

## V2.0 JOSHUA

### V2.0 JOSHUA — one car, one county, one number

---

*V2.0 is the same plan with the moving parts taken out. There is one thing to do now — put one car at one bar door and get the state to count — and everything else waits behind a gate that says exactly when it opens. Every line: what, why, cost, done when. The sources behind every number are on their own page, V1.0 SOURCES, so this one stays short. The page for Andrea is V1.1 ANDREA.*

*Names: **JOSHUA Holdings, LLC** owns (the car, later the building), doing business as **Last Ten Yards. Ride at Closing Utah** (nonprofit) proves — it holds the agreement with the state and is the only one that can take a grant. **Andrea** lends — one car, on a note, with a brake.*

---

**NOW — this month. Cost to start: \$415 in filings, then Andrea's \$50,000 for the car.**

**Week 1 — make the two names real (\$140)**

1. **Search both names on the state's site** — "JOSHUA Holdings" and "Ride at Closing Utah." Why: the state won't let two companies share a name. \$0. Done when: no match. [Utah name search](#)
2. **File the LLC.** Why: the paper that lets a company own a car and sign a note. **\$59.** Done when: it's in the search next business day. [Utah Division of Corporations](#)
3. **File the DBA "Last Ten Yards."** Why: the name the bars see says what we do. **\$22.** Done when: it shows under the LLC.
4. **File the nonprofit** with the state's template (it already has the two IRS sentences). Why: only a nonprofit can hold the state's agreement and a grant. **\$59.** Done when: it's in the search. [Utah nonprofit corporations](#)
5. **Two tax IDs from the IRS**, one per name. Why: the bank and the state need a number that isn't your Social Security number. \$0, instant. Done when: two letters. [IRS EIN](#)
6. **Three board members for the nonprofit; first meeting; bylaws.** Why: the IRS wants a board that isn't one family; the meeting approves the bank account and the IRS form. \$0. Done when: three consent letters and signed minutes.
7. **Two bank accounts**, one per name. Why: Andrea's brake is tied to the company's account existing; grant money must land in the nonprofit's. \$0-\$15/mo each. Done when: two statements.
8. **The IRS short form for the nonprofit.** Why: no IRS letter, no grant — and it's the slow part (about 22 days for most). **\$275.** Done when: the acknowledgment, then the letter. [1023-EZ](#)
9. **The nonprofit's free federal ID (UEI).** Why: any state grant needs it and it takes weeks. \$0. Done when: the twelve-character number. [SAM.gov](#)

**Week 2 — the number and the yardstick (\$0)**

10. **Pull the county's numbers — already done, keep the page:** Salt Lake County drunk-driving crashes, 380 in 2024, 30 with a death, 145 of them between 10 p.m. and 3 a.m. Why: it's the "before" number. \$0. Done when: the export is in the binder with the Fri-Sun cut added by hand. [UDOT crash service](#)
11. **List the bars by cluster** from the state liquor list (codes CL and LB). Why: the bars are the doors. \$0. Done when: a spreadsheet with a count per cluster. [DABS licensee list](#)
12. **Email the Highway Safety Office one question:** what number would you accept as proof this worked? Why: if they name the yardstick, they can't argue with it later. \$0. Done when: their reply. 801-965-4400; data: Barbra Freeman, bafreeman@utah.gov. [UHSO](#)
13. **Turn the reply into one signed page:** before number, what we do, after number, a comparison county, a report every three months. Why: **this page is Andrea's brake and the grant's spine.** \$0. Done when: signed.
14. **Two bars put it in writing** that they want a car at their door at closing. Why: a customer, not a theory. \$0. Done when: two letters.

### Week 3 — the car (Andrea's \$50,000, released only after 7 and 13)

15. **Sign her note** — amount, interest, date it comes back, the car as security, and the brake: *no money moves until the state's page (13) is signed and the company's account (7) exists*. Why: a loan without paper is a gift. \$200–400. Done when: signed, in **her** binder.
16. **Buy one car for the job** — reliable, six nights a week, Utah winter; driven now, self-driving when the law and the product allow (Utah already allows it). Why: the job picks the car. \$28,000–\$36,000. Done when: bill of sale and title in the name the note says. [Utah DMV commercial](#)
17. **For-hire insurance, \$1.5 million**, company named. Why: Salt Lake City requires it for any car carrying paying riders; a personal policy won't pay. \$2,500–6,000/yr. Done when: the binder.
18. **Salt Lake City's car-for-hire licence** through the airport ground-transportation office (it covers the whole city), plus Midvale's answer. Why: it's the licence that applies to a company that owns its cars — the Uber-style state rule doesn't. \$0 to register; badge and inspection. Done when: the registration and the badge. [SLC ground transportation](#)
19. **Satellite internet on the roof**. Why: the car has to be reachable where phones die. \$199 + \$55/mo. Done when: it logs from I-80. [Starlink Roam](#)

### Nights 1–90 — the proof (\$0 beyond the car)

20. **At the door, six nights a week, every night logged**. Done when: the nightly log.
21. **Report to the state every three months** in the format from 13. Done when: the state's number, on their letterhead.
22. **Andrea gets the same number, the same day**. Done when: she has it.

**That's the whole first move: 22 steps, \$415 in filings, one car.**

---

### LATER — each behind a gate. Nothing here needs a dollar until its gate opens.

- **The grant**. *Gate: the state's first number (21) + the February 2027 window*. The state's highway-safety office funds nonprofits, no match, but won't buy cars and this year's window closed in March. Apply with the signed page and the 90-night log. Talk to a program manager first. [GEARS](#)
- **The building**. *Gate: Midvale planning says yes to a depot at 7045 S 300 E + the first number*. Six twin homes, owned by Level 12 LLC, listed for \$5.9 million, all rented, taxed as houses. A government-backed 504 loan can't buy rented homes, so it's one unit, or a seller-carry deal — never Andrea's money. Ask the listing agent and Midvale planning the same week, after the car exists.
- **The detox tenant**. *Gate: the building*. An operator who already holds the licence and a county contract leases first; the lease is what makes a bank lend. Zoning first; the county's behavioral-health line is 385-468-4707.
- **The day shift — elderly rides and medicine runs**. *Gate: 90 nights logged*. Same car, different hour. Two hospice agencies and two pharmacies asked one question each: what do rides and deliveries cost you today? Paige reads it.
- **The second county — Wendover, Utah** (1,115 people; the USDA-eligible town). *Gate: the first number*.
- **The sky**. *Gate: the second county*. Rent it (Starlink), register the depot's radio (free, first-come), drive the four corridors at 1 a.m. and log them, buy daytime imagery for lot sizes. The night count comes from the car — a satellite can't see a lot at 12:45 a.m. A launch only with a buyer signed first.
- **The second state**. *Gate: the state's number on its letterhead*. Same federal program, different door, ten times.

### Parallel — your hand, today

Applications (2) · Drive and boss (the books) · Amazon (six titles at \$0.99) · working rules to the three assistants · disconnect the thirteen connections · the accounting practice test on paper · copyright packets 3–9, hold 1 and 2.

### What she'll say

- **"This is a lot."** It's 22 steps and one car. Everything else is a gate with a date on it, and none of it takes a dollar until the gate opens.

- **“Why two companies?”** One owns the car. One holds the agreement with the state, because the state only signs with a nonprofit. The names never blur: Holdings owns, Ride at Closing proves, you lend.
- **“When does my money move?”** After the state signs (13) and the company’s account exists (7). It’s in the note.
- **“And the building, the detox center, the satellites?”** Later pages, each behind a gate. Not 2026. Not your money.
