Personalized Learning for Inclusive Classrooms

Armored Drill

8 concepts · 12 items · 4 transfer items

What this is. Every concept in this course's public description, re-asked with more disguise than a practice test uses. Each stem carries facts that do not decide it. Every wrong answer is a named trap.

Source. Scope from the course's public description in the WGU Institutional Catalog (September 2026); items written from the field's standard body of knowledge. No WGU assessment item, course material or proprietary content is used or reproduced. Not affiliated with or endorsed by Western Governors University.

Method © 2026 Erik Daniel Lindquist — Course Mastery Coach, armored drill. Items drafted with AI assistance under his direction.

How to run it

Paper first. Pencil. One pass, no notes, a timer if you want the pressure.

1. **Before you read the options**, fill the strip under the item: the target word (what is actually being asked), and the one fact in the stem that decides it.
2. **Principle before arithmetic**. Name the rule, then compute.
3. **Camouflage**. Most of every stem does not matter. Ask: which single fact decides this?
4. **Inverse pairs are the bait**. If two options are opposites, one of them is the trap built for you.
5. **Mark sure, unsure or guess** honestly. Sure-and-wrong is the most valuable miss on the page — it is a wrong mental model.
6. **Absolutes** (always, never, guarantee) are usually wrong. And recognizing an answer is not the same as owning it.
7. Items with a **heavy black bar** on the left are **transfer items**: the same principle, reversed or solved for a different variable.
8. Stop at the STOP page. Then grade, fill the triage grid, and tally the traps you fell for. The biggest tally is what you drill next.

The strip, filled in, looks like this:

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	_____	

Items

1.

A student with a diagnosis of type 1 diabetes performs at grade level in all subjects but needs to check blood sugar and eat snacks during class. She is on the swim team and her older brother attends the same school. Which plan is most likely appropriate?

- A. A Section 504 plan with health accommodations.
- B. A gifted education plan.
- C. An IEP under IDEA, because she has a diagnosis.
- D. No plan, since she is an athlete and clearly healthy.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

2. [TRANSFER — reversed stem / different variable]

A student has a documented learning disability in reading and needs specially designed reading instruction from a specialist, not just extra time. Which framework applies?

- A. A behavior intervention plan.
- B. An IEP under IDEA.
- C. A 504 plan, since 504 always covers learning disabilities.
- D. Tier 1 core instruction only.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

3.

A team is deciding placement for a student with a mild intellectual disability who makes progress in a general education class when given visual supports and a paraeducator for part of the day. The school has a new special education wing with bright classrooms. What does least restrictive environment suggest?

- A. Remove all supports so the student is fully included.
- B. Place the student in a separate class because of the disability category.
- C. Move the student to the new wing because the rooms are nicer.
- D. Keep the student in general education with the supports that are working.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

4. [TRANSFER — reversed stem / different variable]

Which situation would most justify considering a more restrictive setting under LRE?

- A.** The student has a disability label.
- B.** Data show the student is not making progress even with well-implemented supports and aids in general education.
- C.** The general education teacher prefers a smaller class.
- D.** The special education room has open seats.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

5.

A fifth grader with dyslexia takes the same science test as classmates, but the questions are read aloud to him. His favorite subject is art, and the test is on Tuesday morning. What kind of support is this?

- A.** An accommodation
- B.** A modification
- C.** Unfair, because every student must take tests the same way.
- D.** An intervention

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

6. [TRANSFER — reversed stem / different variable]

Which support is a modification rather than an accommodation?

- A.** The student gets extended time on the same test.
- B.** The student sits near the front of the room.
- C.** The student uses a graphic organizer for the same assignment.
- D.** The student is graded on a reduced set of standards, adding only single-digit numbers while classmates add multi-digit numbers.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

7.

A school team is preparing a student's first IEP meeting. The school counselor has a busy calendar, and the meeting room was recently remodeled. How should the team involve the parents?

- A. Schedule around the counselor's calendar only.
- B. Write the full IEP first and ask the parents to sign it.
- C. Invite the parents at a mutually convenient time, ask for their input on goals, and treat them as full team members.
- D. Hold the meeting without parents to save time.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

8.

Fall screening shows 4 of 25 students in a well-run second-grade class are below benchmark in reading. The class is on the second floor, and the teacher has taught for six years. What is the most appropriate next step for these 4 students?

- A. Continue core instruction and add targeted small-group Tier 2 support, monitoring progress.
- B. Refer all 4 immediately to special education.
- C. Pull the 4 from core reading and give only intervention.
- D. Rewrite the core curriculum for the whole class.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

9. [TRANSFER — reversed stem / different variable]

After 10 weeks of Tier 2 small-group support, a student's progress data show almost no growth. What does MTSS suggest next?

- A. Keep Tier 2 unchanged for the rest of the year.
- B. Return the student to Tier 1 only.
- C. MTSS must be completed before any evaluation can ever occur.
- D. Provide more intensive, individualized Tier 3 support and consider whether an evaluation is warranted.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

10.

A sixth-grade class is studying persuasive writing. Several students love sports, some love animals, and a few are in the school band that practices Thursdays. Which approach best reflects personalized learning?

- A.** Put each student on a software program alone for the unit.
- B.** Keep the same persuasive-writing goal and let students choose topics tied to their interests, with check-ins to set their own next steps.
- C.** Assign different goals to different interest groups.
- D.** Cancel Thursday writing time for band students.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

11.

A fourth grader solves math puzzles two grade levels ahead and explains complex science ideas aloud, but his written work is short and messy. He rides the bus and loves chess. What should the teacher consider?

- A.** He cannot have a disability because he is advanced.
- B.** Remove him from advanced math until his writing improves.
- C.** He may be twice-exceptional; request evaluation of the writing difficulty while also providing advanced challenge.
- D.** Give him extra chess time as enrichment.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

12.

A family whose home language is Vietnamese has not responded to three English-language notes about their child's reading. The child is a kind and helpful classmate, and the family lives near the school. What should the teacher do next?

- A.** Ask the child to translate a report about her own difficulties.
- B.** Send a fourth note in English marked urgent.
- C.** Reach out in Vietnamese with an interpreter, share strengths first, and ask the family what they notice at home.
- D.** Stop by the family's home unannounced since they live nearby.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

STOP

Answers and dissection follow. Finish every item and every strip first.

Key and dissection

Struck-through text is the camouflage: facts that do not decide the item.

1. Answer A Concept 1

A student with a diagnosis of type 1 diabetes performs at grade level in all subjects but needs to check blood sugar and eat snacks during class. ~~She is on the swim team and her older brother attends the same school.~~ Which plan is most likely appropriate?

Target word: IDEA vs. 504 **Decides:** Needs accommodations, not specially designed instruction.

A	Correct	The condition limits a major life activity but does not require specialized instruction.
B	Adjacent category	Gifted services address advanced ability, not health needs.
C	Absolute language	A diagnosis alone does not create IDEA eligibility.
D	Camouflage	Swimming does not remove her documented need.

2. Answer B Concept 1 • transfer

A student has a documented learning disability in reading and needs specially designed reading instruction from a specialist, not just extra time. Which framework applies?

Target word: reverse: need for specialized instruction **Decides:** Specially designed instruction points to IDEA.

A	Adjacent category	Addresses behavior, not a reading disability.
B	Correct	IDEA provides specially designed instruction through an IEP.
C	Inverted operation	504 provides access; specialized instruction points to IDEA.
D	Dropped element	Drops the documented need for specialized instruction.

3. Answer D Concept 2

A team is deciding placement for a student with a mild intellectual disability who makes progress in a general education class when given visual supports and a paraeducator for part of the day. ~~The school has a new special education wing with bright classrooms.~~ What does least restrictive environment suggest?

Target word: LRE placement **Decides:** The student progresses in general education with supports.

A	Inverted operation	Inclusion means placement with needed supports, not without them.
B	Adjacent category	Placement follows individual need, not the label.
C	Camouflage	Facilities do not decide placement.
D	Correct	LRE favors the general setting when the student succeeds there with supports.

4. Answer B Concept 2 • transfer

Which situation would most justify considering a more restrictive setting under LRE?

Target word: reverse: when a more separate setting is appropriate **Decides:** Supports in the general setting have been tried and data show lack of progress.

A	Absolute language	A label alone never determines placement.
B	Correct	LRE allows more separate settings only when supports in the general setting are not enough.
C	Adjacent category	Staff preference is not a legal basis.
D	Confusion set	Availability is not individual need.

5. Answer A Concept 3

A fifth grader with dyslexia takes the same science test as classmates, but the questions are read aloud to him. ~~His favorite subject is art, and the test is on Tuesday morning.~~ What kind of support is this?

Target word: accommodation vs. modification **Decides:** Same content and standard; access changed.

A	Correct	It changes how he accesses the test, not what is measured.
B	Confusion set	Modifications change what is expected or measured.
C	Absolute language	Equity means access, not identical conditions.
D	Adjacent category	Interventions teach skills; this supports access during testing.

6. Answer D Concept 3 · transfer

Which support is a modification rather than an accommodation?

Target word: reverse: pick the modification **Decides:** Changes what the student must learn.

A	Inverted operation	Extended time changes access, an accommodation.
B	Adjacent category	Preferential seating is an environmental accommodation.
C	Confusion set	Supports access to the same content.
D	Correct	Changes the learning expectation itself.

7. Answer C Concept 4

A school team is preparing a student's first IEP meeting. ~~The school counselor has a busy calendar, and the meeting room was recently remodeled.~~ How should the team involve the parents?

Target word: parent role on IEP team **Decides:** Parents are equal team members with rights to participate.

A	Camouflage	Staff schedules do not outrank parent participation.
B	Inverted operation	Presenting a finished plan removes the parents' role in decisions.
C	Correct	IDEA makes parents equal participants.
D	Dropped element	Drops a required team member.

8. Answer A Concept 5

Fall screening shows 4 of 25 students in a well-run second-grade class are below benchmark in reading. ~~The class is on the second floor, and the teacher has taught for six years.~~ What is the most appropriate next step for these 4 students?

Target word: Tier 2 decision **Decides:** A small number below benchmark with sound core instruction.

A	Correct	Tier 2 adds to, not replaces, core instruction.
B	Adjacent category	Screening alone does not show a disability; tiered support comes first unless a disability is suspected.
C	Dropped element	Tier 2 is in addition to Tier 1, not instead of it.
D	Inverted operation	A core fix fits when many students struggle; here 16% do.

9. Answer D Concept 5 · transfer

After 10 weeks of Tier 2 small-group support, a student's progress data show almost no growth. What does MTSS suggest next?

Target word: reverse: move up a tier **Decides:** Lack of response to Tier 2.

A	Dropped element	Ignores the data.
B	Inverted operation	Reduces support when data show more is needed.
C	Absolute language	MTSS cannot be used to delay an evaluation when a disability is suspected.
D	Correct	Low response to Tier 2 leads to intensification and possible evaluation.

10. Answer B Concept 6

A sixth-grade class is studying persuasive writing. Several students love sports, some love animals, ~~and a few are in the school band that practices Thursdays.~~ Which approach best reflects personalized learning?

Target word: personalized learning **Decides:** Same goal, learner choice in topic and path.

A	Confusion set	Individual screen time is not the same as personalization.
B	Correct	Voice and choice with a shared goal.
C	Adjacent category	Personalization varies the path, not the standard.
D	Camouflage	The band schedule does not decide the approach.

11. Answer C Concept 7

A fourth grader solves math puzzles two grade levels ahead and explains complex science ideas aloud, but his written work is short and messy. ~~He rides the bus and loves chess.~~ What should the teacher consider?

Target word: twice-exceptional **Decides:** Advanced reasoning with a specific writing struggle.

A	Absolute language	Giftedness and disability can coexist.
B	Inverted operation	Punishes the strength instead of supporting the need.
C	Correct	Both the strength and the need should be addressed.
D	Camouflage	Reacts to a hobby, not to the learning profile.

12. Answer C Concept 8

A family whose home language is Vietnamese has not responded to three English-language notes about their child's reading. ~~The child is a kind and helpful classmate, and the family lives near the school.~~ What should the teacher do next?

Target word: asset-based family communication **Decides:** Communication has been one-way and not in the family's language.

A	Adjacent category	Children should not interpret sensitive information about themselves.
B	Dropped element	Repeats the barrier.
C	Correct	Language access and two-way, asset-based communication.
D	Camouflage	Proximity does not make an unscheduled visit appropriate.

Triage grid

Write each item number in the box it belongs to.

	Right	Wrong
Sure	Owned.	Concept inversion — top priority. A wrong mental model; it survives rewording.
Unsure / guess	Recognition, not mastery. Re-drill with the transfer.	Not learned yet.

Trap tally

For every miss, find the letter you chose in the key and tally its trap. The biggest number is the pattern to drill.

Trap	What it does	In this drill	Your misses
Dropped element	Leaves out a required term or step.	5	
Wrong stem number	A figure copied from the prompt that is not the answer.	0	
Adjacent category	The right idea in the wrong bucket.	9	
Inverted operation	Direction flipped: add/subtract, cause/effect, higher/lower.	7	
Absolute language	Always, never, guarantee — where judgment applies.	5	
Confusion set	Every option is real; the test is exact role-matching.	4	
Camouflage	Answers a stem fact that was never the question.	6	

Anchor rows — the concept list

One row per concept: the rule to lock in, the trap that catches people, and the tell in the question that signals it.

#	Concept	Rule	Trap	Tell
1	IDEA vs. Section 504	IDEA requires a qualifying disability that creates a need for specially designed instruction (an IEP); Section 504 covers a disability that substantially limits a major life activity and usually provides accommodations (a 504 plan).	Thinking any diagnosis automatically qualifies a student for an IEP.	A diagnosis plus a question about which plan applies.
2	Least restrictive environment	Students with disabilities are educated with nondisabled peers to the maximum extent appropriate, with supports, before more separate settings are considered.	Placing a student by disability label rather than individual need.	A placement decision.
3	Accommodation vs. modification	An accommodation changes how a student learns or shows learning; a modification changes what the student is expected to learn.	Calling a reduced standard an accommodation.	A support that changes either access or the expectation.
4	Families as IEP partners	Parents are equal members of the IEP team with rights to participate, receive prior written notice, and give consent for evaluation and initial services.	Presenting families with a finished IEP to sign.	Planning or changing services for a student.
5	MTSS tiers	Tier 1 is high-quality core instruction for all; Tier 2 adds targeted small-group support; Tier 3 is intensive, individualized intervention, with data guiding movement.	Treating MTSS tiers as places or labels, or as a required wait before a special education evaluation.	Screening data and a question about what support comes next.
6	Personalized learning: voice, choice, pace	Personalized learning keeps goals clear while letting learners have voice and choice in path and pace based on their strengths and interests.	Equating personalized learning with students working alone on software.	Students given options tied to one clear goal.
7	Twice-exceptional learners	A student can be gifted and have a disability; supports should address both the strength and the need.	Assuming high ability rules out a disability, or a disability rules out giftedness.	Advanced reasoning alongside a specific struggle.
8	Asset-based family partnership	Treat families as experts on their child, communicate in their preferred language, and build two-way communication.	One-way notices about problems in English only.	Reaching a family who has not responded.

Course scope (public description): Personalized Learning for Inclusive Classrooms empowers educators to create more inclusive and effective learning environments. This course focuses on the principles and strategies of personalized learning, emphasizing the need to value and support the unique needs, interests, and abilities of each learner. The course provides a foundation for learner characteristics of learners with exceptionalities and other unique learning needs. This course helps candidates develop skills for partnering with parents and families to

advocate for all students with exceptionalities, including those impacted by provisions of the Individuals with Disabilities Education Act (IDEA) and Section 504 of the Rehabilitation Act. Multitiered systems of support are addressed to prepare candidates for their future classrooms as they seek to select appropriate instructional practices and interventions to best serve their learners. These factors are also addressed in relation to online and hybrid learning environments.
