armored drill. Items drafted with AI assistance under his direction.

How to run it

Paper first. Pencil. One pass, no notes, a timer if you want the pressure.

1. **Before you read the options**, fill the strip under the item: the target word (what is actually being asked), and the one fact in the stem that decides it.
2. **Principle before arithmetic**. Name the rule, then compute.
3. **Camouflage**. Most of every stem does not matter. Ask: which single fact decides this?
4. **Inverse pairs are the bait**. If two options are opposites, one of them is the trap built for you.
5. **Mark sure, unsure or guess** honestly. Sure-and-wrong is the most valuable miss on the page — it is a wrong mental model.
6. **Absolutes** (always, never, guarantee) are usually wrong. And recognizing an answer is not the same as owning it.
7. Items with a **heavy black bar** on the left are **transfer items**: the same principle, reversed or solved for a different variable.
8. Stop at the STOP page. Then grade, fill the triage grid, and tally the traps you fell for. The biggest tally is what you drill next.

The strip, filled in, looks like this:

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	_____	

Items

1.

A radiology director at a hospital that recently rebranded wants to replace an MRI scanner for \$1.2 million. The scanner is expected to last 10 years. The department's supply spending runs about \$40,000 a month and the director has two assistants. In which budget does the MRI purchase belong?

- A. The capital budget.
- B. The operating budget.
- C. The cash budget only.
- D. The supply line of the operating budget, since it is used by the same department.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

2.

A new observation unit needs one RN on duty at all times, 24 hours a day, 365 days a year. The unit has 12 beds and fresh paint, and the manager used to work in the ICU. Ignoring vacation and sick time, about how many FTEs are needed for this one position?

- A. 1.0 FTE
- B. 12 FTEs
- C. 3.0 FTEs
- D. About 4.2 FTEs

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

3. [TRANSFER — reversed stem / different variable]

A clinic has 2.5 FTEs budgeted for medical assistants. How many paid hours a year does that represent?

- A. 100 hours
- B. 832 hours
- C. 5,200 hours
- D. 2,080 hours

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

4.

A primary care group signs a capitation contract paying \$40 per member per month for 5,000 members. Last year, under fee-for-service, it billed 18,000 visits. The group's medical director is very popular with patients. What annual revenue does the contract provide?

- A. \$720,000
- B. \$2,400,000
- C. It depends on how many visits members make.
- D. \$200,000

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

5. [TRANSFER — reversed stem / different variable]

A capitation contract pays \$1,800,000 a year for 3,000 members. What is the per-member-per-month rate?

- A. \$600
- B. \$150,000
- C. \$50
- D. \$7,200

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

6.

Over one week, a 30-bed medical unit with a newly renovated nurses' station logged 1,800 nursing care hours and 300 patient days. The unit's patient satisfaction score rose 5 points this quarter. What were its nursing hours per patient day?

- A. 8.6
- B. 60
- C. 0.17
- D. 6.0

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

7. [TRANSFER — reversed stem / different variable]

A unit's staffing target is 8 nursing hours per patient day and it expects an average of 25 patients a day. How many nursing care hours should it staff each day?

- A.** 33 hours
- B.** 200 hours
- C.** 8 hours per nurse, regardless of census.
- D.** 3.1 hours

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

8.

A hospital began the year with 110 RNs and ended with 130 RNs after a recruiting campaign featured on local TV. During the year 18 RNs left and 38 were hired. The hospital also opened a new parking garage. What was the RN turnover rate?

- A.** About 31.7%
- B.** About 47%
- C.** About 13.8%
- D.** 15%

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

9.

An experienced nurse on a busy surgical unit that recently moved to a new building skipped the second-person check for an insulin dose because “everyone does it when we're short.” The dose was correct and the patient was not harmed. The nurse is a preceptor for new graduates. Under just culture, what is the appropriate response?

- A.** No action, because the patient was not harmed.
- B.** Disciplinary action, as for reckless behavior.
- C.** Coach the nurse and examine why the shortcut became common on the unit.
- D.** Remove the nurse's preceptor role immediately.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

10. [TRANSFER — reversed stem / different variable]

Under just culture, which behavior warrants remedial or disciplinary action?

- A.** A nurse knowingly turns off a required alarm to avoid noise, despite being told the risk.
- B.** A nurse follows a common unit shortcut without seeing the risk.
- C.** A nurse transposes two digits while entering a dose.
- D.** Any error that causes serious harm.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

11.

A health system with 22 clinics and a new logo is revising its statements. One draft reads: “To be the healthiest region in the state by 2035.” The board chair is a retired banker. Which type of statement is this draft?

- A.** A mission statement.
- B.** A vision statement.
- C.** A strategic objective, because it has a date.
- D.** A values statement.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

12.

Engagement scores on a cardiac unit with a view of the river are low. Nurses report fair pay and good equipment but say their ideas are never acted on and there is no path to grow. The unit's manager has worked there for nine years. Which approach best fits Herzberg's theory?

- A.** Build recognition, shared governance, and career-growth opportunities.
- B.** Upgrade the unit's equipment.
- C.** Give an across-the-board pay raise.
- D.** Replace the manager because of long tenure.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

STOP

Answers and dissection follow. Finish every item and every strip first.

Key and dissection

Struck-through text is the camouflage: facts that do not decide the item.

1. Answer A Concept 1

A radiology director at a hospital that recently rebranded wants to replace an MRI scanner for \$1.2 million. The scanner is expected to last 10 years. ~~The department's supply spending runs about \$40,000 a month and the director has two assistants.~~ In which budget does the MRI purchase belong?

Target word: budget type **Decides:** Large cost with a multi-year useful life.

A	Correct	Major long-lived equipment is a capital expenditure.
B	Adjacent category	The operating budget covers recurring annual expenses such as supplies and salaries.
C	Confusion set	The cash budget tracks timing of cash, not the category of the purchase.
D	Camouflage	Answers the monthly supply detail; department does not decide budget type.

2. Answer D Concept 2

A new observation unit needs one RN on duty at all times, 24 hours a day, 365 days a year. ~~The unit has 12 beds and fresh paint, and the manager used to work in the ICU.~~ Ignoring vacation and sick time, about how many FTEs are needed for this one position?

Target word: FTEs for 24/7 coverage **Decides:** 8,760 hours a year / 2,080 hours per FTE.

A	Absolute language	One full-time nurse covers only 2,080 of 8,760 hours.
B	Camouflage	Uses the bed count, which does not set the staffing math for one position.
C	Dropped element	One person per 8-hour shift ignores that each FTE works only 40 of the week's 168 hours.
D	Correct	$24 \times 365 = 8,760$ hours; $8,760 / 2,080 \approx 4.2$ FTEs.

3. Answer C Concept 2 · transfer

A clinic has 2.5 FTEs budgeted for medical assistants. How many paid hours a year does that represent?

Target word: solve for hours **Decides:** Hours = FTE $\times$ 2,080.

A	Wrong stem number	Uses a 40-hour week instead of a 2,080-hour year.
B	Inverted operation	Divides 2,080 by 2.5.
C	Correct	$2.5 \times 2,080 = 5,200$ hours.
D	Dropped element	That is one FTE, not 2.5.

4. Answer B Concept 3

A primary care group signs a capitation contract paying \$40 per member per month for 5,000 members. ~~Last year, under fee-for-service, it billed 18,000 visits. The group's medical director is very popular with patients.~~ What annual revenue does the contract provide?

Target word: annual capitation revenue **Decides:** $\$40 \times 5,000 \times 12$.

A	Camouflage	Multiplies the old visit count by \$40, which does not apply under capitation.
B	Correct	$\$40 \times 5,000 = \$200,000$ a month; $\times 12 = \$2,400,000$.
C	Confusion set	That describes fee-for-service; capitation is fixed per member.
D	Dropped element	One month only; leaves out the $\times 12$.

5. Answer C Concept 3 · transfer

A capitation contract pays \$1,800,000 a year for 3,000 members. What is the per-member-per-month rate?

Target word: solve for PMPM **Decides:** $\$1,800,000 / 3,000 / 12$.

A	Dropped element	The annual per-member amount; not divided by 12.
B	Adjacent category	That is the monthly total for all members.
C	Correct	$\$1,800,000 / 3,000 = \600 a year; $/ 12 = \$50$.
D	Inverted operation	Multiplies by 12 instead of dividing.

6. Answer D Concept 4

Over one week, a 30-bed medical unit ~~with a newly renovated nurses' station~~ logged 1,800 nursing care hours and 300 patient days. ~~The unit's patient satisfaction score rose 5 points this quarter.~~ What were its nursing hours per patient day?

Target word: HPPD **Decides:** $1,800 \text{ hours} / 300 \text{ patient days}$.

A	Adjacent category	Divides 1,800 hours by 7 days and then by 30 beds, mixing a per-bed measure with patient days.
B	Wrong stem number	Divides by the 30 beds instead of patient days.
C	Inverted operation	Divides patient days by hours.
D	Correct	$1,800 / 300 = 6.0$ hours per patient day.

7. Answer B Concept 4 · transfer

A unit's staffing target is 8 nursing hours per patient day and it expects an average of 25 patients a day. How many nursing care hours should it staff each day?

Target word: solve for hours **Decides:** $\text{Hours} = \text{HPPD} \times \text{patient days}$.

A	Dropped element	Adds the two numbers instead of multiplying.
B	Correct	$8 \times 25 = 200$ hours.
C	Absolute language	HPPD scales with the number of patients.
D	Inverted operation	Divides 25 by 8.

8. Answer D Concept 5

A hospital began the year with 110 RNs and ended with 130 RNs after a recruiting campaign ~~featured on local TV~~. During the year 18 RNs left and 38 were hired. ~~The hospital also opened a new parking garage.~~ What was the RN turnover rate?

Target word: turnover percent **Decides:** $18 \text{ separations} / \text{average headcount of } 120$.

A	Adjacent category	Uses hires (38) as if they were separations.
B	Confusion set	Divides separations by hires.
C	Wrong stem number	Divides by the ending headcount of 130.
D	Correct	Average headcount $(110 + 130) / 2 = 120$; $18 / 120 = 15\%$.

9. Answer C Concept 6

An experienced nurse on a busy surgical unit ~~that recently moved to a new building~~ skipped the second-person check for an insulin dose because “everyone does it when we're short.” The dose was correct and the patient was not harmed. ~~The nurse is a preceptor for new graduates.~~ Under just culture, what is the appropriate response?

Target word: response to the behavior **Decides:** Drift into a shortcut believed to be justified = at-risk behavior.

A	Dropped element	Just culture judges the behavior, not only the outcome.
B	Adjacent category	Reckless behavior is conscious disregard of a known, substantial risk, not normalized drift.
C	Correct	At-risk behavior is coached, and system drivers are addressed.
D	Camouflage	Reacts to the preceptor detail rather than the behavior category.

10. Answer A Concept 6 · transfer

Under just culture, which behavior warrants remedial or disciplinary action?

Target word: reverse: behavior from response **Decides:** Reckless = conscious disregard of substantial, unjustifiable risk.

A	Correct	Conscious disregard of a known risk is reckless behavior.
B	Adjacent category	That is at-risk behavior, which is coached.
C	Inverted operation	An unintended slip is human error, which is consoled.
D	Absolute language	Just culture responds to the behavior, not the severity of the outcome.

11. Answer B Concept 7

A health system ~~with 22 clinics and a new logo~~ is revising its statements. One draft reads: “To be the healthiest region in the state by 2035.” ~~The board chair is a retired banker.~~ Which type of statement is this draft?

Target word: statement type **Decides:** A future aspiration.

A	Confusion set	A mission states current purpose and whom the organization serves.
B	Correct	It describes a desired future state.
C	Dropped element	A date alone does not make it a measurable objective; it has no measure or owner.
D	Adjacent category	Values name guiding principles like integrity or compassion.

12. Answer A Concept 8

Engagement scores on a cardiac unit ~~with a view of the river~~ are low. Nurses report fair pay and good equipment but say their ideas are never acted on and there is no path to grow. ~~The unit's manager has worked there for nine years.~~ Which approach best fits Herzberg's theory?

Target word: which factor to change **Decides:** Hygiene factors are adequate; motivators are missing.

A	Correct	Motivators such as recognition and growth drive engagement.
B	Adjacent category	Working conditions are hygiene factors, which staff already rate well.
C	Inverted operation	Pay is a hygiene factor; it prevents dissatisfaction but does not motivate.
D	Camouflage	Tenure does not decide the fix; missing motivators do.

Triage grid

Write each item number in the box it belongs to.

	Right	Wrong
Sure	Owned.	Concept inversion — top priority. A wrong mental model; it survives rewording.
Unsure / guess	Recognition, not mastery. Re-drill with the transfer.	Not learned yet.

Trap tally

For every miss, find the letter you chose in the key and tally its trap. The biggest number is the pattern to drill.

Trap	What it does	In this drill	Your misses
Dropped element	Leaves out a required term or step.	7	
Wrong stem number	A figure copied from the prompt that is not the answer.	3	
Adjacent category	The right idea in the wrong bucket.	8	
Inverted operation	Direction flipped: add/subtract, cause/effect, higher/lower.	6	
Absolute language	Always, never, guarantee — where judgment applies.	3	
Confusion set	Every option is real; the test is exact role-matching.	4	
Camouflage	Answers a stem fact that was never the question.	5	

Anchor rows — the concept list

One row per concept: the rule to lock in, the trap that catches people, and the tell in the question that signals it.

#	Concept	Rule	Trap	Tell
1	Operating vs. capital budgets	The operating budget covers day-to-day revenue and expenses for the year (salaries, supplies); the capital budget covers major long-lived purchases above a cost threshold (equipment, buildings).	Placing a large, multi-year equipment purchase in the operating budget.	An item's cost and useful life.
2	FTE calculation	One full-time equivalent = 2,080 paid hours a year (40 × 52); FTEs needed = hours of coverage / 2,080.	Counting positions or people instead of hours, or covering 24/7 with one FTE per shift.	Hours of coverage needed per day or year.
3	Capitation and payment models	Under capitation, the provider receives a fixed per-member-per-month (PMPM) payment regardless of services used; annual revenue = PMPM × members × 12. Fee-for-service pays per service.	Assuming more visits increase revenue under capitation.	A PMPM rate and a member count.
4	Nursing hours per patient day (HPPD)	HPPD = total nursing care hours / patient days; used to compare staffing across units and time and to plan staffing.	Dividing by the number of beds or by staff headcount.	Nursing hours and a patient census or patient days.
5	Turnover rate	Turnover rate = separations during the period / average headcount for the period × 100.	Dividing by the ending headcount or by hires.	Number who left plus headcounts at the start and end of a year.
6	Just culture responses	Console human error, coach at-risk behavior (a drift where risk is not recognized or is believed justified), and apply remedial or disciplinary action for reckless behavior (conscious disregard of substantial risk).	Punishing by outcome severity instead of the behavior.	An error described with whether the person knew and chose to ignore a risk.
7	Mission, vision, and values	Mission = why the organization exists and whom it serves now; vision = the future it aims to achieve; values = the principles that guide behavior and decisions.	Mixing up the present-tense mission with the future-focused vision.	A statement's tense and focus (purpose now vs. aspiration later vs. principles).
8	Herzberg's two-factor theory	Hygiene factors (pay, policies, working conditions, supervision) prevent dissatisfaction but do not motivate; motivators (achievement, recognition, growth, meaningful work) build engagement.	Expecting a pay raise alone to create lasting engagement.	A plan to improve engagement that lists only pay or conditions.

Course scope (public description): Managing Human and Financial Resources in an Era of Disruption examines the main premise of people and fiscal leadership. This includes the promotion of healthy work environments through the development of programs in support of mitigating behavior problems for the betterment of work-life balance. Students will analyze business model budgets, revenue streams, and human and financial resource allocation, develop training programs to evaluate compliance and regulatory requirement, and create team building experiences to promote high performing teams by improving engagement, establishing trust, and achieving common goals. Students will assess an organization's mission, vision, and values to establish alignment between healthcare improvement and an organization's principles for management. Changes in healthcare are inevitable, as the business success strategies used in the past are not sufficient for surviving in an era of persistent disruption. This course will help students develop the skills nurse leaders need to become partners in recommending innovative strategies that promote value-based healthcare for the future.
