Student Teaching II in Secondary Education

Armored Drill

8 concepts · 12 items · 4 transfer items

What this is. Every concept in this course's public description, re-asked with more disguise than a practice test uses. Each stem carries facts that do not decide it. Every wrong answer is a named trap.

Source. Scope from the course's public description in the WGU Institutional Catalog (September 2026); items written from the field's standard body of knowledge. No WGU assessment item, course material or proprietary content is used or reproduced. Not affiliated with or endorsed by Western Governors University.

Method © 2026 Erik Daniel Lindquist — Course Mastery Coach, armored drill. Items drafted with AI assistance under his direction.

How to run it

Paper first. Pencil. One pass, no notes, a timer if you want the pressure.

1. **Before you read the options**, fill the strip under the item: the target word (what is actually being asked), and the one fact in the stem that decides it.
2. **Principle before arithmetic**. Name the rule, then compute.
3. **Camouflage**. Most of every stem does not matter. Ask: which single fact decides this?
4. **Inverse pairs are the bait**. If two options are opposites, one of them is the trap built for you.
5. **Mark sure, unsure or guess** honestly. Sure-and-wrong is the most valuable miss on the page — it is a wrong mental model.
6. **Absolutes** (always, never, guarantee) are usually wrong. And recognizing an answer is not the same as owning it.
7. Items with a **heavy black bar** on the left are **transfer items**: the same principle, reversed or solved for a different variable.
8. Stop at the STOP page. Then grade, fill the triage grid, and tally the traps you fell for. The biggest tally is what you drill next.

The strip, filled in, looks like this:

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	_____	

Items

1.

On a 20-item world history test, 26 of 30 students missed item 14, while no other item was missed by more than 8. The test was printed on the new copier, and the class meets after lunch. What should the student teacher do first?

- A. Reprint the test on a different copier.
- B. Reteach the whole unit.
- C. Check item 14 for a flaw, such as unclear wording or two defensible answers, before reteaching.
- D. Reteach item 14's concept right away.

Target word _____	The one fact that decides _____	Answer ___	[] sure [] unsure [] guess
-----------------------------	---	----------------------	----------------------------------

2. [TRANSFER — reversed stem / different variable]

On a test item, 12 of 30 students chose the correct answer. What percent missed it?

- A. 40%
- B. 18%
- C. 60%
- D. 12%

Target word _____	The one fact that decides _____	Answer ___	[] sure [] unsure [] guess
-----------------------------	---	----------------------	----------------------------------

3.

An eleventh-grade chemistry class is ending a unit on solutions. The school's drinking fountains were recently tested for lead, and the class meets in the new science wing. Which culminating task is most authentic?

- A. Students test water samples, analyze the data, and write a brief report for the school facilities office.
- B. A crossword puzzle of solution vocabulary.
- C. A poster about chemistry facts.
- D. A tour of the new science wing.

Target word _____	The one fact that decides _____	Answer ___	[] sure [] unsure [] guess
-----------------------------	---	----------------------	----------------------------------

4.

A tenth-grade English class must read a grade-level speech from the 1800s. Many students struggle with the long sentences. The speech is printed in a thick anthology, and the class has 32 students. What is the best support?

- A. Replace it with a short summary.
- B. Photocopy it to avoid the heavy anthology.
- C. Chunk the speech, preview key words, give guiding questions, and reread key passages together.
- D. Assign it for homework with no support.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

5. [TRANSFER — reversed stem / different variable]

A teacher always gives struggling readers an easier article on the same topic. Over time, what is the main risk?

- A. They will read too many hard texts.
- B. They will lose interest in the topic.
- C. None; easier text always builds skill fastest.
- D. They get little practice with grade-level text and fall further behind.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

6.

To motivate students, a student teacher plans to post a chart of every student's test score by name on the classroom wall. The class is an honors group, and the school just got new bulletin boards. What is the problem?

- A. Posting grades by name shares protected education records.
- B. No problem, since honors students do well.
- C. It would be fine if the names were in alphabetical order.
- D. Only low scores should be hidden.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

7.

A student teacher gets messages from students and parents at 11 p.m. and feels she must answer right away. She lives near the school and has a long commute on Fridays to see family. What is the best approach?

- A. Answer every message right away, at any hour.
- B. Share clear response hours and channels with families and students, and stick to them, with a plan for urgent issues.
- C. Ignore all messages.
- D. Move closer to her family.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

8.

A student teacher notices that only a few students in her ninth-grade biology class turn in homework. She attended a district workshop on homework last week, and her class meets in a portable. What would be an action research approach?

- A. Plan a change such as short in-class starts on homework, track completion for four weeks, reflect, and adjust.
- B. Change several things with no data.
- C. Attend another workshop.
- D. Ask to move out of the portable.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

9. [TRANSFER — reversed stem / different variable]

A teacher tried a new warm-up routine, collected four weeks of data, and found little change. What does the action research cycle call for next?

- A. Conclude that nothing can help.
- B. Reflect on the results and adjust the plan for another cycle.
- C. Keep the same plan with no changes.
- D. Publish the results as final.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

10.

A student teacher finds a free online U.S. history unit with beautiful slides and 10,000 downloads. The author is a teacher in another state. What should she check before using it?

- A.** Nothing, since free resources are always allowed.
- B.** Accuracy, alignment to her standards, accessibility, bias, and whether its license allows classroom use.
- C.** Just the number of downloads.
- D.** Only whether the slides look good.

Target word _____	The one fact that decides _____	Answer ____	☐ sure ☐ unsure ☐ guess
-----------------------------	---	-----------------------	---

11.

On the standard “cite textual evidence,” a student scored 1, 2, 3, 4, and 4 (out of 4) across the semester. The student sits in the front row and plays soccer. Under standards-based grading, what best reflects current mastery?

- A.** 1, the first score.
- B.** 3, the middle score.
- C.** 2.8, the average of all scores.
- D.** 4, based on the most recent consistent evidence.

Target word _____	The one fact that decides _____	Answer ____	☐ sure ☐ unsure ☐ guess
-----------------------------	---	-----------------------	---

12. [TRANSFER — reversed stem / different variable]

A teacher averages a student’s scores of 1, 1, 4, 4, and 4 on one standard. What grade does averaging give, and what does it hide?

- A.** 3.25, which counts only the three 4s and one 1.
- B.** 4, hiding nothing.
- C.** 2.8, which is the true mastery level.
- D.** 2.8, hiding that the student now shows full mastery.

Target word _____	The one fact that decides _____	Answer ____	☐ sure ☐ unsure ☐ guess
-----------------------------	---	-----------------------	---

STOP

Answers and dissection follow. Finish every item and every strip first.

Key and dissection

Struck-through text is the camouflage: facts that do not decide the item.

1. Answer C Concept 1

On a 20-item world history test, 26 of 30 students missed item 14, while no other item was missed by more than 8. ~~The test was printed on the new copier, and the class meets after lunch.~~ What should the student teacher do first?

Target word: first response to a high-miss item **Decides:** One item stands far apart.

A	Camouflage	Answers the copier detail.
B	Absolute language	Only one item stands out.
C	Correct	An outlier item may be flawed.
D	Dropped element	Skips checking the item itself.

2. Answer C Concept 1 • transfer

On a test item, 12 of 30 students chose the correct answer. What percent missed it?

Target word: compute miss rate **Decides:** $(30 - 12) / 30$.

A	Inverted operation	That is the percent correct.
B	Dropped element	The count missed, not divided by 30.
C	Correct	$18 \div 30 = 0.60$.
D	Wrong stem number	The count, not a percent.

3. Answer A Concept 2

An eleventh-grade chemistry class is ending a unit on solutions. The school's drinking fountains were recently tested for lead, ~~and the class meets in the new science wing.~~ Which culminating task is most authentic?

Target word: authentic task **Decides:** Real purpose and real use of chemistry.

A	Correct	Real use of chemistry for a real audience.
B	Adjacent category	Recall, not real use.
C	Dropped element	Hands-on but no real purpose or audience.
D	Camouflage	Answers the wing detail.

4. Answer C Concept 3

A tenth-grade English class must read a grade-level speech from the 1800s. Many students struggle with the long sentences. ~~The speech is printed in a thick anthology, and the class has 32 students.~~ What is the best support?

Target word: supporting complex text **Decides:** Keep the text; scaffold it.

A	Inverted operation	Removes the complex text instead of supporting it.
B	Camouflage	Answers the book detail.
C	Correct	Supports give access without removing complex text.
D	Dropped element	Drops the scaffolds.

5. Answer D Concept 3 · transfer

A teacher always gives struggling readers an easier article on the same topic. Over time, what is the main risk?

Target word: reverse: consequence of swapping **Decides:** Students miss complex-text practice.

A	Inverted operation	The opposite of what happens.
B	Adjacent category	Possible, but not the main risk.
C	Absolute language	Easier text alone does not build complex-text skill.
D	Correct	Without supported practice, complex text stays out of reach.

6. Answer A Concept 4

To motivate students, a student teacher plans to post a chart of every student's test score by name on the classroom wall. ~~The class is an honors group, and the school just got new bulletin boards.~~ What is the problem?

Target word: privacy of grades **Decides:** Scores identified by name are private records.

A	Correct	Grades must not be displayed to others in identifiable form.
B	Camouflage	Answers the honors detail.
C	Adjacent category	Order does not remove identification.
D	Dropped element	All identifiable grades are protected.

7. Answer B Concept 5

A student teacher gets messages from students and parents at 11 p.m. and feels she must answer right away. ~~She lives near the school and has a long commute on Fridays to see family.~~ What is the best approach?

Target word: after-hours boundary **Decides:** Set response times and channels.

A	Absolute language	Unlimited availability leads to burnout.
B	Correct	Clear boundaries protect health and set fair expectations.
C	Inverted operation	Swings to no communication.
D	Camouflage	Answers the commute detail.

8. Answer A Concept 6

A student teacher notices that only a few students in her ninth-grade biology class turn in homework. ~~She attended a district workshop on homework last week, and her class meets in a portable.~~ What would be an action research approach?

Target word: action research **Decides:** Study her own problem with a cycle.

A	Correct	Plan, act, collect data, reflect.
B	Dropped element	Drops data collection.
C	Adjacent category	Workshops alone are not studying her own practice.
D	Camouflage	Answers the room detail.

9. Answer B Concept 6 • transfer

A teacher tried a new warm-up routine, collected four weeks of data, and found little change. What does the action research cycle call for next?

Target word: reverse: step after weak results **Decides:** Reflect and adjust.

A	Absolute language	One cycle does not end the inquiry.
B	Correct	The cycle repeats with changes.
C	Inverted operation	Ignores the data.
D	Dropped element	Skips reflection and adjustment.

10. Answer B Concept 7

A student teacher finds a free online U.S. history unit with beautiful slides and 10,000 downloads. ~~The author is a teacher in another state.~~ What should she check before using it?

Target word: vetting materials **Decides:** Quality and rights, not popularity.

A	Absolute language	Free does not mean accurate or licensed for use.
B	Correct	Materials must be vetted on these criteria.
C	Camouflage	Popularity does not decide quality.
D	Dropped element	Appearance drops accuracy and alignment.

11. Answer D Concept 8

On the standard “cite textual evidence,” a student scored 1, 2, 3, 4, and 4 (out of 4) across the semester. ~~The student sits in the front row and plays soccer.~~ Under standards-based grading, what best reflects current mastery?

Target word: SBG score **Decides:** Recent, consistent evidence.

A	Wrong stem number	Uses the oldest evidence.
B	Dropped element	Drops the latest evidence.
C	Inverted operation	Averaging lets early struggles lower current mastery.
D	Correct	The last two scores show steady mastery.

12. Answer D Concept 8 • transfer

A teacher averages a student’s scores of 1, 1, 4, 4, and 4 on one standard. What grade does averaging give, and what does it hide?

Target word: compute average and flaw **Decides:** $(1+1+4+4+4)/5$.

A	Dropped element	Drops one of the 1s: $(4 + 4 + 4 + 1) / 4 = 3.25$.
B	Inverted operation	That is the SBG approach, not the average.
C	Adjacent category	The average understates current mastery.
D	Correct	$14 \div 5 = 2.8$; recent evidence shows 4.

Triage grid

Write each item number in the box it belongs to.

	Right	Wrong
Sure	Owled.	Concept inversion — top priority. A wrong mental model; it survives rewording.
Unsure / guess	Recognition, not mastery. Re-drill with the transfer.	Not learned yet.

Trap tally

For every miss, find the letter you chose in the key and tally its trap. The biggest number is the pattern to drill.

Trap	What it does	In this drill	Your misses
Dropped element	Leaves out a required term or step.	10	
Wrong stem number	A figure copied from the prompt that is not the answer.	2	
Adjacent category	The right idea in the wrong bucket.	5	
Inverted operation	Direction flipped: add/subtract, cause/effect, higher/lower.	7	
Absolute language	Always, never, guarantee — where judgment applies.	5	
Confusion set	Every option is real; the test is exact role-matching.	0	
Camouflage	Answers a stem fact that was never the question.	7	

Anchor rows — the concept list

One row per concept: the rule to lock in, the trap that catches people, and the tell in the question that signals it.

#	Concept	Rule	Trap	Tell
1	Item analysis	When many students miss one test item, check whether the item is flawed (unclear wording, two right answers) before deciding the concept needs reteaching.	Assuming a hard item always means students did not learn it.	One item with a much higher miss rate than the rest.
2	Authentic performance tasks	An authentic task asks students to use knowledge the way people do outside school, for a real purpose or audience, with clear criteria.	Calling any project authentic because it is hands-on.	Designing a culminating task for relevance.
3	Scaffolding complex text	Keep students on grade-level complex text with supports — chunking, guiding questions, vocabulary help, rereading — instead of always swapping in easier text.	Replacing hard texts with easy ones so everyone can read them alone.	Students struggling with a required grade-level reading.
4	Privacy of student grades	Student grades are protected education records; do not post or share them in ways that identify students to others.	Posting scores by name or having students grade and call out each other's scores.	Returning or displaying grades to a class.
5	Boundaries on after-hours communication	Set and share clear times and channels for responding to messages; this protects teacher health and sets fair expectations for families and students.	Believing a good teacher answers every message at any hour.	Messages arriving late at night or on weekends.
6	The action research cycle	Identify a problem in your own classroom, plan a change, act, collect data, reflect, and adjust — a cycle for professional growth.	Treating professional growth as attending workshops without studying your own practice.	A teacher wants to study a problem in their class.
7	Vetting new materials	Before adopting new or open materials, check accuracy, alignment to standards, accessibility, bias, and usage rights.	Adopting materials because they are free or look polished.	A teacher finds new free resources online.
8	Standards-based grading evidence	Standards-based grades reflect the most recent, consistent evidence of mastery on each standard rather than averaging early attempts with later ones.	Averaging all scores, so early struggles permanently lower the grade.	A series of scores on one standard showing growth.

Course scope (public description): Student Teaching II is the final part of a two-part series and is a mandatory course for all candidates seeking initial licensure. The course offers a supervised classroom experience in a real-world setting, allowing candidates to demonstrate professional ethics and dispositions, collaborate with experienced teachers, and implement instructional strategies. Building on the responsibilities and skills developed in Student Teaching I, candidates receive ongoing feedback through observations and a final evaluation. This evaluation assesses activities' relevance and cultural engagement, the effectiveness of teaching each student, the ability to analyze and adjust teaching methods, and the willingness to explore new materials and methods.

Successful completion of Student Teaching II is a crucial step in the licensure process, as it determines eligibility for licensure as a professional educator. Additionally, the course features synchronous learning sessions that delve into professional development topics such as professional growth opportunities, ethical decision making, and self-care. Candidates must attend the required synchronous learning sessions in addition to their classroom placement.
