Practices for Inclusive Classrooms

Armored Drill

8 concepts · 12 items · 4 transfer items

What this is. Every concept in this course's public description, re-asked with more disguise than a practice test uses. Each stem carries facts that do not decide it. Every wrong answer is a named trap.

Source. Scope from the course's public description in the WGU Institutional Catalog (September 2026); items written from the field's standard body of knowledge. No WGU assessment item, course material or proprietary content is used or reproduced. Not affiliated with or endorsed by Western Governors University.

Method © 2026 Erik Daniel Lindquist — Course Mastery Coach, armored drill. Items drafted with AI assistance under his direction.

How to run it

Paper first. Pencil. One pass, no notes, a timer if you want the pressure.

1. **Before you read the options**, fill the strip under the item: the target word (what is actually being asked), and the one fact in the stem that decides it.
2. **Principle before arithmetic**. Name the rule, then compute.
3. **Camouflage**. Most of every stem does not matter. Ask: which single fact decides this?
4. **Inverse pairs are the bait**. If two options are opposites, one of them is the trap built for you.
5. **Mark sure, unsure or guess** honestly. Sure-and-wrong is the most valuable miss on the page — it is a wrong mental model.
6. **Absolutes** (always, never, guarantee) are usually wrong. And recognizing an answer is not the same as owning it.
7. Items with a **heavy black bar** on the left are **transfer items**: the same principle, reversed or solved for a different variable.
8. Stop at the STOP page. Then grade, fill the triage grid, and tally the traps you fell for. The biggest tally is what you drill next.

The strip, filled in, looks like this:

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	_____	

Items

1.

A fifth grader with type 1 diabetes at a school with a new science lab performs at grade level in all subjects. She needs snack breaks and access to a nurse during testing. Her family recently moved from another state. What plan fits her needs?

- A. A new plan only after her old state's records arrive.
- B. No plan, since she is at grade level.
- C. A Section 504 plan with health and testing accommodations.
- D. An IEP, because she has a medical diagnosis.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

2. [TRANSFER — reversed stem / different variable]

Which student is most likely to need an IEP rather than a 504 plan?

- A. A student with a learning disability in reading who needs specialized reading instruction.
- B. A student with ADHD who succeeds with preferential seating and breaks.
- C. A student with a broken arm who needs a scribe for six weeks.
- D. A student with severe allergies who needs a safe lunch table.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

3.

A second grader with a mild speech impairment reads at grade level and gets along well with classmates. The school recently added a sensory room and a new bus route. The team is deciding his placement. What best follows the least restrictive environment?

- A. All students with disabilities must be fully included at all times.
- B. Place him in the new sensory room part of each day.
- C. General education classroom with speech services.
- D. A separate special education class for all subjects.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

4.

At a middle school with a strong band program, the assistant principal decides alone to reduce a student's special education minutes to fit the master schedule. The student's case manager has 14 years of experience. What is the problem?

- A. Nothing; scheduling needs come first.
- B. Service changes must be made by the IEP team, including the parents.
- C. The case manager should have decided instead.
- D. The change is fine if the case manager has enough experience.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

5.

A student in an online high school course, which uses a popular learning platform, has a reading disability. The teacher lets him listen to the course readings with text-to-speech and take tests with extended time; he meets the same standards as classmates. The course has 32 students. Which term describes these supports?

- A. Accommodations.
- B. Modifications.
- C. Tier 3 interventions.
- D. Platform settings unrelated to disability supports.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

6. [TRANSFER — reversed stem / different variable]

A student's math assignment is changed from solving two-step equations to solving one-step equations, while classmates work on two-step. What is this change?

- A. Differentiated grouping only.
- B. A modification.
- C. An accommodation.
- D. Extended time.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

7.

A school of 500 students screens all readers in the fall. The school has a new playground and a reading mascot. Results: 290 students meet benchmark with core instruction, 150 need targeted small-group help, and 60 need intensive support. What does this pattern suggest?

- A. The pattern is normal.
- B. The mascot program should be expanded.
- C. Core (Tier 1) instruction needs strengthening, since only 58% meet benchmark.
- D. Refer all 210 students below benchmark for special education.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

8. [TRANSFER — reversed stem / different variable]

In a school of 600 students with healthy MTSS, about how many would be expected to need intensive Tier 3 support?

- A. About 90
- B. About 480
- C. About 5
- D. About 30

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

9.

A teacher in a hybrid seventh-grade class, which meets in person three days a week, calls her unit personalized because every student completes the same online modules alone at the same pace. The class uses new headphones. Which change would make it more truly personalized?

- A. Let students choose topics or products and move at their own pace toward shared goals, based on their needs and interests.
- B. Give everyone a faster pace.
- C. Buy better headphones.
- D. Personalization means working alone on screens.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

10.

A teacher suspects a third grader in a school with a new art room has a learning disability. The school psychologist, who has a full schedule this month, offers to test him next week. The parents have not been contacted. What must happen first?

- A.** Test next week, then share results with the parents.
- B.** Give the parents notice and get their informed written consent to evaluate.
- C.** Begin special education services right away.
- D.** Wait until the psychologist's schedule clears.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

11. [TRANSFER — reversed stem / different variable]

Parents give consent for their child's initial evaluation, which shows the child qualifies. What best reflects a two-way family partnership next?

- A.** Communicate only if problems arise.
- B.** Consent to evaluate also means consent to any services the school chooses.
- C.** Mail the finished IEP home for a signature.
- D.** Invite the parents to help write the IEP, sharing their knowledge of the child's strengths and needs.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

12.

A parent writes to request a special education evaluation for her son, who is in week 3 of a 12-week Tier 2 reading intervention. The school recently hired two reading coaches. The principal says the student must finish all tiers first. What is the concern?

- A.** The new reading coaches should decide.
- B.** The principal is right; all tiers must be completed first.
- C.** Wait until week 12 and then consider the request.
- D.** Tiered support cannot be used to delay or deny an evaluation; the school must respond to the request.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

STOP

Answers and dissection follow. Finish every item and every strip first.

Key and dissection

Struck-through text is the camouflage: facts that do not decide the item.

1. Answer C Concept 1

A fifth grader with type 1 diabetes ~~at a school with a new science lab~~ performs at grade level in all subjects. She needs snack breaks and access to a nurse during testing. ~~Her family recently moved from another state.~~ What plan fits her needs?

Target word: IEP or 504 **Decides:** She needs access supports, not specialized instruction.

A	Camouflage	The move does not decide the plan type.
B	Dropped element	504 covers access needs even with good grades.
C	Correct	A substantial limitation needing access supports, no specially designed instruction.
D	Confusion set	A diagnosis alone does not create a need for specialized instruction.

2. Answer A Concept 1 • transfer

Which student is most likely to need an IEP rather than a 504 plan?

Target word: reverse: pick the IEP case **Decides:** Needs specially designed instruction.

A	Correct	Disability in an IDEA category plus a need for specialized instruction.
B	Inverted operation	Accommodations only point to a 504 plan.
C	Adjacent category	A temporary access need.
D	Confusion set	An access need, not specialized instruction.

3. Answer C Concept 2

A second grader with a mild speech impairment reads at grade level and gets along well with classmates. ~~The school recently added a sensory room and a new bus route.~~ The team is deciding his placement. What best follows the least restrictive environment?

Target word: placement decision **Decides:** He can succeed in general education with support.

A	Absolute language	LRE is individual; it is not an absolute rule.
B	Camouflage	An irrelevant resource, not his need.
C	Correct	Maximum time with peers, with needed services.
D	Inverted operation	Most restrictive option for a mild need.

4. Answer B Concept 3

At a middle school ~~with a strong band program~~, the assistant principal decides alone to reduce a student's special education minutes to fit the master schedule. The student's case manager ~~has 14 years of experience.~~ What is the problem?

Target word: who decides services **Decides:** One person changed IEP services.

A	Inverted operation	Services are based on student need, not the schedule.
B	Correct	The team, with parents as equal members, decides services.
C	Adjacent category	Still one person, not the team.
D	Camouflage	Experience does not replace the team process.

5. Answer A Concept 4

A student in an online high school course, ~~which uses a popular learning platform~~, has a reading disability. The teacher lets him listen to the course readings with text-to-speech and take tests with extended time; he meets the same standards as classmates. ~~The course has 32 students.~~ Which term describes these supports?

Target word: accommodation or modification **Decides:** The same standards are expected.

A	Correct	They change access, not what is expected.
B	Confusion set	Modifications change what is expected.
C	Adjacent category	Interventions teach skills; these give access.
D	Camouflage	The platform is not the deciding fact.

6. Answer B Concept 4 • transfer

A student's math assignment is changed from solving two-step equations to solving one-step equations, while classmates work on two-step. What is this change?

Target word: classify the change **Decides:** The expectation itself changed.

A	Adjacent category	The content changed, not just the grouping.
B	Correct	The content expectation was lowered.
C	Inverted operation	Accommodations keep the same expectation.
D	Confusion set	Extended time does not change content.

7. Answer C Concept 5

A school of 500 students screens all readers in the fall. ~~The school has a new playground and a reading mascot.~~ Results: 290 students meet benchmark with core instruction, 150 need targeted small-group help, and 60 need intensive support. What does this pattern suggest?

Target word: interpret tier distribution **Decides:** Only 58% succeed in Tier 1, far below about 80%.

A	Dropped element	Ignores the expected share succeeding in Tier 1.
B	Camouflage	Irrelevant.
C	Correct	$290/500 = 58\%$, well under the expected $\sim 80\%$.
D	Adjacent category	Tiers are general education supports, not referrals.

8. Answer D Concept 5 • transfer

In a school of 600 students with healthy MTSS, about how many would be expected to need intensive Tier 3 support?

Target word: solve for a tier count **Decides:** About 5% need Tier 3.

A	Confusion set	15% is the Tier 2 share.
B	Inverted operation	80% is the Tier 1 share.
C	Wrong stem number	Reads the percentage as a count.
D	Correct	$5\% \text{ of } 600 = 30$.

9. Answer A Concept 6

A teacher in a hybrid seventh-grade class, ~~which meets in person three days a week~~, calls her unit personalized because every student completes the same online modules alone at the same pace. ~~The class uses new headphones.~~ Which change would make it more truly personalized?

Target word: personalization features **Decides:** No voice, choice, or tailoring.

A	Correct	Voice, choice, and pace toward common goals.
B	Dropped element	Still one path for all.
C	Camouflage	Equipment is not personalization.
D	Confusion set	Confuses personalization with isolated online work.

10. Answer B Concept 7

A teacher suspects a third grader ~~in a school with a new art room~~ has a learning disability. The school psychologist, ~~who has a full schedule this month~~, offers to test him next week. The parents have not been contacted. What must happen first?

Target word: required first step **Decides:** No parent consent yet for an initial evaluation.

A	Inverted operation	Evaluates before consent.
B	Correct	Consent is required before an initial evaluation.
C	Dropped element	Skips consent, evaluation, and eligibility.
D	Camouflage	Scheduling does not decide the legal step.

11. Answer D Concept 7 · transfer

Parents give consent for their child's initial evaluation, which shows the child qualifies. What best reflects a two-way family partnership next?

Target word: reverse: partnership after consent **Decides:** Parents are equal members in planning.

A	Inverted operation	One-way, reactive contact.
B	Confusion set	Evaluation consent and service consent are separate.
C	Dropped element	Leaves the family out of planning.
D	Correct	Families contribute as equal partners.

12. Answer D Concept 8

A parent writes to request a special education evaluation for her son, who is in week 3 of a 12-week Tier 2 reading intervention. ~~The school recently hired two reading coaches.~~ The principal says the student must finish all tiers first. What is the concern?

Target word: MTSS and evaluation timing **Decides:** Intervention is being used to delay a requested evaluation.

A	Camouflage	Irrelevant to the legal requirement.
B	Absolute language	Completion of tiers is not a legal prerequisite.
C	Wrong stem number	Still a delay tied to the intervention timeline.
D	Correct	The school must either evaluate or give written notice of refusal, not delay.

Triage grid

Write each item number in the box it belongs to.

	Right	Wrong
Sure	Owned.	Concept inversion — top priority. A wrong mental model; it survives rewording.
Unsure / guess	Recognition, not mastery. Re-drill with the transfer.	Not learned yet.

Trap tally

For every miss, find the letter you chose in the key and tally its trap. The biggest number is the pattern to drill.

Trap	What it does	In this drill	Your misses
Dropped element	Leaves out a required term or step.	5	
Wrong stem number	A figure copied from the prompt that is not the answer.	2	
Adjacent category	The right idea in the wrong bucket.	5	
Inverted operation	Direction flipped: add/subtract, cause/effect, higher/lower.	7	
Absolute language	Always, never, guarantee — where judgment applies.	2	
Confusion set	Every option is real; the test is exact role-matching.	7	
Camouflage	Answers a stem fact that was never the question.	8	

Anchor rows — the concept list

One row per concept: the rule to lock in, the trap that catches people, and the tell in the question that signals it.

#	Concept	Rule	Trap	Tell
1	IDEA vs. Section 504	IDEA requires a disability in a listed category that creates a need for specially designed instruction (an IEP); Section 504 covers any impairment that substantially limits a major life activity and provides access through accommodations (a 504 plan).	Thinking any diagnosis qualifies a student for an IEP.	A student who needs access supports but not specialized instruction.
2	Least restrictive environment	Students with disabilities learn alongside peers without disabilities to the maximum extent appropriate, with supports, before more separate settings are considered.	Moving a student to a separate setting first.	A placement decision for a student who could succeed with supports.
3	The IEP team decides	Eligibility, services, and placement are team decisions that include parents as equal members.	A single administrator or teacher deciding services alone.	One person making a special education decision.
4	Accommodations vs. modifications	Accommodations change how a student learns or shows learning without changing what is expected; modifications change what is taught or expected.	Calling a shortened or easier assignment an accommodation.	Whether the standard itself changes.
5	MTSS tiers	Tier 1 is core instruction for all (about 80% succeed); Tier 2 is targeted small-group support (about 15%); Tier 3 is intensive individual support (about 5%).	Treating Tier 3 as special education or skipping Tier 1 quality.	Screening results or percentages across tiers.
6	Personalized learning	Personalized learning builds on each learner's strengths, needs, and interests and gives learners voice in path, pace, or product toward shared goals.	Assuming personalization means every student works alone on a screen.	A plan claimed to be personalized.
7	Consent and family partnership	Schools must get informed parent consent before an initial special education evaluation and treat families as two-way partners.	Evaluating first and informing parents after.	A school ready to test a student for a disability.
8	Intervention cannot delay evaluation	A tiered support process cannot be used to delay or deny an evaluation when a disability is suspected or a parent requests one.	Telling families the student must finish all tiers first.	A parent requesting an evaluation during interventions.

Course scope (public description): Practices for Inclusive Classrooms empowers educators to create more inclusive and effective learning environments. This course focuses on the principles and strategies of personalized learning, emphasizing the need to value and support the unique needs, interests, and abilities of each learner. The

course provides a foundation for learner characteristics of learners with exceptionalities and other unique learning needs. This course helps candidates develop skills for partnering with parents and families, to advocate for all learners with exceptionalities, including those impacted by provisions of the Individuals with Disabilities Education Act (IDEA) and Section 504 of the Rehabilitation Act. Multitiered systems of support are addressed to prepare candidates for their future classrooms as they seek to select appropriate instructional practices and interventions to best serve their learners. These factors are also addressed in relation to online and hybrid learning environments.
