# Secondary Literacy and Mathematics Strategies and Assistive Technologies

Armored Drill

8 concepts · 12 items · 4 transfer items

**What this is.** Every concept in this course's public description, re-asked with more disguise than a practice test uses. Each stem carries facts that do not decide it. Every wrong answer is a named trap.

**Source.** Scope from the course's public description in the WGU Institutional Catalog (September 2026); items written from the field's standard body of knowledge. No WGU assessment item, course material or proprietary content is used or reproduced. Not affiliated with or endorsed by Western Governors University.

Method © 2026 Erik Daniel Lindquist — Course Mastery Coach, armored drill. Items drafted with AI assistance under his direction.

# How to run it

Paper first. Pencil. One pass, no notes, a timer if you want the pressure.

1. **Before you read the options**, fill the strip under the item: the target word (what is actually being asked), and the one fact in the stem that decides it.
2. **Principle before arithmetic**. Name the rule, then compute.
3. **Camouflage**. Most of every stem does not matter. Ask: which single fact decides this?
4. **Inverse pairs are the bait**. If two options are opposites, one of them is the trap built for you.
5. **Mark sure, unsure or guess** honestly. Sure-and-wrong is the most valuable miss on the page — it is a wrong mental model.
6. **Absolutes** (always, never, guarantee) are usually wrong. And recognizing an answer is not the same as owning it.
7. Items with a **heavy black bar** on the left are **transfer items**: the same principle, reversed or solved for a different variable.
8. Stop at the STOP page. Then grade, fill the triage grid, and tally the traps you fell for. The biggest tally is what you drill next.

The strip, filled in, looks like this:

|                             |                                           |                        |                                  |
|-----------------------------|-------------------------------------------|------------------------|----------------------------------|
| <b>Target word</b><br>_____ | <b>The one fact that decides</b><br>_____ | <b>Answer</b><br>_____ | [ ] sure [ ] unsure [ ]<br>guess |
|-----------------------------|-------------------------------------------|------------------------|----------------------------------|

# Items

1.

A senior with a learning disability will graduate in June with a regular diploma. She plans to attend a state university, has a part-time job at a bakery, and her IEP case manager is new this year. What must the school provide before she exits?

- A. Her high school transcript, which counts as the summary.
- B. A letter of recommendation to her bakery employer.
- C. A full reevaluation to confirm she no longer needs services.
- D. A Summary of Performance describing her academic and functional performance with recommendations for her postsecondary goals.

| Target word | The one fact that decides | Answer | [ ] sure [ ] unsure [ ] guess |
|-------------|---------------------------|--------|-------------------------------|
| _____       | _____                     | ___    |                               |

2. [TRANSFER — reversed stem / different variable]

In which case is a Summary of Performance NOT required?

- A. A student's eligibility ends because a reevaluation shows he no longer has a disability.
- B. A student exceeds the state's age limit for services.
- C. A student graduates with a regular diploma.
- D. A student with an IEP graduates with honors.

| Target word | The one fact that decides | Answer | [ ] sure [ ] unsure [ ] guess |
|-------------|---------------------------|--------|-------------------------------|
| _____       | _____                     | ___    |                               |

3.

A student with an intellectual disability will turn 18, the age of majority in his state, next March. His IEP meeting is this February, a year and a month earlier, and his older brother attends the same school. What must this IEP include about rights?

- A. A statement that his parents lose all involvement at 18.
- B. A plan to inform his older brother of the transfer.
- C. A statement that he has been informed of the IDEA rights that will transfer to him at 18.
- D. Nothing yet; the notice is given on his 18th birthday.

| Target word | The one fact that decides | Answer | [ ] sure [ ] unsure [ ] guess |
|-------------|---------------------------|--------|-------------------------------|
| _____       | _____                     | ___    |                               |

**4.** [TRANSFER — reversed stem / different variable]

A family believes their 17-year-old with a significant disability cannot make educational decisions on her own after 18. What is the accurate information for the IEP team to share?

- A.** Rights never transfer for students with significant disabilities.
- B.** Rights transfer at 21 for students in special education.
- C.** Rights transfer at age of majority unless the family obtains guardianship or another legal arrangement allowed by the state.
- D.** The school can decide that rights stay with the parents.

| Target word | The one fact that decides | Answer | [ ] sure [ ] unsure [ ] guess |
|-------------|---------------------------|--------|-------------------------------|
| _____       | _____                     | ___    |                               |

**5.**

Tenth graders with learning disabilities must learn the term “ranidae” (the frog family) for biology. The class meets in a lab room with 30 stools, and the teacher plays music between activities. Which activity uses the keyword mnemonic method?

- A.** Create an acronym from the letters of “ranidae.”
- B.** Make up a song about frogs to play between activities.
- C.** Write the definition ten times.
- D.** Link “ranidae” to the keyword “rainy day” and picture frogs hopping in the rain.

| Target word | The one fact that decides | Answer | [ ] sure [ ] unsure [ ] guess |
|-------------|---------------------------|--------|-------------------------------|
| _____       | _____                     | ___    |                               |

**6.**

An eighth-grade co-taught English class of 28 includes six students with IEPs. The teachers want to improve comprehension of informational articles. The school recently switched to block scheduling. Which activity reflects reciprocal teaching?

- A.** The teacher summarizes each section for students.
- B.** Small groups rotate a leader who guides the group to predict, question, clarify, and summarize each section, after the teacher models it.
- C.** Students take turns reading paragraphs aloud around the room.
- D.** Use the longer block to read the article twice silently.

| Target word | The one fact that decides | Answer | [ ] sure [ ] unsure [ ] guess |
|-------------|---------------------------|--------|-------------------------------|
| _____       | _____                     | ___    |                               |

7.

A ninth grader with a math disability is learning to solve two-step linear equations. His teacher coaches the robotics club and uses a document camera. After showing one example, what sequence best supports learning?

- A. Only fully worked examples all year.
- B. Several fully worked examples, then examples with steps left blank for him to finish, then independent problems.
- C. A robotics project that uses equations.
- D. A full set of 20 independent problems right away.

| Target word | The one fact that decides | Answer | [ ] sure [ ] unsure [ ] guess |
|-------------|---------------------------|--------|-------------------------------|
| _____       | _____                     | ___    |                               |

8.

A senior with a learning disability has had extended time and notes from peers under her IEP. She has been accepted to a university two hours away and plans to major in nursing. Her counselor has a busy caseload. What does she need to know about accommodations in college?

- A. Her IEP will transfer automatically to the university.
- B. The university must modify nursing program standards for her.
- C. Her counselor will send the IEP to the college.
- D. She must contact the disability services office, disclose her disability, and provide documentation to request accommodations.

| Target word | The one fact that decides | Answer | [ ] sure [ ] unsure [ ] guess |
|-------------|---------------------------|--------|-------------------------------|
| _____       | _____                     | ___    |                               |

9. [TRANSFER — reversed stem / different variable]

A college student with a documented disability did not tell the college about it and failed an exam. He asks for extended time to be applied to that exam afterward. What is most accurate?

- A. The college generally does not have to apply accommodations retroactively; he should register now for future exams.
- B. Students with disabilities never get extended time in college.
- C. The college must regrade the exam with extended time.
- D. His high school IEP covers the exam.

| Target word | The one fact that decides | Answer | [ ] sure [ ] unsure [ ] guess |
|-------------|---------------------------|--------|-------------------------------|
| _____       | _____                     | ___    |                               |

**10.**

An IEP goal says: “will solve one-step equations with 80% accuracy on three consecutive weekly probes.” Each probe has 20 items. Scores: 12, 17, 15, 17, 18, 17. The student also started a new medication in week 3. Has the goal been met?

- A.** Yes; the student scored 17 or more four times.
- B.** Yes; the last three probes were 85%, 90%, and 85%.
- C.** No; the week-3 probe was 75%, so the streak is broken.
- D.** No; the average of all six probes is only 80%, which leaves no margin.

| Target word | The one fact that decides | Answer | [ ] sure [ ] unsure [ ] guess |
|-------------|---------------------------|--------|-------------------------------|
| _____       | _____                     | ___    |                               |

**11.** [TRANSFER — reversed stem / different variable]

A probe has 25 items. The IEP criterion is 80% accuracy. What is the lowest number correct that meets the criterion?

- A.** 20
- B.** 80
- C.** 5
- D.** 19

| Target word | The one fact that decides | Answer | [ ] sure [ ] unsure [ ] guess |
|-------------|---------------------------|--------|-------------------------------|
| _____       | _____                     | ___    |                               |

**12.**

A 19-year-old with a significant intellectual disability has a transition goal to ride the city bus to a job site. His program has a new smartboard and a strong partnership with a local hospital. Which instruction best supports this goal?

- A.** Have him memorize the bus schedule.
- B.** Always have an adult ride with him so he stays safe.
- C.** Teach and practice the bus route on the real bus with fading adult support.
- D.** Practice bus riding with videos on the smartboard only.

| Target word | The one fact that decides | Answer | [ ] sure [ ] unsure [ ] guess |
|-------------|---------------------------|--------|-------------------------------|
| _____       | _____                     | ___    |                               |

# STOP

Answers and dissection follow. Finish every item and every strip first.

# Key and dissection

Struck-through text is the camouflage: facts that do not decide the item.

## 1. Answer D Concept 1

A senior with a learning disability will graduate in June with a regular diploma. She plans to attend a state university, ~~has a part time job at a bakery, and her IEP case manager is new this year.~~ What must the school provide before she exits?

**Target word:** exit requirement **Decides:** Graduating with a regular diploma ends eligibility; a Summary of Performance is required.

|   |                   |                                                                            |
|---|-------------------|----------------------------------------------------------------------------|
| A | Confusion set     | A transcript lists grades, not functional performance and recommendations. |
| B | Camouflage        | The job detail does not decide the legal exit document.                    |
| C | Adjacent category | A reevaluation is not required when eligibility ends by graduation.        |
| D | <b>Correct</b>    | Required when eligibility ends by regular diploma or aging out.            |

## 2. Answer A Concept 1 • transfer

In which case is a Summary of Performance NOT required?

**Target word:** reverse: when SOP does not apply **Decides:** SOP is required for exit by regular diploma or aging out, not other reasons for ending services.

|   |                    |                                                                   |
|---|--------------------|-------------------------------------------------------------------|
| A | <b>Correct</b>     | That exit follows a reevaluation, so the SOP rule does not apply. |
| B | Confusion set      | Aging out also triggers the SOP.                                  |
| C | Inverted operation | This is exactly when an SOP is required.                          |
| D | Camouflage         | Honors does not change that a regular diploma ends eligibility.   |

## 3. Answer C Concept 2

A student with an intellectual disability will turn 18, the age of majority in his state, next March. His IEP meeting is this February, a year and a month earlier, ~~and his older brother attends the same school.~~ What must this IEP include about rights?

**Target word:** age-of-majority notice **Decides:** At least one year before age of majority, the IEP must state he was informed.

|   |                   |                                                                                                 |
|---|-------------------|-------------------------------------------------------------------------------------------------|
| A | Absolute language | Rights transfer to him, but parents still receive notices and may take part if he invites them. |
| B | Camouflage        | The sibling is not part of the rights transfer.                                                 |
| C | <b>Correct</b>    | Required at least one year before age of majority.                                              |
| D | Wrong stem number | Notice must come at least a year in advance.                                                    |

#### 4. Answer C Concept 2 • transfer

A family believes their 17-year-old with a significant disability cannot make educational decisions on her own after 18. What is the accurate information for the IEP team to share?

**Target word:** how rights stay with parents **Decides:** Rights transfer unless a legal process (such as guardianship) or state process says otherwise.

|          |                    |                                                                                          |
|----------|--------------------|------------------------------------------------------------------------------------------|
| A        | Absolute language  | Transfer applies to all students unless a legal process says otherwise.                  |
| B        | Wrong stem number  | Transfer occurs at the state age of majority, usually 18.                                |
| <b>C</b> | <b>Correct</b>     | The school cannot block the transfer; a legal process decides decision-making authority. |
| D        | Inverted operation | The school has no authority to stop the transfer.                                        |

#### 5. Answer D Concept 3

Tenth graders with learning disabilities must learn the term “ranidae” (the frog family) for biology. ~~The class meets in a lab room with 30 stools, and the teacher plays music between activities.~~ Which activity uses the keyword mnemonic method?

**Target word:** which activity is the keyword method **Decides:** Sound-alike keyword plus an interactive picture with the meaning.

|          |                   |                                                                                       |
|----------|-------------------|---------------------------------------------------------------------------------------|
| A        | Confusion set     | Letter strategies are a different mnemonic type.                                      |
| B        | Camouflage        | Uses the music detail; a song is not a keyword link.                                  |
| C        | Adjacent category | Rote copying lacks the keyword and image link.                                        |
| <b>D</b> | <b>Correct</b>    | A familiar sound-alike word joined in a picture to the meaning is the keyword method. |

#### 6. Answer B Concept 4

An eighth-grade co-taught English class ~~of 28~~ includes six students with IEPs. The teachers want to improve comprehension of informational articles. ~~The school recently switched to block scheduling.~~ Which activity reflects reciprocal teaching?

**Target word:** what reciprocal teaching looks like **Decides:** Rotating leader role using predict, question, clarify, summarize.

|          |                    |                                                                        |
|----------|--------------------|------------------------------------------------------------------------|
| A        | Inverted operation | The teacher does the work students are meant to take over.             |
| <b>B</b> | <b>Correct</b>     | Four strategies and a rotating leader role define reciprocal teaching. |
| C        | Confusion set      | Round-robin reading lacks the strategy dialogue.                       |
| D        | Camouflage         | Block time does not add the strategies.                                |

#### 7. Answer B Concept 5

A ninth grader with a math disability is learning to solve two-step linear equations. ~~His teacher coaches the robotics club and uses a document camera.~~ After showing one example, what sequence best supports learning?

**Target word:** sequence for new procedures **Decides:** Move from full examples to partial ones to independent work.

|          |                   |                                                             |
|----------|-------------------|-------------------------------------------------------------|
| A        | Absolute language | Without fading, he never practices solving alone.           |
| <b>B</b> | <b>Correct</b>    | Fading steps shifts work to the student gradually.          |
| C        | Camouflage        | The coaching detail does not decide instructional sequence. |
| D        | Dropped element   | Skips the partial examples that bridge to independence.     |

## 8. Answer D Concept 6

A senior with a learning disability has had extended time and notes from peers under her IEP. She has been accepted to a university ~~two hours away~~ and plans to major in nursing. ~~Her counselor has a busy caseload.~~ What does she need to know about accommodations in college?

**Target word:** college accommodation process **Decides:** IEPs end; she must self-disclose and document disability under ADA and 504.

|   |                    |                                                                       |
|---|--------------------|-----------------------------------------------------------------------|
| A | Inverted operation | IDEA ends at high school exit.                                        |
| B | Adjacent category  | Colleges give accommodations but need not lower essential standards.  |
| C | Camouflage         | The counselor detail does not change who must request accommodations. |
| D | <b>Correct</b>     | College accommodations are student-initiated under the ADA and 504.   |

## 9. Answer A Concept 6 • transfer

A college student with a documented disability did not tell the college about it and failed an exam. He asks for extended time to be applied to that exam afterward. What is most accurate?

**Target word:** effect of not disclosing **Decides:** Accommodations begin after the student requests and qualifies.

|   |                    |                                                                     |
|---|--------------------|---------------------------------------------------------------------|
| A | <b>Correct</b>     | Accommodations start after self-disclosure and approval.            |
| B | Absolute language  | Extended time is a common college accommodation once approved.      |
| C | Inverted operation | Colleges are not required to apply accommodations before a request. |
| D | Confusion set      | The IEP ended at graduation.                                        |

## 10. Answer B Concept 7

An IEP goal says: “will solve one-step equations with 80% accuracy on three consecutive weekly probes.” Each probe has 20 items. Scores: 12, 17, 15, 17, 18, 17. ~~The student also started a new medication in week 3.~~ Has the goal been met?

**Target word:** check the criterion **Decides:** Last three probes are 17, 18, 17 = 85%, 90%, 85%, all  $\geq 80\%$ .

|   |                   |                                                                            |
|---|-------------------|----------------------------------------------------------------------------|
| A | Dropped element   | Right result, wrong rule: drops the consecutive requirement.               |
| B | <b>Correct</b>    | Three consecutive probes at or above 80% meets the criterion.              |
| C | Camouflage        | Week 3 is before the last three; the medication detail does not decide it. |
| D | Adjacent category | The goal names three consecutive probes, not an overall average.           |

## 11. Answer A Concept 7 • transfer

A probe has 25 items. The IEP criterion is 80% accuracy. What is the lowest number correct that meets the criterion?

**Target word:** solve for raw score **Decides:**  $0.80 \times 25 = 20$ .

|   |                    |                                         |
|---|--------------------|-----------------------------------------|
| A | <b>Correct</b>     | 80% of 25 is 20.                        |
| B | Wrong stem number  | The percent, not the item count.        |
| C | Inverted operation | That is the number that may be missed.  |
| D | Dropped element    | $19 / 25 = 76\%$ , below the criterion. |

## 12. Answer C Concept 8

A 19-year-old with a significant intellectual disability has a transition goal to ride the city bus to a job site. ~~His program has a new smartboard and a strong partnership with a local hospital.~~ Which instruction best supports this goal?

**Target word:** setting for functional skill instruction **Decides:** Skills generalize best when taught where they will be used.

|          |                   |                                                                             |
|----------|-------------------|-----------------------------------------------------------------------------|
| A        | Dropped element   | Knowing times is only one part of riding safely.                            |
| B        | Absolute language | Permanent support prevents independence; support should fade.               |
| <b>C</b> | <b>Correct</b>    | Community-based instruction in the natural setting supports generalization. |
| D        | Camouflage        | Simulation alone often fails to transfer to the real setting.               |

## Triage grid

Write each item number in the box it belongs to.

|                       | <b>Right</b>                                          | <b>Wrong</b>                                                                          |
|-----------------------|-------------------------------------------------------|---------------------------------------------------------------------------------------|
| <b>Sure</b>           | Owled.                                                | <b>Concept inversion — top priority.</b> A wrong mental model; it survives rewording. |
| <b>Unsure / guess</b> | Recognition, not mastery. Re-drill with the transfer. | Not learned yet.                                                                      |

## Trap tally

For every miss, find the letter you chose in the key and tally its trap. The biggest number is the pattern to drill.

| <b>Trap</b>        | <b>What it does</b>                                          | <b>In this drill</b> | <b>Your misses</b> |
|--------------------|--------------------------------------------------------------|----------------------|--------------------|
| Dropped element    | Leaves out a required term or step.                          | 4                    |                    |
| Wrong stem number  | A figure copied from the prompt that is not the answer.      | 3                    |                    |
| Adjacent category  | The right idea in the wrong bucket.                          | 4                    |                    |
| Inverted operation | Direction flipped: add/subtract, cause/effect, higher/lower. | 6                    |                    |
| Absolute language  | Always, never, guarantee — where judgment applies.           | 5                    |                    |
| Confusion set      | Every option is real; the test is exact role-matching.       | 5                    |                    |
| Camouflage         | Answers a stem fact that was never the question.             | 9                    |                    |

# Anchor rows — the concept list

One row per concept: the rule to lock in, the trap that catches people, and the tell in the question that signals it.

| # | Concept                                             | Rule                                                                                                                                                                                                                                            | Trap                                                                                             | Tell                                                              |
|---|-----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|-------------------------------------------------------------------|
| 1 | <b>Summary of Performance</b>                       | When special education eligibility ends because a student graduates with a regular diploma or ages out, the school must give a summary of academic achievement and functional performance with recommendations for meeting postsecondary goals. | Thinking a reevaluation is required at graduation, or that the transcript serves as the summary. | A student is about to exit with a regular diploma.                |
| 2 | <b>Transfer of rights at age of majority</b>        | At least one year before the student reaches the state's age of majority, the IEP must state that the student has been told which IDEA rights will transfer to them.                                                                            | Telling the student on their 18th birthday, or telling only the parents.                         | A 17-year-old's IEP and a mention of age of majority.             |
| 3 | <b>Keyword mnemonic</b>                             | Link a new term to a familiar sound-alike keyword and an interactive picture joining the keyword to the meaning.                                                                                                                                | Assuming any acronym or rhyme is the keyword method.                                             | Students must learn many unfamiliar content terms or definitions. |
| 4 | <b>Reciprocal teaching</b>                          | Students take turns leading dialogue about text using four strategies (predict, question, clarify, summarize), with the teacher modeling and then fading support.                                                                               | Treating it as round-robin reading aloud.                                                        | Small groups discuss text and rotate a leader role.               |
| 5 | <b>Worked examples with fading</b>                  | Show fully solved examples, then partially solved ones with steps removed, until students solve on their own.                                                                                                                                   | Showing one example and then assigning a full independent set.                                   | Students with LD learning a new multistep algebra procedure.      |
| 6 | <b>After high school: ADA and 504, not IDEA</b>     | IDEA and IEPs end at high school exit; in college, students must self-disclose and document disability to get accommodations under the ADA and Section 504, and colleges need not modify standards.                                             | Assuming the IEP follows the student to college.                                                 | A student plans for college supports.                             |
| 7 | <b>Scoring progress against a mastery criterion</b> | Convert each probe to a percent and check it against the goal criterion exactly as written, including the number of consecutive sessions.                                                                                                       | Averaging all probes or counting any three probes rather than three in a row.                    | "80% accuracy across three consecutive probes."                   |
| 8 | <b>Community-based instruction</b>                  | Teaching functional and job skills in the real settings where they will be used improves generalization for students with significant disabilities.                                                                                             | Relying only on classroom simulations for skills used in the community.                          | A transition goal names a skill used in stores, jobs, or transit. |

**Course scope (public description):** Secondary Literacy and Mathematics Strategies and Assistive Technologies prepares special education teachers to use progress monitoring and evidence-based instructional practices appropriate for use with secondary students with exceptionalities. This course focuses on intensive instruction and accommodation that includes assistive technology to secondary lesson plans. Learners will apply strategies to develop student critical thinking and problem-solving skills. Learners will assess and measure student progress towards the Individualized Education Program (IEP) and transition goals for post-secondary and career preparation.
