Public Health Leadership and Administration

Armored Drill

8 concepts · 12 items · 4 transfer items

What this is. Every concept in this course's public description, re-asked with more disguise than a practice test uses. Each stem carries facts that do not decide it. Every wrong answer is a named trap.

Source. Scope from the course's public description in the WGU Institutional Catalog (September 2026); items written from the field's standard body of knowledge. No WGU assessment item, course material or proprietary content is used or reproduced. Not affiliated with or endorsed by Western Governors University.

Method © 2026 Erik Daniel Lindquist — Course Mastery Coach, armored drill. Items drafted with AI assistance under his direction.

How to run it

Paper first. Pencil. One pass, no notes, a timer if you want the pressure.

1. **Before you read the options**, fill the strip under the item: the target word (what is actually being asked), and the one fact in the stem that decides it.
2. **Principle before arithmetic**. Name the rule, then compute.
3. **Camouflage**. Most of every stem does not matter. Ask: which single fact decides this?
4. **Inverse pairs are the bait**. If two options are opposites, one of them is the trap built for you.
5. **Mark sure, unsure or guess** honestly. Sure-and-wrong is the most valuable miss on the page — it is a wrong mental model.
6. **Absolutes** (always, never, guarantee) are usually wrong. And recognizing an answer is not the same as owning it.
7. Items with a **heavy black bar** on the left are **transfer items**: the same principle, reversed or solved for a different variable.
8. Stop at the STOP page. Then grade, fill the triage grid, and tally the traps you fell for. The biggest tally is what you drill next.

The strip, filled in, looks like this:

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	_____	

Items

1.

A neighborhood association with 300 members and an active social media page demands, “No addiction treatment clinic on our block.” At a mediated meeting, residents mention parking and people waiting outside at night. What should the mediator do next?

- A. Answer the association's social media posts point by point.
- B. Ask about their concerns, such as parking and safety, to uncover underlying interests.
- C. Propose moving the clinic halfway down the block.
- D. Decide which side is right.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

2.

A health department is renewing its lab testing contract. The current lab, a partner for 10 years whose sales rep is well liked, asks \$42 per test. Another accredited lab has given a written quote of \$38 with the same turnaround time. What should the department do?

- A. Never walk away once talks start.
- B. Accept \$42 to protect the long relationship.
- C. Treat \$30 as the BATNA, since that is the hoped-for price.
- D. Decline anything above \$38 per test, since the other quote is the BATNA.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

3. [TRANSFER — reversed stem / different variable]

Midway through talks, the second lab withdraws its quote and no other lab can do the testing. What happens to the department's negotiating power?

- A. It strengthens.
- B. It weakens, because its best alternative got worse.
- C. BATNA matters only to the other side.
- D. It stays the same.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

4.

A county will pay at most \$30 per square foot for clinic space. The landlord of a building with a restored 1920s facade will accept no less than \$26. What is the zone of possible agreement?

- A. None, because the numbers differ.
- B. \$26 to \$30 per square foot.
- C. Only \$28, the midpoint.
- D. \$30 to \$34 per square foot.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

5. [TRANSFER — reversed stem / different variable]

A union will accept no less than a 5% raise. The department can pay at most 3.5%. Is there a ZOPA?

- A. Yes, from 3.5% to 5%.
- B. Yes, from 0% to 3.5%.
- C. No; there is an 8.5-point gap.
- D. No; there is a 1.5-point gap.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

6.

A health agency and a housing agency must share one \$200,000 grant for a lead program. Health wants family education; housing wants home inspections. The housing agency has twice as many staff. Which approach is integrative?

- A. Joint home visits where inspectors and educators go together.
- B. Every negotiation is win-lose, so push for the larger share.
- C. Give most of the grant to housing because it has more staff.
- D. Split the grant 50/50.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

7.

Two community groups disagree over sharing a meeting space. They want a neutral person to help them talk and reach their own agreement, but they do not want anyone else to decide for them. The space is in a church basement with limited parking. What process fits?

- A. A lawsuit.
- B. Binding arbitration.
- C. Mediation.
- D. Direct negotiation.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

8. [TRANSFER — reversed stem / different variable]

Two agencies want a neutral expert to hear both sides of a contract dispute and issue a decision they agree to follow. What process is this?

- A. Arbitration.
- B. Facilitation.
- C. Negotiation.
- D. Mediation.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

9.

During a hurricane evacuation, a shelter in a high school gym with 200 cots has staff disputing whether to let a family bring a generator inside. Fumes could harm everyone. What conflict mode should the shelter manager use?

- A. Avoiding: let the family decide.
- B. Collaborating: hold a full discussion to reach consensus.
- C. Collaborating is always best.
- D. Competing: make the call now and keep the generator outside.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

10.

A health department mails a survey to residents about new clinic hours, reviews results at a staff retreat, then sets the hours itself and explains how feedback shaped the choice. The survey had a 22% response rate. What level of engagement is this?

- A.** Inform only, because response was low.
- B.** Empower.
- C.** Consult.
- D.** Collaborate.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

11. [TRANSFER — reversed stem / different variable]

At which level of the engagement spectrum does the public make the final decision?

- A.** Consult.
- B.** Involve.
- C.** Empower.
- D.** Inform.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

12.

A man with active tuberculosis, who recently moved from another county, keeps missing doses. He says he forgets and that the clinic is hard to reach by bus. What should the health department try first?

- A.** Offer directly observed therapy, including video options, with transport help.
- B.** Do nothing, since liberty always outweighs public risk.
- C.** Transfer his case back to his former county.
- D.** Seek a court order for isolation right away.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

STOP

Answers and dissection follow. Finish every item and every strip first.

Key and dissection

Struck-through text is the camouflage: facts that do not decide the item.

1. Answer B Concept 1

A neighborhood association ~~with 300 members and an active social media page~~ demands, "No addiction treatment clinic on our block." At a mediated meeting, residents mention parking and people waiting outside at night. What should the mediator do next?

Target word: next mediation step **Decides:** The demand is a position; parking and safety hint at interests.

A	Camouflage	Their online presence does not decide the next step.
B	Correct	Exploring interests opens options beyond the position.
C	Dropped element	Splits positions without learning the interests.
D	Adjacent category	That is arbitration, not mediation.

2. Answer D Concept 2

A health department is renewing its lab testing contract. The current lab, ~~a partner for 10 years whose sales rep is well liked,~~ asks \$42 per test. Another accredited lab has given a written quote of \$38 with the same turnaround time. What should the department do?

Target word: use of BATNA **Decides:** The \$38 written quote is the walk-away point.

A	Absolute language	Walking away is exactly what a BATNA allows.
B	Camouflage	History and goodwill do not change the better alternative.
C	Confusion set	That is a target, not the best alternative.
D	Correct	An offer worse than your BATNA should be rejected.

3. Answer B Concept 2 · transfer

Midway through talks, the second lab withdraws its quote and no other lab can do the testing. What happens to the department's negotiating power?

Target word: effect of a weaker BATNA **Decides:** The outside option is gone.

A	Inverted operation	Losing an alternative reduces leverage.
B	Correct	Power tracks BATNA strength.
C	Adjacent category	Both sides' BATNAs shape the deal.
D	Dropped element	Ignores the change in alternatives.

4. Answer B Concept 3

A county will pay at most \$30 per square foot for clinic space. The landlord ~~of a building with a restored 1920s facade~~ will accept no less than \$26. What is the zone of possible agreement?

Target word: ZOPA **Decides:** Landlord minimum \$26 to county maximum \$30.

A	Inverted operation	The buyer's max is above the seller's min, so they overlap.
B	Correct	The overlap between the two walk-away points.
C	Adjacent category	A possible settlement, not the whole zone.
D	Wrong stem number	Starts at the county's maximum and goes above it.

5. Answer D Concept 3 • transfer

A union will accept no less than a 5% raise. The department can pay at most 3.5%. Is there a ZOPA?

Target word: test for overlap **Decides:** Max 3.5% is below min 5%.

A	Inverted operation	That range is the gap, not an overlap.
B	Dropped element	Ignores the union's minimum.
C	Wrong stem number	Adds the two figures instead of subtracting.
D	Correct	$5 - 3.5 = 1.5$; no overlap.

6. Answer A Concept 4

A health agency and a housing agency must share one \$200,000 grant for a lead program. Health wants family education; housing wants home inspections. ~~The housing agency has twice as many staff.~~ Which approach is integrative?

Target word: integrative option **Decides:** Joint solution meets both priorities.

A	Correct	Creates value by meeting both interests at once.
B	Absolute language	Integrative options often exist.
C	Camouflage	Staff size does not create joint value.
D	Adjacent category	A distributive split of a fixed pie.

7. Answer C Concept 5

Two community groups disagree over sharing a meeting space. They want a neutral person to help them talk and reach their own agreement, but they do not want anyone else to decide for them. ~~The space is in a church basement with limited parking.~~ What process fits?

Target word: choose the process **Decides:** Neutral helps; parties decide.

A	Adjacent category	A judge decides.
B	Confusion set	The arbitrator decides, which they do not want.
C	Correct	The mediator facilitates without deciding.
D	Dropped element	Leaves out the neutral third party they asked for.

8. Answer A Concept 5 • transfer

Two agencies want a neutral expert to hear both sides of a contract dispute and issue a decision they agree to follow. What process is this?

Target word: neutral who decides **Decides:** A binding decision by a third party.

A	Correct	The arbitrator decides.
B	Adjacent category	Facilitators manage process, not outcomes.
C	Dropped element	No third party.
D	Inverted operation	A mediator cannot impose a decision.

9. Answer D Concept 6

During a hurricane evacuation, a shelter ~~in a high school gym with 200 cots~~ has staff disputing whether to let a family bring a generator inside. Fumes could harm everyone. What conflict mode should the shelter manager use?

Target word: mode for urgent safety **Decides:** Emergency with high stakes and no time.

A	Inverted operation	Avoiding suits trivial issues, not safety risks.
B	Adjacent category	Best when time allows; here it does not.
C	Absolute language	No mode fits every situation.
D	Correct	Quick decisive action fits emergencies.

10. Answer C Concept 7

A health department mails a survey to residents about new clinic hours, reviews results at a staff retreat, then sets the hours itself and explains how feedback shaped the choice. ~~The survey had a 22% response rate.~~ What level of engagement is this?

Target word: engagement level **Decides:** Feedback gathered; agency decides.

A	Camouflage	The response rate does not change the level.
B	Inverted operation	Empower gives the public the final decision.
C	Correct	Gathering feedback and reporting how it was used.
D	Confusion set	Collaborate means partnering on each part of the decision.

11. Answer C Concept 7 • transfer

At which level of the engagement spectrum does the public make the final decision?

Target word: level with public decision **Decides:** Empower.

A	Confusion set	Feedback only.
B	Adjacent category	Concerns are reflected but the agency decides.
C	Correct	Final decision rests with the public.
D	Inverted operation	The lowest level; one-way information.

12. Answer A Concept 8

A man with active tuberculosis, ~~who recently moved from another county,~~ keeps missing doses. He says he forgets and that the clinic is hard to reach by bus. What should the health department try first?

Target word: least restrictive step **Decides:** Barriers are practical; milder options have not been tried.

A	Correct	Least restrictive means that can still protect others.
B	Absolute language	Ethics balances liberty against harm to others.
C	Camouflage	His recent move does not change the ethical approach.
D	Inverted operation	Coercion comes after milder steps fail.

Triage grid

Write each item number in the box it belongs to.

	Right	Wrong
Sure	Owled.	Concept inversion — top priority. A wrong mental model; it survives rewording.
Unsure / guess	Recognition, not mastery. Re-drill with the transfer.	Not learned yet.

Trap tally

For every miss, find the letter you chose in the key and tally its trap. The biggest number is the pattern to drill.

Trap	What it does	In this drill	Your misses
Dropped element	Leaves out a required term or step.	5	
Wrong stem number	A figure copied from the prompt that is not the answer.	2	
Adjacent category	The right idea in the wrong bucket.	8	
Inverted operation	Direction flipped: add/subtract, cause/effect, higher/lower.	8	
Absolute language	Always, never, guarantee — where judgment applies.	4	
Confusion set	Every option is real; the test is exact role-matching.	4	
Camouflage	Answers a stem fact that was never the question.	5	

Anchor rows — the concept list

One row per concept: the rule to lock in, the trap that catches people, and the tell in the question that signals it.

#	Concept	Rule	Trap	Tell
1	Interests vs. positions	A position is what a party demands; an interest is why they want it. Agreements come from exploring interests.	Bargaining over stated demands without asking what drives them.	A flat demand such as “no clinic on our block.”
2	BATNA	Your best alternative to a negotiated agreement sets your walk-away point; a stronger BATNA gives you more power.	Confusing BATNA with your target or hoped-for outcome.	A concrete outside option, such as another vendor's written quote.
3	Zone of possible agreement (ZOPA)	A ZOPA exists only where one side's walk-away point overlaps the other's: from the seller's minimum up to the buyer's maximum.	Assuming any difference in numbers means no deal, or that a deal is always possible.	Two reservation points stated in the same units.
4	Integrative vs. distributive negotiation	Distributive bargaining splits a fixed pie; integrative bargaining finds trades and joint solutions that create value for both sides.	Treating every negotiation as win-lose, or calling a 50/50 split a win-win.	Two parties with different priorities over a shared resource.
5	Mediation vs. arbitration	A mediator helps parties reach their own agreement and cannot impose one; an arbitrator hears both sides and issues a decision, often binding.	Thinking a mediator decides who is right.	Whether the neutral third party decides or only facilitates.
6	Conflict-handling modes	Competing fits emergencies needing quick decisive action; collaborating fits important, complex issues when time allows; avoiding fits trivial issues; no mode is always best.	Believing collaboration is always the right choice.	Time pressure and stakes described in the scenario.
7	Community engagement spectrum	Public participation rises from inform, to consult, to involve, to collaborate, to empower, where the public makes the final decision.	Calling a survey or public comment period collaboration.	Who holds the final decision and how input is used.
8	Least restrictive means	Public health ethics favors the least restrictive intervention that can achieve the goal, escalating only when milder steps fail.	Jumping to coercion, or refusing any restriction on liberty.	A risk to others and a range of voluntary to mandatory options.

Course scope (public description): Public Health Leadership and Administration enables students to apply leadership principles for public health leadership positions. This includes engaging, organizing, and leading diverse groups, as well as addressing ethical issues in the field of public health. Students also apply negotiation and mediation skills to address challenges they may face in the organization or community. There are no prerequisites for this course.
