Student Teaching II in Secondary Education

Armored Drill

8 concepts · 12 items · 4 transfer items

What this is. Every concept in this course's public description, re-asked with more disguise than a practice test uses. Each stem carries facts that do not decide it. Every wrong answer is a named trap.

Source. Scope from the course's public description in the WGU Institutional Catalog (September 2026); items written from the field's standard body of knowledge. No WGU assessment item, course material or proprietary content is used or reproduced. Not affiliated with or endorsed by Western Governors University.

Method © 2026 Erik Daniel Lindquist — Course Mastery Coach, armored drill. Items drafted with AI assistance under his direction.

How to run it

Paper first. Pencil. One pass, no notes, a timer if you want the pressure.

1. **Before you read the options**, fill the strip under the item: the target word (what is actually being asked), and the one fact in the stem that decides it.
2. **Principle before arithmetic**. Name the rule, then compute.
3. **Camouflage**. Most of every stem does not matter. Ask: which single fact decides this?
4. **Inverse pairs are the bait**. If two options are opposites, one of them is the trap built for you.
5. **Mark sure, unsure or guess** honestly. Sure-and-wrong is the most valuable miss on the page — it is a wrong mental model.
6. **Absolutes** (always, never, guarantee) are usually wrong. And recognizing an answer is not the same as owning it.
7. Items with a **heavy black bar** on the left are **transfer items**: the same principle, reversed or solved for a different variable.
8. Stop at the STOP page. Then grade, fill the triage grid, and tally the traps you fell for. The biggest tally is what you drill next.

The strip, filled in, looks like this:

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	_____	

Items

1.

During a civics lesson on a proposed city curfew for teens, students ask the candidate what she thinks. The class meets in the school library while its room is painted, and the city council vote is next month. What is the best response?

- A. Explain she will not share her view, then have students examine evidence for competing positions and discuss using norms.
- B. Refuse to discuss it because it is controversial.
- C. Wait until after the council vote so the answer is settled.
- D. Share her opinion so students see a model of a firm stance.

Target word _____	The one fact that decides _____	Answer ___	[] sure [] unsure [] guess
-----------------------------	---	----------------------	----------------------------------

2.

On a geometry unit pre-assessment, a student scores 96% while the class averages 58%. She is on the swim team and often arrives with wet hair. The unit has ten days of practice sets. What should the candidate do?

- A. Have her tutor the class for all ten days.
- B. Give her double the practice sets to keep her busy.
- C. Excuse her from practice she has mastered, check any gaps, and give her an enrichment or acceleration task.
- D. Keep her with the class, since pre-tests never predict final scores.

Target word _____	The one fact that decides _____	Answer ___	[] sure [] unsure [] guess
-----------------------------	---	----------------------	----------------------------------

3.

A candidate gives an anonymous survey to 120 students. On the item 'My teacher checks that we understand before moving on,' 70% disagree. One student wrote a rude comment about her shoes. The candidate recently bought a new projector. What should she do with the results?

- A. Focus on the rude comment and address it with the class.
- B. Add planned checks for understanding and survey again in a few weeks to see if the pattern changes.
- C. Use the projector more to make lessons more engaging.
- D. Ignore it, since students just want easier classes.

Target word _____	The one fact that decides _____	Answer ___	[] sure [] unsure [] guess
-----------------------------	---	----------------------	----------------------------------

4. [TRANSFER — reversed stem / different variable]

Which survey item gives a teacher the most usable feedback on instruction?

- A.** “When I’m confused, my teacher explains it a different way.”
- B.** “Rate your teacher from 1 to 10.”
- C.** “Do you like this class?”
- D.** “What grade do you expect?”

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

5.

A candidate finds a well-made set of lab activities online under a CC BY-NC-SA license. A colleague who used to work in publishing says the author is well known. The candidate wants to adapt the labs and sell them on a teacher marketplace. Is that allowed?

- A.** Yes, since the author is well known and the work is public.
- B.** Yes, as long as she credits the author.
- C.** No; she may adapt them with credit under the same license, but NC bars selling.
- D.** No; the license bars any changes.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

6. [TRANSFER — reversed stem / different variable]

A teacher wants material she may translate into Spanish and then post for free. Which license would NOT allow this?

- A.** CC BY-SA
- B.** CC BY-NC
- C.** CC BY
- D.** CC BY-ND

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

7.

The varsity coach, who has led the team to two state titles, asks the candidate to raise a player's 58% to a 60% so he stays eligible for Friday's game. The player's missing lab is still not turned in. What should the candidate do?

- A. Keep the grade, explain it reflects current evidence, and involve the cooperating teacher if pressure continues.
- B. Let him turn in the missing lab only after the game.
- C. Raise it by two points, since the change is small.
- D. Raise it because the coach's record shows he knows the player.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

8. [TRANSFER — reversed stem / different variable]

A parent asks for a grade review. In which case should the teacher change the grade?

- A. The parent says the student needs a B for a scholarship.
- B. Grades can never change once posted.
- C. The principal asks for fewer failing grades this term.
- D. The teacher finds she entered a 45 instead of the 85 written on the scored test.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

9.

A parent who runs a popular tutoring center offers to pay the candidate \$40 an hour to tutor her son, who is in the candidate's current algebra class. The student is friendly and plays in the jazz band. What is the most appropriate response?

- A. Accept, but only at the tutoring center rather than her home.
- B. Decline and suggest other tutoring options or free help available at school.
- C. Accept at a lower rate so it is not a real business.
- D. Accept, since the parent asked.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

10.

A candidate lists her stressors: a state testing schedule set by the district, a messy lesson-planning routine, a noisy heating system, and one hard-to-reach class. She is also planning a wedding in June. Where should she put her effort first?

- A.** Postpone the wedding to reduce stress.
- B.** Try to fix all four stressors equally.
- C.** Push the district to change the testing schedule.
- D.** Fix her planning routine and build relationships with the hard-to-reach class.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

11.

A new teacher's state requires 120 professional learning hours every 5-year renewal cycle. She already earned 12 hours in year one at a summer workshop near the beach. How many hours per year must she average over the remaining four years?

- A.** 24
- B.** 33
- C.** 27
- D.** 30

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

12. [TRANSFER — reversed stem / different variable]

A state requires an average of 20 professional learning hours per year over a 6-year cycle. A teacher has 45 hours after 3 years. How many hours must she earn in the remaining years?

- A.** 15
- B.** 75
- C.** 165
- D.** 60

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

STOP

Answers and dissection follow. Finish every item and every strip first.

Key and dissection

Struck-through text is the camouflage: facts that do not decide the item.

1. Answer A Concept 1

During a civics lesson on a proposed city curfew for teens, students ask the candidate what she thinks. ~~The class meets in the school library while its room is painted,~~ and the city council vote is next month. What is the best response?

Target word: handle an open issue **Decides:** Informed adults disagree; teach evidence and discussion.

A	Correct	Open issues are taught as open, with evidence and civil discussion, without steering students.
B	Absolute language	Avoidance loses a strong civic learning opportunity.
C	Camouflage	Uses the vote date; the issue stays debatable either way.
D	Inverted operation	A teacher's stance can pressure students; the aim is their reasoning.

2. Answer C Concept 2

On a geometry unit pre-assessment, a student scores 96% while the class averages 58%. ~~She is on the swim team and often arrives with wet hair.~~ The unit has ten days of practice sets. What should the candidate do?

Target word: response to prior mastery **Decides:** Pre-assessment shows mastery.

A	Adjacent category	Peer tutoring can help others but does not meet her learning needs.
B	Confusion set	More of the same is not challenge.
C	Correct	Compacting replaces known material with more challenging work.
D	Absolute language	A strong pre-assessment is valid evidence of prior mastery.

3. Answer B Concept 3

A candidate gives an anonymous survey to 120 students. On the item 'My teacher checks that we understand before moving on,' 70% disagree. One student wrote a rude comment about her shoes. ~~The candidate recently bought a new projector.~~ What should she do with the results?

Target word: use perception data **Decides:** A strong pattern on a specific practice.

A	Wrong stem number	One outlier comment is not the pattern; 70% is.
B	Correct	Acts on the clear pattern about a specific practice and re-measures.
C	Camouflage	Uses the projector; engagement is not the practice flagged.
D	Inverted operation	Dismisses valid data on a specific, observable practice.

4. Answer A Concept 3 · transfer

Which survey item gives a teacher the most usable feedback on instruction?

Target word: reverse: write the item **Decides:** Specific, observable teaching practice.

A	Correct	Names a specific, observable practice the teacher can change.
B	Dropped element	Drops the practice; the number cannot guide change.
C	Confusion set	Measures liking, not a practice.
D	Adjacent category	Student expectation, not teaching.

5. Answer C Concept 4

A candidate finds a well-made set of lab activities online under a CC BY-NC-SA license. ~~A colleague who used to work in publishing says the author is well known.~~ The candidate wants to adapt the labs and sell them on a teacher marketplace. Is that allowed?

Target word: license permission **Decides:** NC forbids commercial use.

A	Camouflage	Fame and online availability do not change license terms.
B	Dropped element	Credit meets BY, but drops the NC restriction.
C	Correct	BY needs credit, SA needs the same license, NC bars commercial use.
D	Confusion set	That is ND; this license allows adaptation.

6. Answer D Concept 4 • transfer

A teacher wants material she may translate into Spanish and then post for free. Which license would NOT allow this?

Target word: reverse: find the blocking license **Decides:** Translation is an adaptation; ND bars adaptations.

A	Confusion set	Allows adaptation if shared under the same license.
B	Adjacent category	NC restricts selling, and she is posting for free.
C	Inverted operation	Allows adaptation with credit.
D	Correct	No Derivatives forbids adaptations such as translations.

7. Answer A Concept 5

The varsity coach, ~~who has led the team to two state titles~~, asks the candidate to raise a player's 58% to a 60% so he stays eligible for Friday's game. The player's missing lab is still not turned in. What should the candidate do?

Target word: response to grade pressure **Decides:** No error or new evidence exists.

A	Correct	Grades change only for errors or new evidence; pressure is referred through channels.
B	Inverted operation	Reverses the order; eligibility would rest on work not yet done.
C	Wrong stem number	The size of the change does not make it honest.
D	Camouflage	The coach's success does not decide the grade.

8. Answer D Concept 5 • transfer

A parent asks for a grade review. In which case should the teacher change the grade?

Target word: reverse: when a change is legitimate **Decides:** A real error or new evidence.

A	Adjacent category	A need for a grade is not evidence of learning.
B	Absolute language	Errors and new evidence justify changes.
C	Confusion set	Pressure from authority is still pressure, not evidence.
D	Correct	A recording error is a valid reason to correct a grade.

9. Answer B Concept 6

A parent ~~who runs a popular tutoring center~~ offers to pay the candidate \$40 an hour to tutor her son, who is in the candidate's current algebra class. ~~The student is friendly and plays in the jazz band.~~ What is the most appropriate response?

Target word: recognize a dual relationship **Decides:** Paid tutoring of one's own current student.

A	Camouflage	Uses the center detail; location does not fix the conflict.
B	Correct	Paid work with your own student mixes teaching duty with personal gain.
C	Wrong stem number	Any payment from a current student's family creates the conflict.
D	Adjacent category	A request does not remove the conflict.

10. Answer D Concept 7

A candidate lists her stressors: a state testing schedule set by the district, a messy lesson-planning routine, a noisy heating system, and one hard-to-reach class. ~~She is also planning a wedding in June.~~ Where should she put her effort first?

Target word: sort by control **Decides:** Planning routine and class relationships are within control or influence.

A	Camouflage	Uses the wedding detail; it is not on the work list she is sorting.
B	Dropped element	Drops the sorting step.
C	Inverted operation	Puts energy into what she cannot control.
D	Correct	These she controls or can influence; energy there pays off.

11. Answer C Concept 8

A new teacher's state requires 120 professional learning hours every 5-year renewal cycle. She already earned 12 hours in year one ~~at a summer workshop near the beach.~~ How many hours per year must she average over the remaining four years?

Target word: hours per remaining year **Decides:** $(120 - 12) / 4$.

A	Wrong stem number	$120 / 5$ ignores hours earned and years left.
B	Inverted operation	Adds the 12 hours instead of subtracting: $132 / 4$.
C	Correct	$120 - 12 = 108$ hours left; $108 / 4 = 27$ per year.
D	Dropped element	$120 / 4$ drops the 12 hours already earned.

12. Answer B Concept 8 • transfer

A state requires an average of 20 professional learning hours per year over a 6-year cycle. A teacher has 45 hours after 3 years. How many hours must she earn in the remaining years?

Target word: solve for remaining total **Decides:** Total = $20 \times 6 = 120$.

A	Dropped element	Uses $20 \times 3 - 45$, dropping the later years.
B	Correct	$20 \times 6 = 120$ total; $120 - 45 = 75$.
C	Inverted operation	Adds earned hours instead of subtracting.
D	Wrong stem number	20×3 is the remaining years' average, not what she still owes.

Triage grid

Write each item number in the box it belongs to.

	Right	Wrong
Sure	Owled.	Concept inversion — top priority. A wrong mental model; it survives rewording.
Unsure / guess	Recognition, not mastery. Re-drill with the transfer.	Not learned yet.

Trap tally

For every miss, find the letter you chose in the key and tally its trap. The biggest number is the pattern to drill.

Trap	What it does	In this drill	Your misses
Dropped element	Leaves out a required term or step.	5	
Wrong stem number	A figure copied from the prompt that is not the answer.	5	
Adjacent category	The right idea in the wrong bucket.	5	
Inverted operation	Direction flipped: add/subtract, cause/effect, higher/lower.	7	
Absolute language	Always, never, guarantee — where judgment applies.	3	
Confusion set	Every option is real; the test is exact role-matching.	5	
Camouflage	Answers a stem fact that was never the question.	6	

Anchor rows — the concept list

One row per concept: the rule to lock in, the trap that catches people, and the tell in the question that signals it.

#	Concept	Rule	Trap	Tell
1	Teaching controversial issues	Treat open public questions as open: present credible competing positions, teach evidence and civil discussion norms, and do not push a personal stance.	Either avoiding the topic entirely or presenting one side as the only answer.	A current issue on which informed adults disagree comes up in class.
2	Curriculum compacting	Pre-assess; let students who already show mastery skip that practice and use the time on enrichment or acceleration.	Giving advanced students more of the same work.	A student asks the pre-assessment for the unit.
3	Student perception surveys	Short, anonymous surveys on specific teaching practices give valid feedback for adjusting instruction when read for patterns.	Asking whether students 'like' the class, or reacting to a single comment.	A teacher wants student feedback on their own teaching.
4	Open educational resource licenses	Creative Commons terms decide reuse: BY needs credit, SA needs the same license on adaptations, NC bars commercial use, ND bars changes.	Assuming anything free online can be changed and shared any way.	A teacher wants to adapt or sell material found online.
5	Pressure to change a grade	Grades must reflect documented evidence of learning; change one only for a real error or new evidence, and refer pressure through proper channels.	Changing a grade because a coach, parent, or administrator asks.	Someone requests a grade change for eligibility or a deadline.
6	Dual relationships	Avoid roles that mix your teaching duty with personal gain or private relationships, such as paid tutoring of your own current students.	Believing a dual role is fine if the family asks for it.	A family offers to pay the teacher for extra services.
7	Circle of control	Sort stressors into what you control, can influence, and cannot control, and put energy into the first two.	Spending effort worrying about things outside your control.	A teacher feels overwhelmed by several stressors at once.
8	Planning license renewal hours	Divide required professional learning hours across the renewal window and choose activities tied to a growth goal.	Waiting until the last year or counting hours without a goal.	A number of required hours and a number of years.

Course scope (public description): Student Teaching II is the final part of a two-part series and is a mandatory course for all candidates seeking initial licensure. The course offers a supervised classroom experience in a real-world setting, allowing candidates to demonstrate professional ethics and dispositions, collaborate with experienced teachers, and implement instructional strategies. Building on the responsibilities and skills developed in Student Teaching I, candidates receive ongoing feedback through observations and a final evaluation. This evaluation assesses activities' relevance and cultural engagement, the effectiveness of teaching each student, the ability to analyze and adjust teaching methods, and the willingness to explore new materials and methods. Successful completion of Student Teaching II is a crucial step in the licensure process, as it determines eligibility for licensure as a professional educator. Additionally, the course features synchronous learning sessions that delve

into professional development topics such as professional growth opportunities, ethical decision making, and self-care. Candidates must attend the required synchronous learning sessions in addition to their classroom placement.
