Talent Acquisition and Development

Armored Drill

8 concepts · 12 items · 4 transfer items

What this is. Every concept in this course's public description, re-asked with more disguise than a practice test uses. Each stem carries facts that do not decide it. Every wrong answer is a named trap.

Source. Scope from the course's public description in the WGU Institutional Catalog (September 2026); items written from the field's standard body of knowledge. No WGU assessment item, course material or proprietary content is used or reproduced. Not affiliated with or endorsed by Western Governors University.

Method © 2026 Erik Daniel Lindquist — Course Mastery Coach, armored drill. Items drafted with AI assistance under his direction.

How to run it

Paper first. Pencil. One pass, no notes, a timer if you want the pressure.

1. **Before you read the options**, fill the strip under the item: the target word (what is actually being asked), and the one fact in the stem that decides it.
2. **Principle before arithmetic**. Name the rule, then compute.
3. **Camouflage**. Most of every stem does not matter. Ask: which single fact decides this?
4. **Inverse pairs are the bait**. If two options are opposites, one of them is the trap built for you.
5. **Mark sure, unsure or guess** honestly. Sure-and-wrong is the most valuable miss on the page — it is a wrong mental model.
6. **Absolutes** (always, never, guarantee) are usually wrong. And recognizing an answer is not the same as owning it.
7. Items with a **heavy black bar** on the left are **transfer items**: the same principle, reversed or solved for a different variable.
8. Stop at the STOP page. Then grade, fill the triage grid, and tally the traps you fell for. The biggest tally is what you drill next.

The strip, filled in, looks like this:

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	_____	

Items

1.

A hospital lets each nurse manager ask candidates whatever questions they like and decide by gut feel, and first-year turnover is high. The hospital cafeteria was just renovated. What is the best improvement to the interview process?

- A. Hire only graduates of top-ranked schools, since they always perform best.
- B. Hold interviews in the renovated cafeteria.
- C. Make interviews more casual so candidates relax.
- D. Use structured interviews with the same job-related questions and scored rating scales for every candidate.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

2.

A company with a call center in Tampa is hiring customer-service agents. Which interview question is behavioral?

- A. "What would you do if a customer yelled at you?"
- B. "Are you good with people?"
- C. "Tell me about a time you calmed an upset customer. What did you do, and what happened?"
- D. "How do you like the weather in Tampa?"

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

3.

A company spent \$30,000 on job-board ads and agency fees and \$20,000 in internal recruiter time, and made 25 hires. It also spent \$10,000 on a new lobby plant wall. What was the cost per hire?

- A. \$2,000
- B. \$2,400
- C. \$50,000
- D. \$1,200

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

4. [TRANSFER — reversed stem / different variable]

Cost per hire was \$4,000 across 15 hires, and external costs were \$36,000. What were internal recruiting costs?

- A.** \$24,000
- B.** \$96,000
- C.** \$2,400
- D.** \$60,000

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

5.

A job posting shared by the CEO on LinkedIn drew 400 applicants. 25% passed screening, 20% of those screened received offers, and 80% of offers were accepted. How many hires resulted?

- A.** 125
- B.** 20
- C.** 80
- D.** 16

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

6. [TRANSFER — reversed stem / different variable]

A recruiter needs 12 hires. 20% of applicants get interviews, 25% of interviewees get offers, and 75% of offers are accepted. How many applicants are needed?

- A.** 0.45
- B.** 240
- C.** 64
- D.** 320

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

7.

A software company gives new hires a one-day orientation on paperwork, badges, and policies, then leaves them on their own. Thirty percent quit within 90 days. The office offers free snacks. What is the best fix?

- A. Upgrade the snack selection.
- B. Build a 90-day onboarding plan with a buddy, clear role goals, and regular check-ins.
- C. Raise starting pay, since money always fixes early turnover.
- D. Add more policy slides to the orientation day.

Target word _____	The one fact that decides _____	Answer _____	[] sure [] unsure [] guess
-----------------------------	---	------------------------	----------------------------------

8.

Sixty days after a sales training held at a lakeside resort, a firm checks whether reps are actually using the new questioning technique on customer calls. Which Kirkpatrick level is this?

- A. Level 4: Results
- B. Level 2: Learning
- C. Level 3: Behavior
- D. Level 1: Reaction

Target word _____	The one fact that decides _____	Answer _____	[] sure [] unsure [] guess
-----------------------------	---	------------------------	----------------------------------

9. [TRANSFER — reversed stem / different variable]

A firm wants to evaluate a training program at Kirkpatrick Level 4. Which measure fits?

- A. Manager observation of skills used on calls
- B. End-of-session satisfaction survey
- C. Change in sales revenue linked to the trained reps
- D. Post-training test scores

Target word _____	The one fact that decides _____	Answer _____	[] sure [] unsure [] guess
-----------------------------	---	------------------------	----------------------------------

10.

A call center's complaint scores are rising. The manager wants to buy a \$50,000 leadership course because a rival company did. The center's lobby was just repainted. Using ADDIE, what should happen first?

- A.** Write learning objectives for the course.
- B.** Analyze the performance gap to learn why complaints are rising and whether training is the right fix.
- C.** Evaluate the course after it launches.
- D.** Buy the leadership course.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

11.

An HR generalist is creating a new data-analyst role. The hiring manager wants the posting live tomorrow, and the office just added a ping-pong table. What should come first?

- A.** A job analysis of the role's tasks, skills, and context
- B.** Copying another company's posting, which always works
- C.** Posting the job tomorrow as requested
- D.** Writing the job specification

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

12. [TRANSFER — reversed stem / different variable]

A document lists "bachelor's degree, SQL proficiency, two years of experience." What is it?

- A.** A job analysis
- B.** A job specification
- C.** A performance appraisal
- D.** A job description

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

STOP

Answers and dissection follow. Finish every item and every strip first.

Key and dissection

Struck-through text is the camouflage: facts that do not decide the item.

1. Answer D Concept 1

A hospital lets each nurse manager ask candidates whatever questions they like and decide by gut feel, and first-year turnover is high. ~~The hospital cafeteria was just renovated.~~ What is the best improvement to the interview process?

Target word: interview improvement **Decides:** Unstructured, inconsistent interviews.

A	Absolute language	School rank is a weak, overgeneralized predictor.
B	Camouflage	Setting does not fix interview validity.
C	Inverted operation	Moves further from structure.
D	Correct	Structure improves validity and fairness.

2. Answer C Concept 2

A company ~~with a call center in Tampa~~ is hiring customer-service agents. Which interview question is behavioral?

Target word: behavioral question **Decides:** Asks for a real past example.

A	Confusion set	Hypothetical (situational), not behavioral.
B	Dropped element	Yes/no with no evidence; drops the example.
C	Correct	Asks for a specific past situation, action, and result.
D	Camouflage	Small talk about the location, not job-related.

3. Answer A Concept 3

A company spent \$30,000 on job-board ads and agency fees and \$20,000 in internal recruiter time, and made 25 hires. ~~It also spent \$10,000 on a new lobby plant wall.~~ What was the cost per hire?

Target word: cost per hire **Decides:** $(\$30,000 + \$20,000) / 25$.

A	Correct	$\$50,000 / 25 = \$2,000$.
B	Camouflage	Adds the plant wall, which is not a recruiting cost.
C	Wrong stem number	Total cost, not per hire.
D	Dropped element	Counts external costs only.

4. Answer A Concept 3 • transfer

Cost per hire was \$4,000 across 15 hires, and external costs were \$36,000. What were internal recruiting costs?

Target word: solve for internal costs **Decides:** Total = $\$4,000 \times 15 = \$60,000$.

A	Correct	$\$60,000 - \$36,000 = \$24,000$.
B	Inverted operation	Adds external costs to the total instead of subtracting.
C	Adjacent category	$\$36,000 / 15$ is external cost per hire.
D	Dropped element	The total; drops the external share.

5. Answer D Concept 4

A job posting shared by the CEO on LinkedIn drew 400 applicants. 25% passed screening, 20% of those screened received offers, and 80% of offers were accepted. How many hires resulted?

Target word: projected hires **Decides:** $400 \times 0.25 \times 0.20 \times 0.80$.

A	Inverted operation	Divides 100 by 0.8 instead of multiplying through.
B	Dropped element	Stops at offers; drops the acceptance rate.
C	Wrong stem number	Applies the 20% offer rate to all 400 applicants.
D	Correct	$400 \rightarrow 100$ screened $\rightarrow 20$ offers $\rightarrow 16$ hires.

6. Answer D Concept 4 • transfer

A recruiter needs 12 hires. 20% of applicants get interviews, 25% of interviewees get offers, and 75% of offers are accepted. How many applicants are needed?

Target word: solve backward for applicants **Decides:** $12 / 0.75 / 0.25 / 0.20$.

A	Inverted operation	Multiplies 12 by the rates instead of dividing.
B	Dropped element	Drops the 75% acceptance step.
C	Confusion set	Interviews needed, not applicants.
D	Correct	$12 / 0.75 = 16$ offers; $/ 0.25 = 64$ interviews; $/ 0.20 = 320$ applicants.

7. Answer B Concept 5

A software company gives new hires a one-day orientation on paperwork, badges, and policies, then leaves them on their own. Thirty percent quit within 90 days. ~~The office offers free snacks.~~ What is the best fix?

Target word: fix for early turnover **Decides:** Orientation only, no onboarding.

A	Camouflage	Perks do not replace onboarding.
B	Correct	Onboarding supports integration beyond day one.
C	Absolute language	Early exits often stem from poor integration, not pay.
D	Adjacent category	Still orientation, not onboarding.

8. Answer C Concept 6

Sixty days after a sales training ~~held at a lakeside resort~~, a firm checks whether reps are actually using the new questioning technique on customer calls. Which Kirkpatrick level is this?

Target word: evaluation level **Decides:** Measuring on-the-job behavior.

A	Confusion set	Results are business outcomes like revenue.
B	Adjacent category	Learning measures knowledge gained, usually by test.
C	Correct	Use of skills on the job.
D	Confusion set	Reaction is how participants felt about the training.

9. Answer C Concept 6 • transfer

A firm wants to evaluate a training program at Kirkpatrick Level 4. Which measure fits?

Target word: reverse: from level to measure **Decides:** Level 4 = business results.

A	Dropped element	Level 3; stops short of results.
B	Confusion set	Level 1, reaction.
C	Correct	A business outcome.
D	Adjacent category	Level 2, learning.

10. Answer B Concept 7

A call center's complaint scores are rising. The manager wants to buy a \$50,000 leadership course because a rival company did. ~~The center's lobby was just repainted.~~ Using ADDIE, what should happen first?

Target word: first ADDIE step **Decides:** Analysis comes before any design or purchase.

A	Adjacent category	That is the design phase, which follows analysis.
B	Correct	ADDIE begins with needs analysis.
C	Inverted operation	Evaluation is the last phase, not the first.
D	Dropped element	Skips analysis; the cause may not be leadership.

11. Answer A Concept 8

An HR generalist is creating a new data-analyst role. The hiring manager wants the posting live tomorrow, ~~and the office just added a ping-pong table.~~ What should come first?

Target word: first step **Decides:** A new role has not been analyzed.

A	Correct	Job analysis feeds both the description and the specification.
B	Absolute language	Roles differ across organizations.
C	Dropped element	Drops the analysis that defines the role.
D	Adjacent category	The specification comes out of job analysis.

12. Answer B Concept 8 • transfer

A document lists "bachelor's degree, SQL proficiency, two years of experience." What is it?

Target word: reverse: from content to document **Decides:** It lists qualifications.

A	Adjacent category	The process that produces both documents.
B	Correct	Lists the qualifications a person needs.
C	Inverted operation	Rates a current employee after hire.
D	Confusion set	Describes duties and responsibilities.

Triage grid

Write each item number in the box it belongs to.

	Right	Wrong
Sure	Owned.	Concept inversion — top priority. A wrong mental model; it survives rewording.
Unsure / guess	Recognition, not mastery. Re-drill with the transfer.	Not learned yet.

Trap tally

For every miss, find the letter you chose in the key and tally its trap. The biggest number is the pattern to drill.

Trap	What it does	In this drill	Your misses
Dropped element	Leaves out a required term or step.	8	
Wrong stem number	A figure copied from the prompt that is not the answer.	2	
Adjacent category	The right idea in the wrong bucket.	7	
Inverted operation	Direction flipped: add/subtract, cause/effect, higher/lower.	6	
Absolute language	Always, never, guarantee — where judgment applies.	3	
Confusion set	Every option is real; the test is exact role-matching.	6	
Camouflage	Answers a stem fact that was never the question.	4	

Anchor rows — the concept list

One row per concept: the rule to lock in, the trap that catches people, and the tell in the question that signals it.

#	Concept	Rule	Trap	Tell
1	Structured interviews	Asking every candidate the same job-related questions and scoring answers on set rating scales predicts performance better than free-form interviews.	Trusting gut feel and casual conversation.	Hiring managers “ask whatever they like.”
2	Behavioral questions	Behavioral questions ask for a real past example (situation, task, action, result); past behavior predicts future behavior.	Mistaking a hypothetical “what would you do” question for a behavioral one.	“Tell me about a time...” vs. “What would you do if...”
3	Cost per hire	Cost per hire = (external costs + internal costs) / number of hires, counting only recruiting costs.	Leaving out internal costs or adding unrelated spending.	Recruiting spend split into internal and external.
4	Recruiting yield ratios	Multiply through each funnel stage’s pass rate to project hires, or divide backward to find the applicants needed.	Skipping a stage, often offer acceptance.	A chain of percentages from applicant to hire.
5	Onboarding vs. orientation	Orientation is a one-time session on paperwork and policy; onboarding is a months-long process of integration, role clarity, and support.	Treating a one-day orientation as full onboarding.	Early turnover after a single first-day session.
6	Kirkpatrick’s four levels	Level 1 reaction, level 2 learning, level 3 behavior on the job, level 4 business results.	Calling on-the-job behavior change “learning” or “results.”	What is being measured after training, and when.
7	ADDIE starts with analysis	Training design begins with a needs analysis to find the real performance gap before designing anything.	Buying or building training before confirming training is the fix.	A leader eager to buy a program because others did.
8	Job analysis, description, and specification	Job analysis comes first; it produces the job description (duties) and the job specification (qualifications).	Posting a job or copying another firm’s posting before analyzing the role.	A new role to define, or a document listing qualifications.

Course scope (public description): Organizations succeed when they attract the right people and support their growth. This course combines the skills of recruitment, onboarding, and employee development to show how HR professionals build strong workforces. You will learn how to design hiring processes that attract top talent and create development programs that keep employees engaged and high-performing. These skills make you a critical partner in shaping organizational success.
