The Education Professional

Armored Drill

8 concepts · 12 items · 4 transfer items

What this is. Every concept in this course's public description, re-asked with more disguise than a practice test uses. Each stem carries facts that do not decide it. Every wrong answer is a named trap.

Source. Scope from the course's public description in the WGU Institutional Catalog (September 2026); items written from the field's standard body of knowledge. No WGU assessment item, course material or proprietary content is used or reproduced. Not affiliated with or endorsed by Western Governors University.

Method © 2026 Erik Daniel Lindquist — Course Mastery Coach, armored drill. Items drafted with AI assistance under his direction.

How to run it

Paper first. Pencil. One pass, no notes, a timer if you want the pressure.

1. **Before you read the options**, fill the strip under the item: the target word (what is actually being asked), and the one fact in the stem that decides it.
2. **Principle before arithmetic**. Name the rule, then compute.
3. **Camouflage**. Most of every stem does not matter. Ask: which single fact decides this?
4. **Inverse pairs are the bait**. If two options are opposites, one of them is the trap built for you.
5. **Mark sure, unsure or guess** honestly. Sure-and-wrong is the most valuable miss on the page — it is a wrong mental model.
6. **Absolutes** (always, never, guarantee) are usually wrong. And recognizing an answer is not the same as owning it.
7. Items with a **heavy black bar** on the left are **transfer items**: the same principle, reversed or solved for a different variable.
8. Stop at the STOP page. Then grade, fill the triage grid, and tally the traps you fell for. The biggest tally is what you drill next.

The strip, filled in, looks like this:

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	_____	

Items

1.

A candidate writes in her reflection, “I deeply value collaboration.” Her supervisor notes that she missed two planning meetings without notice. She has a master’s degree in biology and speaks two languages. How is her collaboration disposition most likely judged?

- A. As needing growth, because missed meetings are the observable evidence.
- B. It cannot be judged, since dispositions are private feelings.
- C. As strong, because she states she values collaboration.
- D. As strong, because of her degree and languages.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

2. [TRANSFER — reversed stem / different variable]

Which evidence best shows the disposition ‘open to feedback’?

- A. Her next lesson plan applies the supervisor’s suggestion and her reflection notes the result.
- B. She says, “I love feedback.”
- C. She nods during debriefs.
- D. She asks for no feedback, to avoid stress.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

3.

A teacher who coaches the chess club posts students’ test scores in a shared online folder that anyone with the link can open. The school is in a fast-growing suburb. Which ethics principle is most directly involved?

- A. Responsibility to the profession.
- B. Professional competence.
- C. Responsible and ethical use of technology.
- D. Responsibility to the school community, because of the growing suburb.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

4.

A candidate supervising recess gets a phone call from her landlord about a water leak. Two students are climbing the fence at the far end, and the playground was recently resurfaced. What should she do?

- A. Assume the new surface will prevent injury.
- B. Ignore the call, go to the fence, and get the students down safely.
- C. Yell from where she stands and keep talking.
- D. Take the call quickly, then check the fence.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

5.

A popular teacher who runs the school's robotics team gets a friend request on a personal social media account from a current eighth grader. The teacher's account has photos from a recent beach vacation. What should the teacher do?

- A. Accept but hide the vacation photos.
- B. Accept, since the student is on the robotics team.
- C. Decline the request and use approved school channels for contact.
- D. Delete the account forever.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

6.

A candidate wants evidence that a vocabulary routine works. She finds a slick vendor brochure with teacher quotes, a blog post shared 20,000 times, and a peer-reviewed study comparing 400 students in treatment and comparison classrooms. Her mentor uses the routine daily. Which source is strongest?

- A. The blog post, since it was widely shared.
- B. Her mentor's daily use.
- C. The vendor brochure, since teachers are quoted.
- D. The peer-reviewed study with comparison classrooms.

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

7.

In a study run in a district with new buildings, students using a reading program averaged 78 on a test and a comparison group averaged 72. The standard deviation was 12. The program costs \$40 per student. What is the effect size?

- A. 6
- B. 0.50
- C. 2.0
- D. 0.15

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

8. [TRANSFER — reversed stem / different variable]

A study reports an effect size of 0.25 and a standard deviation of 16 points. How many points higher did the treatment group score?

- A. 4
- B. 0.25
- C. 16
- D. 64

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

9.

A new teacher, who loves hiking and recently moved from another state, writes a growth goal: "I will get better at classroom management." Which revision makes it SMART?

- A. "I will hike weekly to lower stress by June."
- B. "I will read about classroom management."
- C. "I will be the best manager in the school."
- D. "By December, I will cut transition time to under 2 minutes, measured by weekly timing."

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

10. [TRANSFER — reversed stem / different variable]

Which SMART element is missing from: "I will raise the share of students meeting reading goals from 55% to 70%"?

- A. Specific
- B. Measurable
- C. Time-bound
- D. Relevant

Target word	The one fact that decides	Answer	[] sure [] unsure [] guess
_____	_____	___	

11.

A teacher wants to photocopy an entire \$30 student workbook for 28 students so families will not have to buy it. The workbook has bright illustrations and was published last year. Is this fair use?

- A.** No, only because it has illustrations.
- B.** No; copying the whole consumable work replaces sales, so it is not fair use.
- C.** Yes, because it is for education.
- D.** Yes, if she copies it for only 28 students.

Target word _____	The one fact that decides _____	Answer ____	[] sure [] unsure [] guess
-----------------------------	---	-----------------------	----------------------------------

12. [TRANSFER — reversed stem / different variable]

Which classroom use of a copyrighted novel most likely qualifies as fair use?

- A.** Copying three chapters each week until the book is done.
- B.** Scanning the whole novel and posting it for students.
- C.** Any use in a school building.
- D.** Projecting a one-page passage for a close-reading lesson.

Target word _____	The one fact that decides _____	Answer ____	[] sure [] unsure [] guess
-----------------------------	---	-----------------------	----------------------------------

STOP

Answers and dissection follow. Finish every item and every strip first.

Key and dissection

Struck-through text is the camouflage: facts that do not decide the item.

1. Answer A Concept 1

A candidate writes in her reflection, “I deeply value collaboration.” Her supervisor notes that she missed two planning meetings without notice. ~~She has a master’s degree in biology and speaks two languages.~~ How is her collaboration disposition most likely judged?

Target word: how dispositions are judged **Decides:** Observable actions, not stated values.

A	Correct	Dispositions are judged by consistent behavior.
B	Confusion set	Dispositions are defined by observable behavior.
C	Inverted operation	Stated beliefs do not outweigh actions.
D	Camouflage	Credentials are not dispositions.

2. Answer A Concept 1 • transfer

Which evidence best shows the disposition ‘open to feedback’?

Target word: reverse: from disposition to evidence **Decides:** An action showing feedback was used.

A	Correct	Observable follow-through shows openness.
B	Inverted operation	A statement, not behavior.
C	Dropped element	Drops the action that proves use.
D	Adjacent category	Shows the opposite disposition.

3. Answer C Concept 2

A teacher ~~who coaches the chess club~~ posts students’ test scores in a shared online folder that anyone with the link can open. ~~The school is in a fast-growing suburb.~~ Which ethics principle is most directly involved?

Target word: classify the principle **Decides:** Misuse of digital tools with student data.

A	Adjacent category	Broader conduct; the core issue is technology and data.
B	Confusion set	Competence is about skill and knowledge in teaching.
C	Correct	Exposing student data through a digital tool falls under technology use.
D	Camouflage	Uses the location; the setting does not decide the principle.

4. Answer B Concept 3

A candidate supervising recess gets a phone call from her landlord about a water leak. Two students are climbing the fence at the far end, and ~~the playground was recently resurfaced.~~ What should she do?

Target word: duty of care **Decides:** Foreseeable risk while she is responsible.

A	Camouflage	Resurfacing does not remove the risk.
B	Correct	Active supervision and preventing foreseeable harm come first.
C	Dropped element	Drops active supervision.
D	Inverted operation	Puts personal matters ahead of supervision.

5. Answer C Concept 4

A popular teacher ~~who runs the school's robotics team~~ gets a friend request on a personal social media account from a current eighth grader. ~~The teacher's account has photos from a recent beach vacation.~~ What should the teacher do?

Target word: social media boundary **Decides:** Current student, personal account.

A	Dropped element	Drops the boundary; the issue is the connection itself.
B	Camouflage	A club role does not change the boundary.
C	Correct	Keeps a professional boundary with current students.
D	Absolute language	Private personal accounts are allowed.

6. Answer D Concept 5

A candidate wants evidence that a vocabulary routine works. She finds a slick vendor brochure with teacher quotes, a blog post shared 20,000 times, and a peer-reviewed study comparing 400 students in treatment and comparison classrooms. ~~Her mentor uses the routine daily.~~ Which source is strongest?

Target word: rank evidence **Decides:** Peer review with a comparison group and a large sample.

A	Confusion set	Popularity is not evidence.
B	Camouflage	Experience is useful but not research evidence.
C	Adjacent category	Testimonials and vendors are biased sources.
D	Correct	Design and review give the strongest evidence.

7. Answer B Concept 6

In a study ~~run in a district with new buildings~~, students using a reading program averaged 78 on a test and a comparison group averaged 72. The standard deviation was 12. ~~The program costs \$40 per student.~~ What is the effect size?

Target word: compute d **Decides:** $(78 - 72) / 12$.

A	Dropped element	The raw difference, not divided by the standard deviation.
B	Correct	$6 / 12 = 0.50$, a moderate effect.
C	Inverted operation	$12 / 6$ flips the division.
D	Camouflage	Uses the cost figure: $6 / 40$.

8. Answer A Concept 6 • transfer

A study reports an effect size of 0.25 and a standard deviation of 16 points. How many points higher did the treatment group score?

Target word: solve for the difference **Decides:** Difference = $d \times SD$.

A	Correct	$0.25 \times 16 = 4$ points.
B	Confusion set	The effect size, not points.
C	Wrong stem number	The standard deviation itself.
D	Inverted operation	$16 / 0.25$ divides instead of multiplying.

9. Answer D Concept 7

A new teacher, ~~who loves hiking and recently moved from another state,~~ writes a growth goal: “I will get better at classroom management.” Which revision makes it SMART?

Target word: SMART revision **Decides:** Needs a measure and a deadline.

A	Camouflage	Uses the hiking detail; not about management.
B	Dropped element	Drops a measure and a deadline.
C	Absolute language	Not measurable or achievable.
D	Correct	Specific, measurable, relevant, achievable, and time-bound.

10. Answer C Concept 7 • transfer

Which SMART element is missing from: “I will raise the share of students meeting reading goals from 55% to 70%”?

Target word: reverse: find the missing element **Decides:** No deadline.

A	Confusion set	It names the outcome and group.
B	Inverted operation	It has clear percentages.
C	Correct	It has no date or timeframe.
D	Adjacent category	Reading goals are relevant to teaching.

11. Answer B Concept 8

A teacher wants to photocopy an entire \$30 student workbook for 28 students so families will not have to buy it. ~~The workbook has bright illustrations and was published last year.~~ Is this fair use?

Target word: fair use judgment **Decides:** Whole work copied to replace a purchase.

A	Camouflage	Illustrations are not the deciding factor.
B	Correct	Amount and market effect weigh heavily against it.
C	Absolute language	Educational purpose alone does not make use fair.
D	Wrong stem number	Class size does not change the market effect of copying the whole book.

12. Answer D Concept 8 • transfer

Which classroom use of a copyrighted novel most likely qualifies as fair use?

Target word: reverse: find the fair use **Decides:** Small portion, teaching purpose, no market harm.

A	Dropped element	Drops the limit on amount; it adds up to the whole book.
B	Inverted operation	Whole work shared, replacing purchases.
C	Absolute language	Location does not make use fair.
D	Correct	A brief excerpt for teaching with little market effect.

Triage grid

Write each item number in the box it belongs to.

	Right	Wrong
Sure	Owned.	Concept inversion — top priority. A wrong mental model; it survives rewording.
Unsure / guess	Recognition, not mastery. Re-drill with the transfer.	Not learned yet.

Trap tally

For every miss, find the letter you chose in the key and tally its trap. The biggest number is the pattern to drill.

Trap	What it does	In this drill	Your misses
Dropped element	Leaves out a required term or step.	6	
Wrong stem number	A figure copied from the prompt that is not the answer.	2	
Adjacent category	The right idea in the wrong bucket.	4	
Inverted operation	Direction flipped: add/subtract, cause/effect, higher/lower.	7	
Absolute language	Always, never, guarantee — where judgment applies.	4	
Confusion set	Every option is real; the test is exact role-matching.	5	
Camouflage	Answers a stem fact that was never the question.	8	

Anchor rows — the concept list

One row per concept: the rule to lock in, the trap that catches people, and the tell in the question that signals it.

#	Concept	Rule	Trap	Tell
1	Dispositions are observable behaviors	Professional dispositions are judged by consistent actions (punctuality, follow-through, respectful communication, openness to feedback), not by stated beliefs.	Thinking good intentions or caring feelings prove good dispositions.	A question about how a disposition would be shown or evaluated.
2	The five principles of the educator code of ethics	The Model Code of Ethics for Educators groups duties into responsibility to the profession, professional competence, responsibility to students, responsibility to the school community, and responsible use of technology.	Treating ethics as only about student relationships.	A scenario asks which area of ethical responsibility applies.
3	Duty of care and supervision	Teachers must actively supervise students in their charge and act to prevent foreseeable harm.	Assuming supervision ends when students are working independently or out of sight briefly.	Students left without adult supervision, even for a short time.
4	Social media boundaries	Keep personal accounts private, do not friend or privately message current students, and remember public posts reflect on your role.	Believing personal accounts are fully separate from professional life.	A student sends a friend request or a teacher posts about work.
5	Judging research quality	Prefer peer-reviewed studies with comparison groups, adequate samples, and replication; be cautious with single studies, testimonials, or vendor reports.	Trusting a claim because it is popular, recent, or labeled 'research-based.'	A choice between sources supporting a teaching practice.
6	Effect size	Effect size (d) = (treatment mean – comparison mean) ÷ standard deviation; it shows how large a difference is in standard deviation units.	Reading a small p-value or a raw point difference as a large effect.	Two group means and a standard deviation.
7	SMART professional goals	A growth goal is Specific, Measurable, Achievable, Relevant, and Time-bound.	Writing goals like 'become a better teacher.'	A draft goal for a professional growth plan.
8	Copyright and fair use in teaching	Fair use weighs purpose, nature of the work, amount used, and market effect; short excerpts for a lesson often qualify, but copying whole workbooks to avoid buying them does not.	Believing any educational use is automatically fair use.	A teacher copying or sharing published material.

Course scope (public description): The Education Professional prepares WGU students to excel in the exciting and impactful profession of being an educator. Additionally, the course addresses the importance of continuous professional development and ethical considerations in teaching through the School of Education (SOE) Professional Dispositions and Ethics. Upon completion of the course, WGU students will be equipped with the tools and insights needed to continue their professional journey of becoming effective, inspiring, and adaptive

educators, capable of making a significant impact in the lives of their students and the broader educational community. Students will also start a research-based professional portfolio. (This is not a transferable course.)
